

VENEZIA TERRAZZO

Made in Italy, Venezia Terrazzo follows the traditions first developed in Venice of mixing stone chips encased in cement. By its very nature, terrazzo is a recycled product. The combination of beauty, durability, low maintenance, timeless patterns and vast color offerings has lead to a renaissance in use of terrazzo in commercial applications over the past decade. Terrazzo has long been valued for its life cycle characteristics, and can also contribute to the U.S. Green Building Council's (USGBC) credits for new construction.
