Americana

Natural Partners

Collaboration is always a driving force for Landscape Forms, and when we work with partners who so distinctly share and support our mission, something special happens. In Loll Designs we have found a kindred spirit, a unique collaborator who enables us to further our pursuit of enhancing outdoor experiences through design-led and sustainability-focused solutions.

An Icon of Outdoor Living

The Adirondack chair is a timeless expression of outdoor enjoyment, and the Americana is a reimagining of the concept – modernizing the classic design language, and using high-performance materials to make a bold visual statement while ensuring the chairs stand the test of time in public spaces.

Offered in both single and double lounges, Americana's form factor is wider and taller than traditional Adirondack chairs to enhance comfort, offer a greater range of seating positions, and aid ingress and egress. Generously sized to ensure comfortable spacing between sitters, the Americana double lounge leans into this casual demeanor, bringing a new spirit of togetherness to an established icon of good times outdoors. Both Americana lounges utilize UV-resistant post-consumer recycled high density polyethylene (HDPE) for the seat and back, providing a long, vibrant, and low-maintenance life. The rust-proof commercial grade cast and extruded aluminum supports and understructure are finished with Landscape Forms' proprietary powdercoating to resist fading and chipping.

Accessories for Americana lounges include a hanger underneath the arm for secure bag or purse storage and an optional tablet arm, providing a wider surface for food and beverages or to serve as a functional work surface.

Green for Good

The sustainable nature of Americana is not just limited to the furnishing's long and low-maintenance lifespan. All HDPE components are constructed from post-consumer recycled plastic, saving thousands of single-use plastics—predominantly milk jugs—from otherwise ending up in landfills. All metal components are finished with Landscape Forms' proprietary Pangard II® powdercoat which is completely free of lead, hazardous air pollutants and volatile organic compounds. Americana is manufactured with nearly zero waste, and, at the end of its useful lifespans, it can be recycled once again.
