## C-Table® Personal Worksurfaces

December 2020

Supporting productive lounge spaces.

- A. The “C” shaped base allows C-Tables to slide under most lounge furniture pieces, while also contouring around furniture feet and legs, allowing for the table to be pulled close to user.
- B. Steel base construction allows for a superior 300 lb. weight rating, allowing worksurfaces to function as a temporary "perch".
- C. The 18" round C-Table top is designed to support productivity within lounge environments, and is perfect for a laptop, notebook, or other small personal items.
- D. 27" height of C-Table allows it to be stored under standard 29" working-height tables.
- E. C-Table Max Base options: 26" fixed height, 29" fixed height, and 25" – 30" adjustable height.
- F. C-Table Max height-adjustable base is easily activated with a lever located under the tabletop, which engages pins that lock into holes within the base, at the user selected height.
- G. C-Table Max top sizes are designed to maximize usable space, supporting users with many personal items, who still wish to be productive while sitting in soft seating environments.
- H. C-Table Max top shapes are designed to support both individual work and instant collaboration in lounge settings.
- I. Overall lightweight design is intended to be mobile with limited effort from users.
- J. Bases available in all standard KI powder coat finishes.
- K. Select from nearly 50 standard laminates for worksurfaces.
