

On average, Americans sit almost 10 hours each day.³

In our research¹ on the changing workplace, we learned that amenities and space are extremely important to employees. Many facilities anticipate a rise in expectations to offer spaces that support whole body wellness, specifically mental health. The simple act of adding a sit-to-stand desk to the workplace allows individuals to show up their best, inside and outside of work.

Every(body) deserves to feel their best during the work day. As the saying goes “The best position is your next position.” – Moving throughout the day, simply by changing positions from sitting to standing, enables employees to be healthier, experience less discomfort, and enjoy better concentration and reduced stress, but, most importantly, changes in posture allow employees to leave the work day with enough energy to enjoy time outside of work with family and friends, pursue a hobby, and continue to stay active.

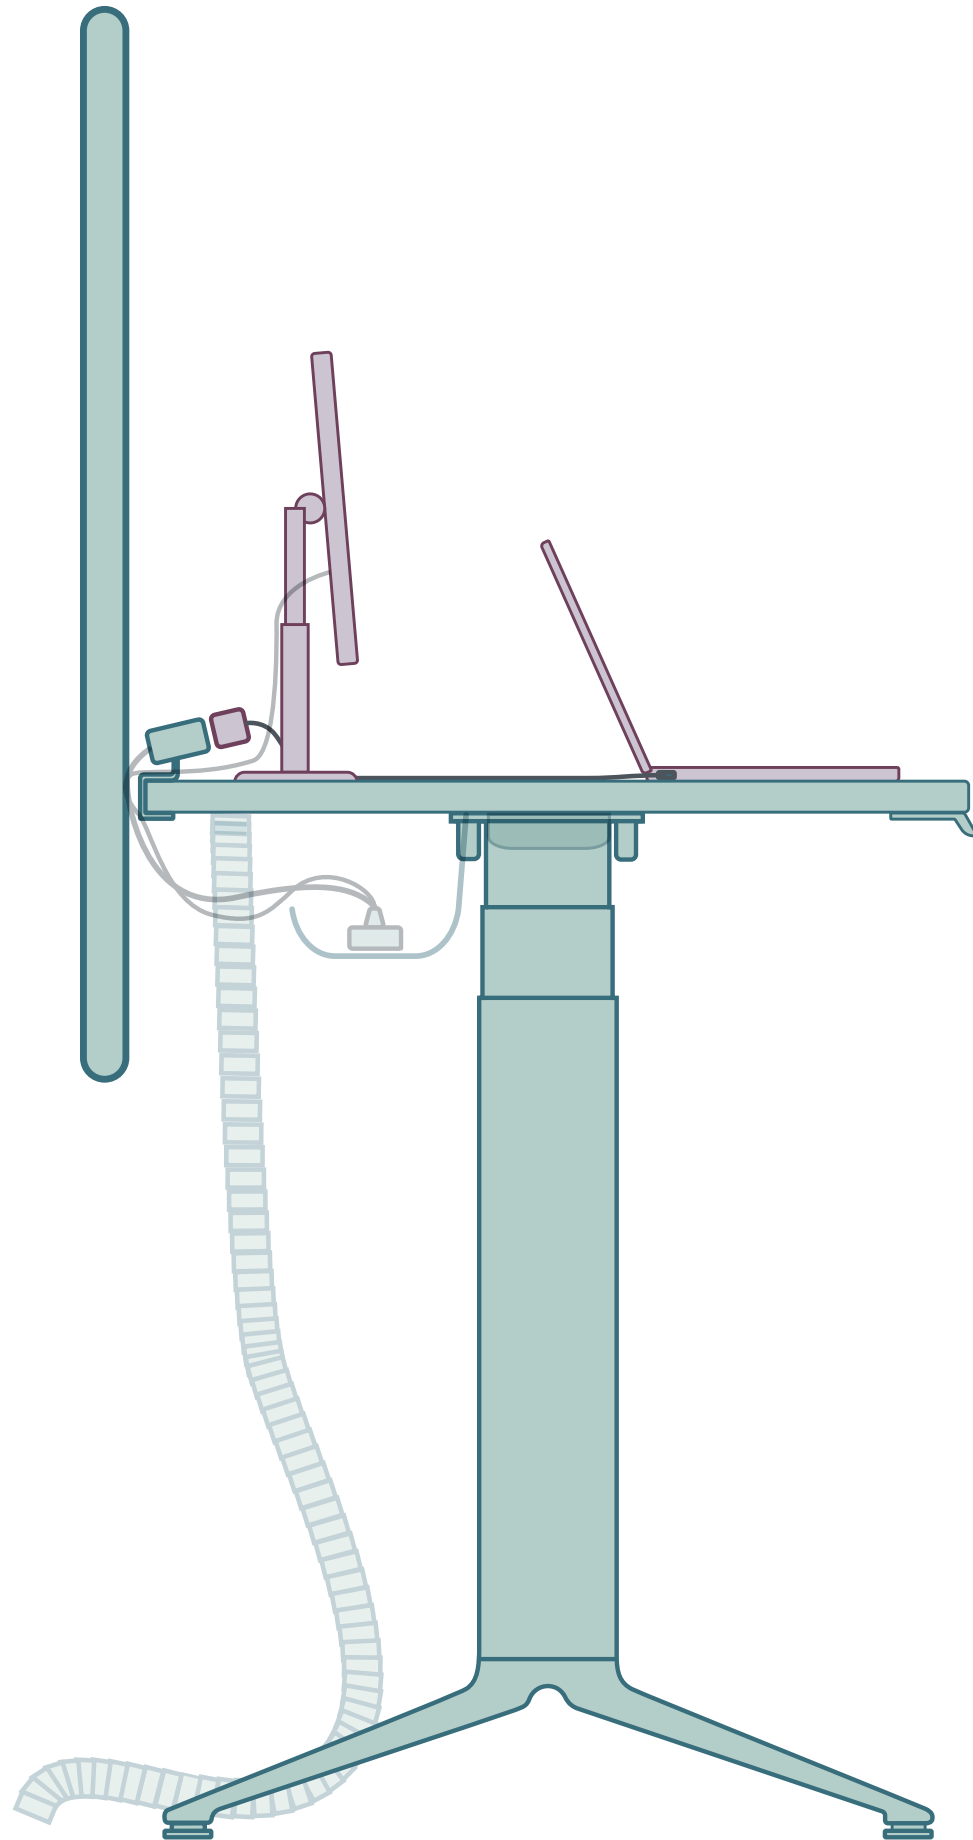

We offer a wide range of sit-to-stand options for home and office spaces so individuals can find what suits their body, budget, and style. Empower employees to improve their overall quality of life. Every(body) is different. It’s important to find the right fit.

Employees want to be able to customize their workdays, so employers need to provide a range of settings to work in while in the office. Employees need options that accommodate a variety of postures, uses, sizes, and technology needs.²

Privacy + Power

Kimball International's variety of height adjustable tables allows you to easily outfit open plan, private office, or home office spaces. Our portfolio includes solutions with a variety of control device options, base color choices, height ranges, and power solutions. This style versatility paired with our ease of specification means you can easily choose the right solution to fit your specific style and ergonomic needs.

Privacy Screen

Multiple materials are available to specify as privacy screens to increase spatial separation and provide spaces to pin important documents or add personal touches.

Electrical Capabilities

Desktop power grommets further expand power, data, and technology management options. With power and data options within arm's reach, our tables facilitate a hub of activity within individual work zones.

Cable Management Options

Numerous wire management options are available to conceal wires, cords, power in-feeds, or data cables. These either attach to the underside of the worksurface or run down the exterior of the table leg and are an easy solution to contain cords.

Modesty Panels

Our modesty panel options provide the right amount of privacy for the user. These panels are designed to fit snugly under the worksurface and conceal power, data, or wire managers that are secured underneath.

Caster Options

For select models, optional casters with a brake lever can be specified to provide the added benefit of mobility in your space.

Note: For additional details, reference the height adjustable matrix and series price lists
