Achella Design

Chris and Jon Panichella lead the industrial design portion of Achella Design - a multidisciplinary studio representing the collaborative efforts of Chris, Alyssa and Jon Panichella. While their primary focus is furniture and graphic design, they have helped clients find solutions in diverse industries from medical devices to retail and exhibit design.

In lieu of an overarching design philosophy, Achella Design prefers to focus on authentic collaborations between the client, the intent of the project, and the end user. Their goal is to tailor market solutions that perfectly blend their design sensibilities with the brands they create them for. With this honest approach Achella Design creates honest solutions.
