Recharge™

# Work Beyond the Desk

Recharge is designed with comfort at its core, offering soft, supportive seating for alternative workspaces. Built as a set of uniquely adaptable components, it seamlessly configures into a variety of solo, team, and community applications, complemented by thoughtful details that enhance worker choice, autonomy, and collaboration.

**1** Sectional sofas easily scale up or down in length.

**2** Four-person clusters provide solo seating options for common spaces.

**3** Opposite-facing lounges are space-efficient solutions for individual or group use.

**4** Sectional return sofas turn 90-degree corners.

**5** Solo privacy seats offer space to focus away from the desk.

**6** Privacy banquettes form concealed space for a small group.

**7** Space-dividing banquettes define zones with runs of seating.

**8** Crescent lounges create alternative meetings spaces.

**9** Private booths are familiar, café-like work settings.

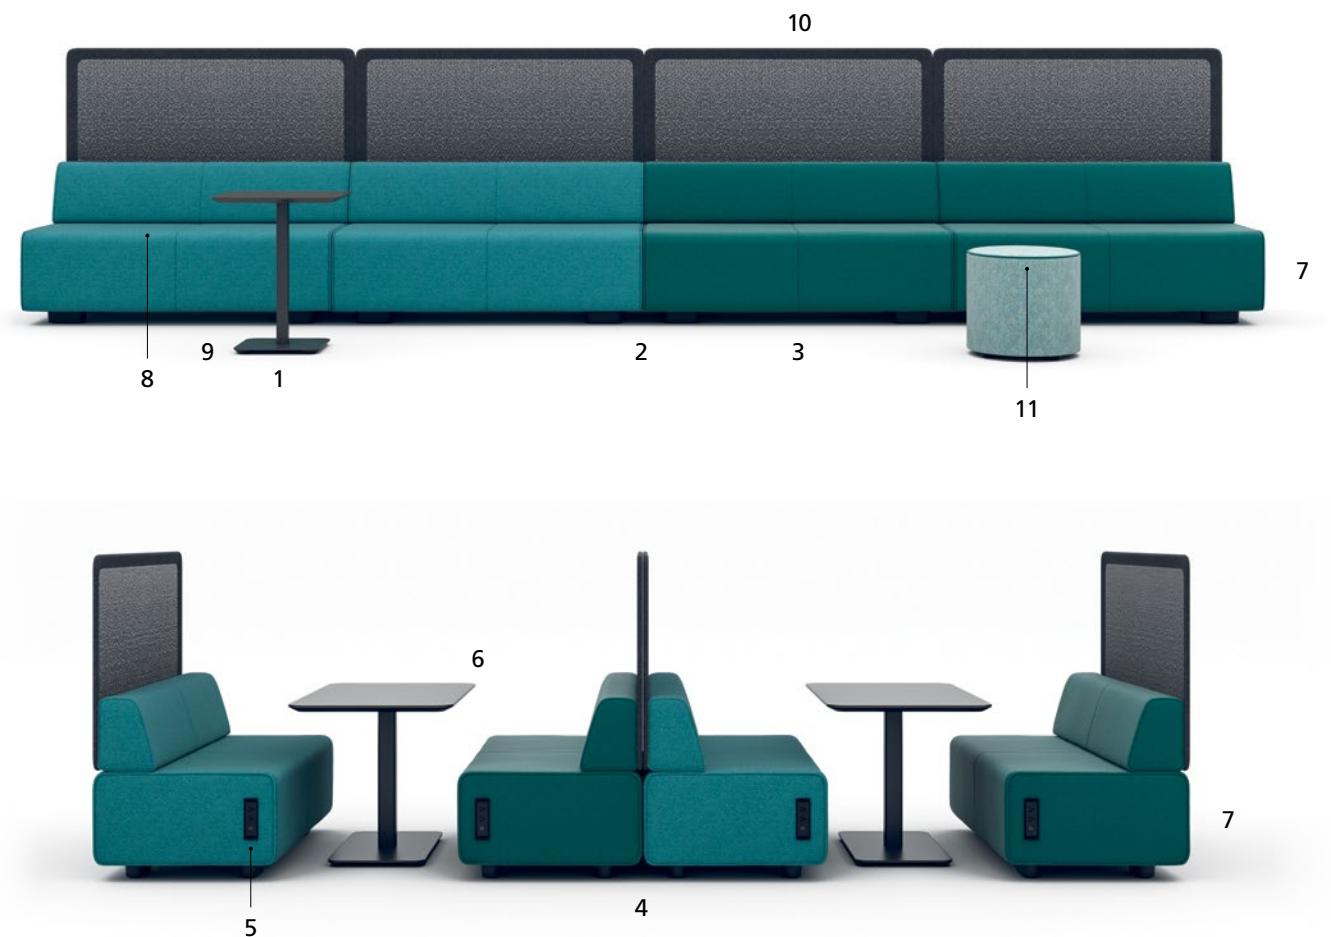

**10** Serpentine lounges facilitate spontaneous work beyond the desk.

**11** Branching lounges scale up for common-use seating in large spaces.

**12** Island creates a back-to-back retreat with open end-caps, allowing for an accessible common area.

Recharge can gracefully transition from a team space to unscheduled individual use while simultaneously supporting cross-functional gatherings throughout the day. With 60-degree and 90-degree connectors, Recharge has the versatility to create seating solutions across the floorplate.

#### Building Blocks

- 1** Mobility-enhancing glides allow easy repositioning without floor damage or physical strain.
- 2** Connector clips and modular power keep long runs of units tethered together and furniture looking uniform and tidy.
- 3** Open bases create space between the lounge and floor for easy placement and installation of electrical wiring for powered units.
- 4** Fixed module size, including screens and bolsters, ensures planning ease and prevents planning creep with no gaps or inch unaccounted for.

#### Application Breadth

- 5** Integrated power in seats and connector tables keeps devices charging and workers working.
- 6** Work tables sit at the perfect height for use with soft seating, and beveled table edges soften both the visual appearance and the physical touch.
- 7** Reconfigurability allows one application to transform into another as organization needs change.

#### Thoughtful Details

- 8** Soft lounge cushioning invites comfortable work away from the desk.
- 9** Weighted table bases ensure work with technology can be done confidently in tandem with the comfort of food or a beverage.
- 10** Open-knit screen signals occupancy and defends privacy with a soft, semitransparent fabric structure.
- 11** Upholstery options, like two-tone fabric and contrasting welt-cord trim, cater to creative, custom tailoring.
