

Sculpture by Day.
Beacon of Light at Night.
Cozy Warmth any Time.
The Obelisk
Patio Heater + Torch

The 25.5" square footprint evolves into a dramatic 7.25 ft. tall tapered, sleek stainless steel obelisk-like tower.

Above the enclosed gas tank housing dances an up to 4 ft high adjustable flame, which is contained within a clear **Japan-made specialty Quartz-Glass tube**, thus protecting the flame from being blown out by wind or weather. A shiny stainless steel cage surrounds the hot glass tube for extra protection.

The Obelisk patio heater's thoughtful professional construction allows for **easy mobility** by utilizing a set of **detachable wheels**, with extra safety provided by an extremely low center of gravity.

Indoor Kitchens?

WIND-PROOF DESIGN

In ancient Egypt an Obelisk stood for rays of light, symbolizing the sun god Ra. Set in pairs at entrances, they guarded the building and the people against evil influences.

Innovative engineering combines both factors - **WARMTH + LIGHT** - into the elegant, obelisk-shaped tapered outdoor heater, thus providing a unique **360-degree** experience for homeowners and commercial entities alike.

Contrary to the traditional "mushroom" design, **WARMTH + LIGHT radiates out**

horizontally along the complete length of the glass tube, making the "hot head - cold tush" experience a thing of the past.

Family and guests feel **snugly warm and comfortable**, while softly **dancing light rays** delightfully **illuminate the patio**, roof top terrace, deck, garden, al fresco restaurant, sidewalk café or open air bar.

The Obelisk extends precious Outdoor Time well into chilly evenings. **It brightens** the cooler, darker days of the year at the same time, without setting up extra light sources.

- ▶ Size:
H 86-5/8" | 7.25 ft. tall (220 cm)
Base: 25-1/2" x 25-1/2"
(65 cm x 65 cm)
- ▶ Fuel:
Liquid Propane (LP)
20 lbs standard tank (not incl.)
or Natural Gas (NG - optional)
- ▶ Heat Output:
32,500 BTU/h (9.3 kWh) on high
- ▶ Efficiency:
20 lbs. tank lasts 8 to 20 hours
depending on flame setting)
Propane 1.76 lbs/h (0.8 kg/h)
NG input 30 ft³/h (.82m³/h)
- ▶ Heat Range:
up to 385 sq/ft. Ø ~19.6 ft. (6 m)
- ▶ Electronic Spark Ignition
- ▶ 2-step adjustable Flame
- ▶ Shut-off Tilt Valve
- ▶ Includes:
Wheel Kit + Full Length
Poly Zipper Cover
- ▶ Components:
- Stainless Steel Panels, type 201
Commercial quality, clear varnish
- Sturdy Aluminum Frame + Reflector
- Japan-made specialty
Quartz-Glass tube for safety
- LP or NG Gas Burner unit
- LP Regulator unit
- ▶ CE | Intertek ETL listed #4000335
- ▶ Residential | Commercial
- ▶ 1 year manufacturer's warranty
- Net weight: 57.3 lbs (26 kg)
Shipping weight: 68 lbs (30.5 kg)
Shipping dimensions:
55" x 31" x 8" (140 x 79 x 20 cm)
Ships knock-down, requires assembly.
