Proper use and regular cleaning of your markerboard surface is essential for preventing permanent stains and/or ghosting typically associated with dry erase markers. By following the care and use instructions below, you will minimize the possibility of permanent stains and ghosting.

Initial Cleaning of Markerboards
Before First Use:

- Using a clean, dry cloth and a nonabrasive cleaner, gently clean the entire board to loosen any residue
- Using a dry cloth, wipe the entire surface to remove all dirt and residue from the prior step
- Rinse the entire board with clean water
- Using a dry cloth, wipe dry the entire surface

Daily Use, Care and Maintenance:

- *Use the proper markers.* All dry erase markers will write legibly on the marker board surface, but not all will erase properly due to their composition. Do not use low odor dry erase markers or permanent (indelible) markers. Use of these markers will lead to staining or ghosting, even with regular cleaning.
- *Clean the markerboard regularly.* It is recommended that markerboards be erased daily using an eraser designated for use with dry erase markers. If the markerboard is used daily, we recommend that a complete cleaning is performed at least 2-3 times a week using EXPO® whiteboard cleaner.

- *Remove ghosting.* Using EXPO® whiteboard cleaner and a paper towel, wipe the entire surface and let dry. Mix Joy® dishwashing detergent with warm water and apply to the board using a paper towel, then wipe dry with a clean cloth. Repeat as necessary.
- *Remove permanent marker.* Using a dry erase marker, write on top of the permanent marker, erase with a dry eraser, and then clean with EXPO® whiteboard cleaner.

Note: Do not use other painted tiles as markerboards or product damage will occur and the tile warranty will be voided.

The following Template planning guidelines are provided to ensure stability of Template storage product.

Different scenarios are:

- 1) Straight runs without attached worksurface
- 2) Straight runs with perpendicular panel attachment
- 3) Straight runs with attached worksurface
- 4) Straight runs with a Template return

1) Straight runs without attached worksurface:

- Template product 64" high and shorter without drawers do not require additional stabilizing
- Template product 64" high and shorter with drawers must have a counterweight kit which matches the size of the base installed under the bottom drawer OR be secured to a fixed wall OR be secured back-to-back to another Template unit.
- Template product 71" high and 78" high (with or without drawers) must be secured to a fixed wall or secured back-to-back back to another Template unit.

2) Straight runs with perpendicular panel attachment:

- Template product 64" high and shorter without drawers do not require additional stabilizing
- Template product 64" high and shorter with drawers must have a minimum of 39" (15" plus 24") long run of panel(s) attached to the Template unit using a Template panel attachment kit. Panels must be on the same side as the drawers.
- Template product 71" high and 78" high (with or without drawers) must have a minimum of 24" long run of panel(s) attached on both sides of the Template unit.

3) Straight runs with perpendicular worksurface(s):

- Template products 71" high and shorter without drawers or with one drawer do not require additional stabilizing.
- Template product 71" high and shorter with multiple drawer kits must have either: additional worksurfaces attached or a counter weight kit attached to the rear of the inverted base or secured to a fixed wall or secured back-to-back.
- Template product 78" high or taller must be secured to a fixed wall or secured back-to-back.

4) Straight runs with a Template return:

- With a 24" or wider return, Template product 78" high and shorter does not require additional stabilizing, up to a 288" (24ft) long run.

Tops for credenza or worksurface height units are available in 1 1/4" thick laminate or veneer only. Full top widths are computed by taking the nominal full width of single or connected units and subtracting 1" for each mid panel utilized. Example: 72"w unit comprises of two 36"w sections (one mid panel) would utilize a 71"w top. 72"w unit comprised of three 24"w sections (two mid panels) would utilize a 70"w top. Due to the large number of unit combinations possible, only the most common sizes are available as standard product.

Example:	Specify a paint color for the metal portion of the back which is visible from the inside of the unit and a fabric for the fabric insert on the back side.	Full backs cover sections from the base to the underside of a top. 22"h and 28"h full back kits are also utilized under worksurface shelves when there is either a reversal or pass-through above credenza or worksurface height. 15"w full backs are only available on units 57"h to 71"h.
		Fabric backs consist of two pieces; an inset metal back that is visible from the inside of the unit and a 1/2" thick fabric insert that mounts to the back side of the metal back. 71"h and 78"h backs are segmented due to their size. Pattern number includes two back sections; one bottom position back approximately 15"h to line up with the top of a bottom file drawer and one top position back to cover the remaining height.

Application Notes

Template depth worksurfaces are designed to mount perpendicular to worksurface shelves whose width matches that of the worksurface's depth.

Pedestal depth worksurfaces matches standard system worksurface depths (actual minus 1/2") and may mount to worksurface shelves whose width is at least 6" wider than the depth of the perpendicular worksurface.

Worksurface mounts to a perpendicular worksurface shelf with a flat bracket (ordered separately).

Worksurface will only mount to a perpendicular worksurface shelf.

Example:	Credenza spacer supports a worksurface mounted to a credenza height worksurface shelf or to the top of a credenza height unit.		Flat bracket supports worksurface to perpendicular worksurface shelf and must match the depth of the worksurface.			Worksurface reinforcement straps prevent bowing when no other support is utilized. Match unsupported width to width in pattern number to receive appropriate strap.

Wall Mounting of Knoll Products

Wall Mounting Suggestions

The following information is provided only as a guide, and represents minimum recommendations only. Knoll does not accept responsibility for the attachment of any Knoll product to a Customer's site wall. Wall specification/construction is the responsibility of the Customer and its structural engineer/architect. Failure to properly attach Knoll products to adequate wall structures can lead to property damage and/or personal injury.

You should consult your own structural engineers and/or architects and must not rely on the information provided herein.

It is the responsibility of the Customer and its structural engineers/architects to verify that the permanent structural walls (studs, blocks, solid masonry, etc.) on which the Knoll products are intended to be mounted are designed appropriately to support the product weight, PLUS 3 lbs. per linear inch for each useable shelf length

NOTE: A cabinet's top is considered a "useable shelf" and MUST be included in the calculation of the total load for an overhead cabinet.

It is the responsibility of the Customer and its structural engineer/architects to specify the fasteners and method for attaching the Knoll supplied wall mounting cleat, bracket, frame, etc. to the supporting wall and to confirm that the installers have adhered to these specifications. For all local building standards and codes, and additional requirements (including, but not limited to, seismic conditions) the Customer should always consult local code agencies.

KnollKey Lock Program

KnollKey Lock Program General Information

Following is the KnollKey lock policy, applicable to all products.

Knoll furniture can be ordered keyed-alike or random keyed. Key-alike and random keying instructions cannot be mixed on any single order. Only one of the two instructions can be used on an individual order. When an order is submitted with mixed (key-alike and random) instructions, Knoll will release the order as key-alike only and lock cores will have to be specified separately.

Key-alike

For the convenience of the user, furniture may be keyed alike at no charge. Write "Key-alike" in the description of your purchase order for any pedestal, overhead, file or other item you wish to have keyed alike.

Using the key-alike instructions, order cores and keys as line items on your purchase order. Do NOT submit a key-alike form. The Knoll East Greenville Lock Center will select key numbers from the standard range of K 001 - K 250. Key numbers will not be repeated unless over 250 sets are ordered. Lock cores keyed-alike will ship separately from the product, ready for field installation.

There is no charge for key-alike orders if placed with the furniture order.

IF THE KEY-ALIKE ORDER IS NOT PLACED AT LEAST TWO WEEKS PRIOR TO THE FURNITURE SHIP DATE, A \$50 HANDLING CHARGE AND AIR FREIGHT CHARGES WILL APPLY.

If product is ordered and shipped random-keyed, additional lock cores for key-alike are billable.

Random-Keying

To specify product keyed-random, write "key-random" in the product description. Random-keyed product is shipped with the lock core factory installed. A shrouded key is included. Random means no effort has been made to match key numbers, or to make them different.

Keys

A Knoll shrouded key is shipped with every lock core. 250 Key numbers are available. For numbers above 250, contact Custom Product Development. Additional keys and key blanks are available. See service parts for more information.

Master Keying

Knoll locks can be controlled by means of a master key. There is no additional per-lock charge for master keying. A letter of approval from the client must accompany orders for master keys.

Installing Lock Cores

Lock cores can be installed or removed in the field by using a change key. Cores must be in the unlocked position to be removed. See service parts for change key pattern number and pricing.

Lock Distribution

All orders for key-alike lock cores/keys are packaged and shipped from the East Greenville Lock Center, regardless of where the pedestals, overhead, or other units are produced. Random keyed product will have cores factory-installed.

How to Specify Key-Alike

Following is an example of how to specify key-alike for a cluster of 10 workstations.

Step 1 - Using the project floorplan, count the number of locks in each workstation.

Step 2 - Count the number of workstations with the same quantity of locks. Group together the workstations with a like number of locks.

5 workstations with 2 locks per station
3 workstations with 4 locks per station
2 workstations with 5 locks per station

Step 3 - For the first group (5 sets of 2 locks), enter the number of workstations in the quantity column.

Qty	Pattern #	Description	Unit List	Ext. List
5				

Step 4 - Then enter the pattern number "KSPEC_ _" and add a suffix for the number of locks for that group (i.e., for 2 locks per station, add the suffix "2"). Up to 30 lock cores are available in a set (i.e., KSPEC 30).

Qty	Pattern #	Description	Unit List	Ext. List
5	KSPEC 2	Set of 2 cores/keys	N / C	N / C

Step 5 - Repeat for other groups.

Qty	Pattern #	Description	Unit List	Ext. List
5	KSPEC 2	Set of 2 cores/keys	N / C	N / C
3	KSPEC 4	Set of 4 cores/keys	N / C	N / C
2	KSPEC 5	Set of 5 cores/keys	N / C	N / C

Your Key instructions are complete.

Knoll will select key numbers for each set from 250 available numbers. Additional key numbers are available through Custom Product Development. **For additions to existing installations, specify desired key numbers in the description.**
