THE PERFECT FIT

Xsite allows limitless opportunities to design spaces that maximize user experience. With different shapes, tile options, and material choices, Xsite is not traditional in nature but rather a solution that meets the requirements of today's modern workspace.

CONFIGURABLE BEYOND COMPARE

A wide range of material options, combined with different style choices make Xsite extremely broad and flexible. Tiles can be placed independent of the frame and are available in tackable, acoustic, and slat for an attractive and functional addition to the workspace.

THOUGHT STARTERS

Customization is Key

Xsite gives you design options. Put tiles anywhere. Create space in more shapes. Customize storage systems. Place components wherever they're most useful. Xsite removes boundaries.

Power and Light

Xsite is engineered so you can distribute technology easily, virtually anywhere within the frame. An ample base wireway harness, mid-level distribution, and technology tiles make connections simple.

Design and Function

Utilizing our integrated design strategy, Footprint delivers a unified portfolio of worksurfaces, support elements, storage units, and mobile pieces to create workspaces with more possibilities and personality. When paired with Xsite, they expand design and function.

Cohesive and Consistent

With its inherent versatility, Xsite combined with Footprint allows you to move fluidly across a broad spectrum of workspace solutions with a wide offering of options, materials, and finishes, which ensures aesthetic cohesiveness.

GET TO KNOW XSITE

Xsite is a system that eliminates limitations and allows design to emerge freely. Now ideas don't have to be confined to a cube.

With multiple tile and frame height options, combined with metal, painted, laminate, and fabric tiles in bold or muted colors, Xsite offers flexibility and customizable features that support reconfigurability.

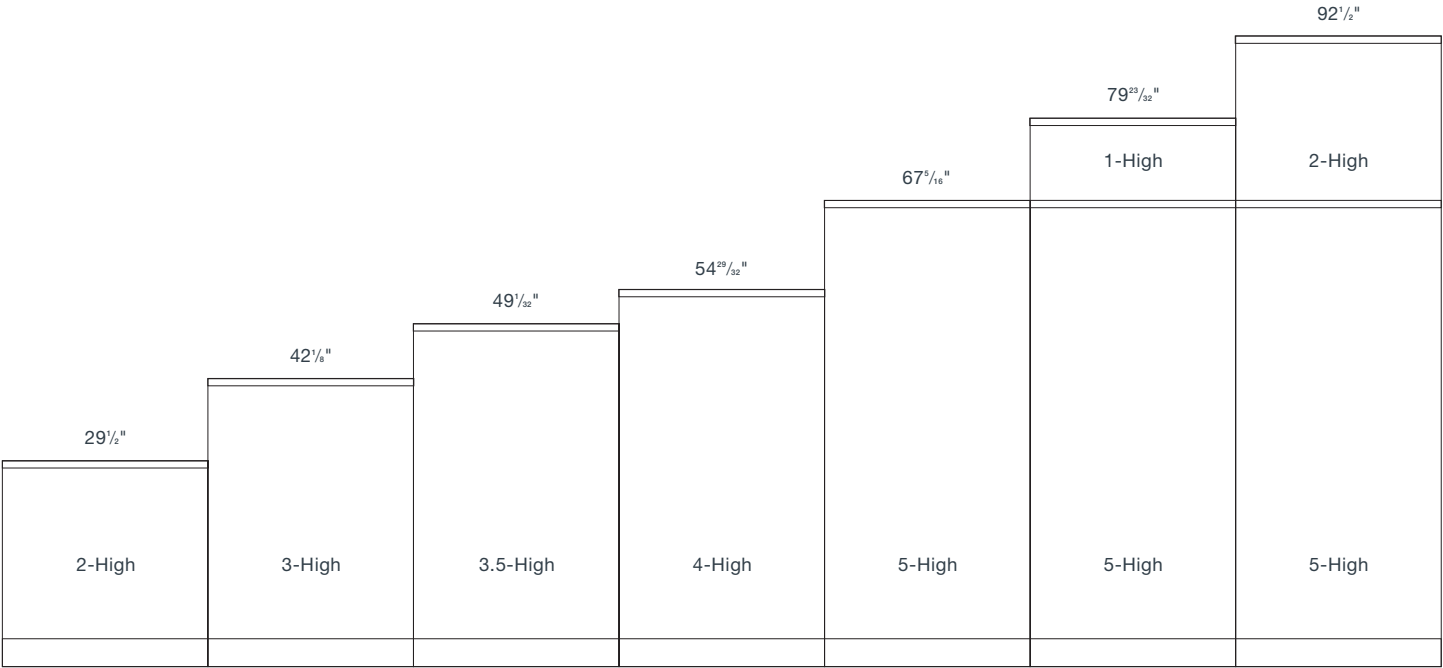

1 Panel-to-Panel Hi-Lo Trim: A Clean Finish Where Panels Change Heights	**5** Support Leg	**10** Footprint® Panel Mount Overhead with Sliding Door	**13** Technology Tile: Provides Power and Data Access	**16** Base Wireway Harness: Distributes Power Through Frame Base	**19** Top Channel Lay-In: Routes Data Cables	**22** Wood Tile
