Information	4
Civara™ Task Chairs and Stools	
Technical Specifications	5
Product Color Options	8
Upholstered Back Task Chair	8
Upholstered Back Task Stool	10
Mesh Back Task Chair	12
Mesh Back Task Stool	14

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

TECHNICAL SPECIFICATIONS

Synchro Tilt Mechanism

Mechanism is constructed of stamped steel. The backrest tension knob has four distinct adjustment positions; from upright to full recline. A seat slide lever provides for 2³/₄" of seat front to-backrest travel, from 15¹/₂" to 18¹/₄".

Cylinder

Heavy duty adjustable-height cylinders are offered in three heights and will always be black.

Low-Height Cylinder

The low-height cylinder has 3¹/₂" of travel, adjusting from 15³/₄" to 19¹/₄" seat height.

Standard-Height Cylinder

The standard-height cylinder has 5" of travel, adjusting from 17¹/₄" to 22" seat height.

Stool Cylinder

Stool cylinders adjust 9¹/₂" of travel, from 23¹/₄" to 31¹/₄" seat height.

Seat

Upholstered seat construction is polypropylene seat board with 2¹/₂" of high resiliency (HR) foam featuring a simple waterfall front edge. Foam passes CA TB-117-2013 standard. Seat width is 19". The seat shroud color matches the frame color choice.

Backrest

Reinforced plastic frame available in black, white or warm gray with mesh insert available in five colors. An upholstered option is available for added comfort and aesthetic choices, which uses a 3.7 lb high-density molded foam that passes CA TB-117-2013 standard. The rear of the upholstered backrest is a plastic shroud which is color matched to the frame. The backrest offers 2³/₄" of height adjustment, with twenty distinct audible click positions.

Bases

The chair and stool offer two options; a 5-Star nylon base or a 5-Star aluminum base.

Casters

Casters are 60 mm O.D., double-wheel high-impact nylon, and are designed for use on both commercial carpet and hard floor applications. Each standard caster is black only while the designer caster is black with a white diameter stripe.

Arms

Task chairs and stools are available armless or specified with arms. 4D arms are adjustable, by width, height, and each with a sliding and pivoting arm pad. Arm height is adjusted by a lever underneath the arm pad from 6" to 10¹/₂" above the seat. Arm pads each move side-to-side by 1¹/₄". The arm pad slides 2" forward and backward, and pivots at an available desired angle, 15 degrees inside and 15 degrees outside. Total movement 30 degrees. Arm pads are black only.

Headrest

The optional headrest has adjustment of 2.50". When the chair back is mesh, the headrest is also mesh. In the instance of an upholstered back, the headrest is upholstered. In both cases, the headrest surface material will match what is applied to the backrest.

Lumbar

Adjustable-height lumbar mechanism is included as standard. On mesh back chairs, the mechanism is pressed inward to apply pressure to the users back. On upholstered chairs, lift the lumbar support up or down to the proper height.

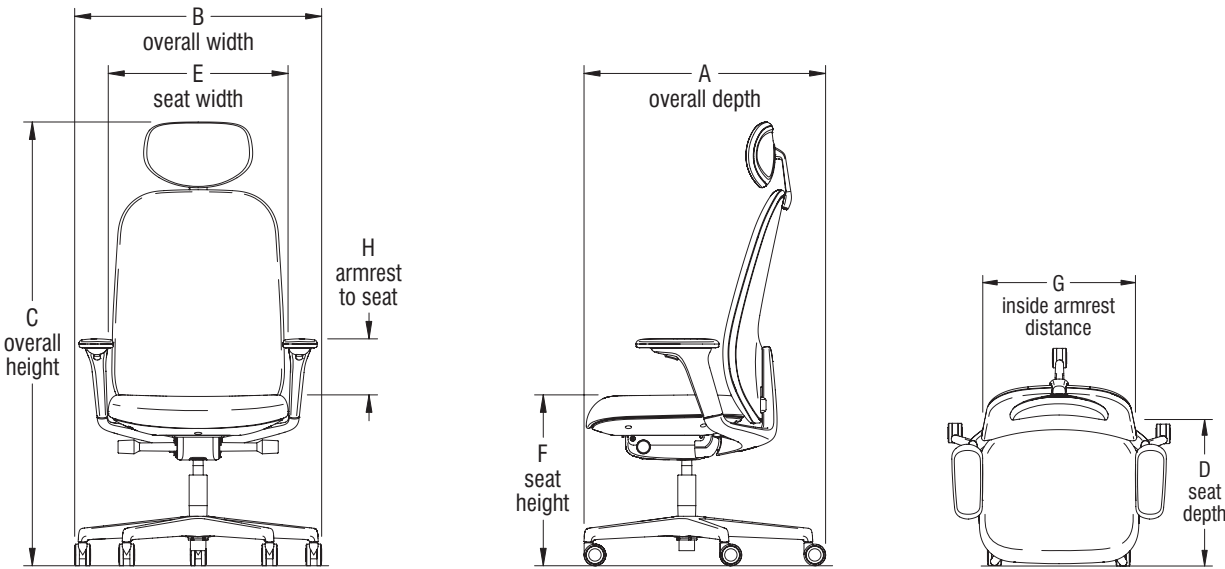

Foot Ring

Stools are equipped with an adjustable-height foot ring which features a twist-to-lock in place adjustment. Foot ring is 20" diameter tubular steel with four spokes. The color is always black.
