

Earth Stool Backrest, H 74 cm

Coffee shell waste mixed
with post-consumer e-waste

The Earth Stool Backrest is made with a frame of 20% recycled steel and a seat in Matek® and designed by architect Eva Harlou. Innovative technology allows us to recycle fibre-based waste materials with recycled plastic waste in the Matek® material. The Earth Stool comes with a seat in two variants of Matek®, either Coffee Waste Dark or the lighter version Coffee Waste Light. With its slim design and light weight, the stool is equally suitable for private and public use.

Mater Sustainability Factsheet

Matek™

Matek®

In alliance with large corporations, Mater explores new technology that recycles industrial fibre and plastic waste. This results in five new unique patented materials under the name Matek®.

Read more about Matek [here](#)

Steel

Our Steel is composed of 20% recycled steel. Steel is a strong and light material with the quality that it can be processed in unlimited ways.

CO₂ Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.

Mater Take-Back

We unhesitatingly offer to take all our furniture made from Matek® back at the end of its life to recycle it into new furniture.
