

History

Our company, still family-led today, has **over 13 years of experience in the modular cabinetry market**. We continue to grow through design inspiration and technology innovation, leveraging over 85 years of veneer and laminate casegoods experience.

Cost certainty

Sales teams leverage established contracts such as **GSA, Vizient, and OMNIA** to help access volume discounts, manage budgets, and control year-over-year costs without compromising functionality or aesthetics.

Internal Supply Chain Teams plan **material allocation in advance to minimize disruptions** by coordinating with multiple suppliers and locations.

Our goal is to ensure your project is completed on time and within budget.

Scalability

Modular cabinetry can be quickly adapted or expanded without major demolition or costly downtime. By reusing and reconfiguring existing components, it also supports sustainable initiatives and reduces environmental impact. What we design and build today will be easily adaptable for tomorrow.

Custom capabilities

Our portfolio is comprehensive, but always evolving. We listen, learn, and adapt to align with our clients' vision. Our ability to **customize and create tailored solutions sets us apart**, and we consistently strive to exceed expectations.

Certified test lab

Every cabinet is tested in our own lab to ensure it meets or exceeds BIFMA standards. New cabinets undergo testing during development, and all cabinets are regularly re-tested to maintain compliance.

Logistics

We operate a fleet of over 175 trucks and 450 trailers to ensure a flawless delivery process that aligns with your construction/installation schedule. With a **99.98% damage-free rate and an online tracking system** you can trust that you'll receive everything you need, exactly when you need it.

Installation

Mile Marker.G2 is **factory-built to ensure uniformity and precision**. All cabinets arrive ready for installation, significantly reducing onsite construction. Designed for flexibility, the cabinetry can **easily adapt to small architectural variances** using fillers and adjustable components – helping avoid costly delays.

Warranty

Our cabinets are crafted with care and a commitment to defect-free quality. We warranty our workmanship and materials, effective from the original date of purchase. **Mile Marker.G2 has a limited lifetime warranty.**

Sustainability

We have a **recycling and reuse program** designed to divert solid waste from landfills, with a goal of 100% waste diversion. A **lean manufacturing** approach, supported by optimizing software, helps maximize material yields and minimize waste.

Financial impact

Modular cabinetry can be registered as a **capital asset** and qualifies for a **7-year depreciation schedule**. This classification offers significant tax advantages for **for-profit companies**, supporting better cash flow and a faster return on investment.
