

# Eternity Sidechair

Coffee shell or wood waste mixed with post-consumer e-waste

The Shell of the Eternity Chair is made of Matek®, our patented waste material. Innovative technology allows us to recycle fibre-based waste materials with recycled plastic. Depending on the colourway the waste used for the Matek blend comes from post-consumer e-waste mixed with either wood or coffee waste. The chair itself is a very comfortable chair with industrial and sculptural features and is suitable for both private and public use.

## Matek™

### Matek®

In alliance with large corporations, Mater explores new technology that recycles industrial fibre and plastic waste. This results in five new unique patented materials under the name Matek®.

Read more about Matek [here](#)

### Steel

Our Steel is composed of 20% recycled steel. Steel is a strong and light material with the quality that it can be processed in unlimited ways.

### CO<sub>2</sub> Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.

### Mater Take-Back

We unhesitatingly offer to take all our furniture made from Matek® back at the end of its life to recycle it into new furniture.
