Low-Back Conference Chair		8
Mid-Back Conference Chair		9
High-Back Conference Chair		10
Low-Back Stool		11

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

TECHNICAL SPECIFICATIONS

Mechanism

The self-weighting mechanism is constructed of stamped steel, shrouded with a plastic trim cover. Seat-height lever adjusts the pneumatic cylinder with $4\frac{3}{4}$ " of travel, from $16\frac{3}{4}$ " to $21\frac{1}{2}$ " for the chair. Height adjustment for stools is $9\frac{3}{4}$ " of travel, from 20" to $29\frac{3}{4}$ ".

Chair models have an adjustment for back recline, or may be locked to provide support when in an upright position.

An optional tilt tension is available on the chair and is adjusted by turning the wheel located under the seat, to the left or right. The stool has the tilt locked in position for stability reasons.

Seat

Upholstered seat construction is polypropylene seat board with $2\frac{1}{2}$ " inches of high resiliency (HR) foam featuring a simple waterfall front edge. Foam passes CA TB-117-2013 standard. Seat width is $19\frac{3}{4}$ ". The seat shroud color matches the frame color choice.

Backrest

The backrest is fully upholstered (front and back), using a 3.7 lb high-density molded foam that passes CA TB-117-2013 standard.

Bases

The chair and stool offer two options; a 5-Star nylon base or a 5-Star aluminum base. The cylinders on the chair and stool are always black.

Casters

Casters are 60 mm O.D., double-wheel high-impact nylon, and are designed for use on both commercial carpet and hard floor applications. The standard caster is black only while the designer caster is black with a white diameter stripe.

Arms

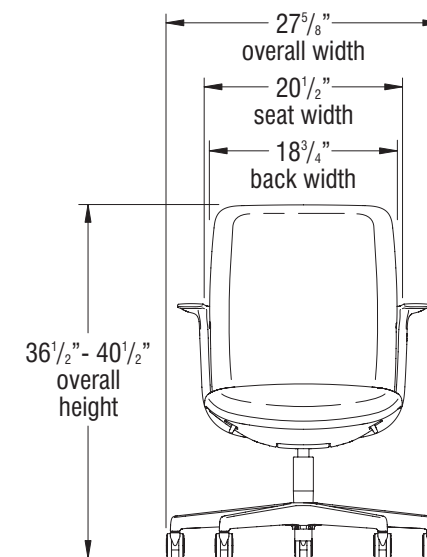

Arms are fixed-height only and are integrated into the plastic J-Bar, which wraps around the backrest. The arms color is determined by the frame color choice.

Foot Ring

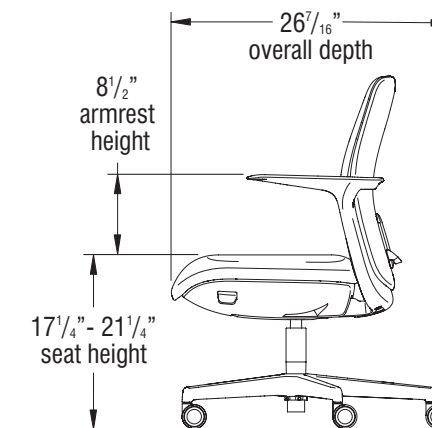

Stools are equipped with an adjustable-height foot ring which features a twist-to-lock, or unlock height adjustment. Foot ring is 20" diameter tubular steel with four spokes. The color is always black.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A**Select basic model.
- B**Select lumbar option.

N

- No adjustable lumbar mechanism

L

- Vertical-adjustable lumbar mechanism; add \$59
- C**Select tilt tension.

NT

- No Tilt Tension

TT

- Tilt Tension; add \$49
- D**Select frame color.

BL

- Black

WH

- White

WG

- Warm Grey; add \$84
- E**Select caster option.

C

- Dual surface casters, black (standard)

BC

- Dual surface casters, black/white; add \$19
- F**Select upholstery grade/color.
