NOTES
¹ This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching. ² Showers: Product must be installed in accordance with current TCNA Handbook stone methods. The NSI recommends installing resin-backed stone with epoxy-based setting materials or combination of primer + cement mortar. Consult your setting materials manufacturer for specific recommendations. Minor vein washout is possible in wet installations. ³ Please see NSI DSDM guidelines for all installation instructions.
