

Optional Added Finish Specifications

Designtex products have been designed with performance in mind. Our designers carefully consider the material's content makeup to provide certain characteristics. Before applying a protective topcoat, determine if it is truly required to meet your needs. Designtex advocates for limiting the use of additional chemistry when it is not strictly necessary.

UV2 Guardian Topcoat

A PFAS free polymer, matte coating that provides enhanced resistance to abrasion, staining, and chemicals. For use in high traffic environments where frequent cleaning and disinfecting is required. Adding UV2 coating makes wallcoverings cleanable with Bleach 10:1 solution and Isopropyl Alcohol 70%, in addition to all disinfectants listed in the original product specifications. Contains Antimicrobials and Flame Retardants.
