Yardage	Grade	List Price Per Yard
1	C	\$ 49
1	D	\$ 64
1	E	\$ 78
1	F	\$ 100
1	G	\$ 122
1	H	\$ 144
1	I	\$ 178
1	J	\$ 222
1	K	\$ 289
1	L	\$ 333
1	M	\$ 422

To calculate the fabric option price, multiply the model's total yardage by the fabric grade's list price per yard. Add this fabric option price to the base model price to determine the total price. Fabric yardage can be found on the model pricing page.

Customer's Own Material ■

Specifications Form

January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54" wide. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7"	8"-13"	14"-21"	22"-27"	28"-33"	34"-40"	41"-48"
	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10" vertical with 14" horizontal would be $14+5=19$.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M.

Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

Lounge Chairs

Seat & Backrest Shell Construction

All seat and backrest structures are constructed of a 1/2" thick formed, then CNC-cut continuous curved hardwood plywood. Plywood underside includes threaded inserts for installation of lounge chair bases as specified.

Upholstered Seat & Backrest

Seat top and backrest front foam thickness is 1 1/2". Seat back and seat underside foam thickness is 1/4". All foam is glued to the continuous curved plywood structure, then upholstered using heat-activated glue. Upholstered Cascha lounge chairs are sewn with double needle top stitch, when no welting is present. Units may be specified with contrasting or non-contrasting upholstery choices. Specific models include decorative welting defining the seam between the top and front user surfaces around the perimeter. See Product Color Options page in the Cascha Pricelist for upholstery options offered.

Lounge Chair Frames

Sled Base

Made from 16 mm diameter, 1.5 mm thick steel tubing, formed and welded. Frames are finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. Bases come equipped with fixed nylon saddle glides, attached underneath with a zinc plated screw (silver appearance). Frame attaches into threaded inserts under the upholstered chair using two M6 x 35mm and two M6 x 18mm screws and into threaded inserts on the back of the upholstered chair using two M6 x 18mm screws. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified.

Wood 4-Leg Base

Four legs are milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Two steel supports join the wood leg assemblies using eight M6 x 18 black oxide screws. The metal support secures to the underside of the lounge using four M6 x 18 black oxide screws. Steel support is powder-coat painted Black. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Metal Swivel Base

Four-spoke base is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat Black paint, or specified as polished aluminum. Base comes with either casters or glides. Available caster option is 50 mm O.D. double-wheel nylon. Optional push-in nylon glides are available with either felt or nylon pads adhered underneath. A steel support cylinder atop the four-spoke base which swivels 360-degrees is finished with baked-on electrostatically applied powder-coat Black paint or may be specified as duplex nickel-chrome plated. Lounge is supported by a contoured top plate, of molded high-strength black plastic. Top plate attaches to threaded inserts in the underside of the lounge using four M6 x 30mm black oxide screws and external tooth lock washers.

Lounge Chair Frames (cont.)

Wood Swivel Base

Four pyramidal base legs are each milled out of solid Ash. Reinforced with a steel post. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Each leg inserts into a leg support knuckle and is secured underneath with a #10 x 3/4" Phillips flat head screw. Leg support knuckle is constructed of steel, finished with baked-on electrostatically applied powder-coat Black paint. Fixed in the knuckle is a nylon bushing with a zinc-plated steel post, which swivels 360-degrees. Lounge is supported by a contoured top plate, of molded high-strength black plastic. Top plate attaches to threaded inserts in the underside of the lounge using four M6 x 30mm black oxide screws and external tooth lock washers. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Rocking Base

Base is constructed of steel and wood. Upper base frame is made from 22 mm diameter, 2 mm thick steel tubing, formed and welded. Frame is finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. Attached to the frame using four M6 x 35mm zinc plated screws (silver appearance) is a pair of wood rockers made of solid Ash. Rockers are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Upper base frame attaches into threaded inserts under the lounge using four M6 x 18mm screws. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified.

Ottomans

Ottoman Shell Construction

Ottoman structures are constructed of a 1/2" thick formed, then CNC-cut continuous curved hardwood plywood. Plywood underside includes threaded inserts for installation of ottoman bases as specified.

Upholstery

Ottoman top foam thickness is 1" and underside foam thickness is 1/4". All foam is glued to the continuous curved plywood structure, then upholstered using heat-activated glue. Upholstered Cascha ottomans are sewn with double needle top stitch, when no welting is present. Units may be specified with contrasting or non-contrasting upholstery choices. Specific models include decorative welting defining the seam between the top and front user surfaces around the perimeter. See Product Color Options page in the Cascha Pricelist for upholstery options offered.

Ottoman Frames

Wood Swivel Base

Four pyramidal base legs are each milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Each leg inserts into a leg support knuckle and is secured underneath with a #10 x 3/4" Phillips flat head screw. Leg support knuckle is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat Black paint, or specified as polished aluminum. Fixed in the knuckle is a nylon bushing with a zinc-plated steel post, which swivels 360-degrees. Ottoman is supported by a contoured top plate, of molded high-strength black plastic. Top plate attaches to threaded inserts in the underside using four M6 x 30mm black oxide screws and external tooth lock washers. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Ottomans (cont.)

Ottoman Frames (cont.)

Metal Swivel Base

Four-spoke base is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat Black paint, or specified as polished aluminum. Push-in nylon glides are available with either felt or nylon pads adhered underneath. A steel support cylinder atop the four-spoke base which swivels 360-degrees is finished with baked-on electrostatically applied powder-coat Black paint or may be specified as duplex nickel-chrome plated. Ottoman is supported by a contoured top plate, of molded high-strength black plastic. Top plate attaches to threaded inserts in the underside of the lounge using four M6 x 30mm black oxide screws and external tooth lock washers.

Guest Chairs

Seat & Backrest Shell Construction

All seat and backrest structures are constructed of a 1/2" thick formed, then CNC-cut continuous curved hardwood plywood. Plywood underside includes threaded inserts for installation of chair bases as specified.

Upholstered Seat, Backrest & Arms

Seat top and backrest front foam thickness is 1". Seat underside and seat back foam thickness is 1/4". Arms inside and outside foam thickness 1/2". All foam is glued to the continuous curved plywood structure, then upholstered using heat-activated glue. Upholstered Cascha guest chairs are sewn with double needle top stitch, when no welting is present. Units may be specified with contrasting or non-contrasting upholstery choices. Specific models include decorative welting defining the seam between the top and front user surfaces around the perimeter. See Product Color Options page in the Cascha Pricelist for upholstery options offered. Guest chairs are available with arms or without arms.

Guest Chair Frames

Metal 4-Leg Base

Legs are made from 18 mm diameter, 1.5 mm thick steel tubing, formed and welded. Bases are finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. See Product Color Options in the Cascha Furniture Pricelist. Bases come equipped with plastic press-in glides with either nylon or felt adhered to the bottom. Upper x-frame structure secures to threaded inserts in the underside of the chair using eight M6 x 18mm screws. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified.

Wood 4-Leg Base

Four legs are milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. A formed and welded steel 14 mm diameter rod x-frame support joins at the four leg tops, securing with one #4 x 5/8" screw each. X-frame support is baked-on electrostatically applied powder-coat painted in Black and attaches to the chair underside using eight M6 x 18mm black oxide screws. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Guest Chairs (cont.)

Guest Chair Frames (cont.)

Metal Swivel Base

Four-spoke base is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat Black paint, or specified as polished aluminum. Base comes with either casters or glides. Available caster option is 50 mm O.D. double-wheel nylon. Optional push-in nylon glides are available with either felt or nylon pads adhered underneath. A steel support cylinder atop the four-spoke base which swivels 360-degrees is finished with baked-on electrostatically applied powder-coat Black paint or may be specified as duplex nickel-chrome plated. Adjustable-Height chair is supported by a contoured top plate, of molded high-strength black plastic which contains a height-adjust lever. Lever is only available duplex nickel-chrome plated. Press-fit in the support cylinder below and the top plate above is an adjustable-height class-4 gas cylinder. Top plate attaches to threaded inserts in the underside of the lounge using four M6 x 30mm Phillips black oxide screws and black oxide external tooth lock washers.

Wood Swivel Base

Four pyramidal base legs are each milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Each leg inserts into a leg support knuckle and are secured underneath with a #10 x 3/4" Phillips flat head screw. Leg support knuckle is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat Black paint, or specified as polished aluminum. Fixed in the knuckle is a nylon bushing with a zinc-plated steel post, which swivels 360-degrees. Chair is supported by a contoured top plate, of molded high-strength black plastic. Top plate attaches to threaded inserts in the underside using four M6 x 30mm black oxide screws and external tooth lock washers. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Stools

Seat & Backrest Shell Construction

All seat and backrest structures are constructed of a 1/2" thick formed, then CNC-cut continuous curved hardwood plywood. Plywood underside includes threaded inserts for installation of Stool bases as specified.

Upholstered Seat & Backrest & Arms

Seat top and backrest front foam thickness is 1". Seat underside and seat back foam thickness is 1/4". Arms inside and outside foam thickness 1/2". All foam is glued to the continuous curved plywood structure, then upholstered using heat-activated glue. Upholstered Cascha stools are sewn with double needle top stitch, when no welting is present. Units may be specified with contrasting or non-contrasting upholstery choices. Specific models include decorative welting defining the seam between the top and front user surfaces around the perimeter. See Product Color Options page in the Cascha Pricelist for upholstery options offered. Stools are available with or without arms.

Stool Frames

Metal 4-Leg Frame

Fixed frame heights are available for 24" and 30" high stools. Legs are made from 16 mm diameter, 1.5 mm thick steel tubing. Formed and welded is an upper solid 12 mm diameter rod x-frame structure. Stool frames also include a formed 11 mm diameter solid rod welded-on foot ring. Bases are finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. See Product Color Options in the Cascha Furniture Pricelist. Bases come equipped with plastic press-in glides with either nylon or felt adhered to the bottom. Upper x-frame solid 12 mm diameter rod structure secures to threaded inserts in the underside of the chair using eight M6 x 18mm screws. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified.

Stools (cont.)

Stool Frames (cont.)

Wood 4-Leg Frame

Fixed frame heights are available for 24" and 30" high stools. Legs are milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. A formed and welded steel 12 mm diameter rod x-frame support joins at the four leg tops, securing with one #4 x 5/8" screw each. X-frame support is baked-on electrostatically applied powder-coat painted in Black and attaches to the chair underside using eight M6 x 18mm black oxide screws. Stool frames also include a formed 11 mm diameter solid rod foot ring. Foot ring is finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. Foot ring attaches to threaded inserts in the legs using four M6 x 22mm screws. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.

Metal Swivel Pedestal Base

At the bottom of the base is a steel disk with dimensions of 450 mm diameter by 7 mm thick. The base bottom contains six nylon threaded glides allowing for minimal adjustability on un-level floors. Atop the base is a 50 mm diameter, 1.5 mm thick steel lower support post, secured from under the base by three M8 x 35mm flat Allen head screws. Lower support post holds an internally, press-fit adjustable-height class-4 gas lift cylinder with an adjustment range of 260 mm. Concealing the height-adjust cylinder and raising or lowering over of the lower support post is the upper seat support post with seat support. Support post consists of a steel cylinder of 60 mm diameter, 1.5 mm thick, 385 mm length. Includes a welded-on footrest of 25 mm diameter, 2 mm thick, 310 mm length. Welded to the top of the support post is the seat support which the top of the gas cylinder mates into. Integrated into the seat support is a height-adjust lever which activates the gas cylinder below. All steel base parts are finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as duplex nickel-chrome plated. Upper seat support attaches to the stool underside using four M6 x 30 screws and external tooth lock washers. Screws are black oxide when powder-coat paint is specified on the frame, and zinc plated (silver appearance) when any other finish is specified.

Tables

Assembled table heights are: 16", 20", 29", 36" and 42". Tabletops and bases are ordered separately.

Tabletops

Tabletops all are 24" diameter, constructed of 3/4" thick high-density particleboard core, with high-pressure laminate top, and phenolic backing sheet. Total thickness of top is 7/8". Tabletops are available with 2 mm (73P) edge, or knife (KN3) edge.

Wood 4-Leg Base

Four pyramidal base legs are each milled out of solid Ash. Legs are stained in select KI colors to customer specification then clear coated. See Product Color Options in the Cascha Furniture Pricelist. Each leg inserts into a leg support knuckle and is secured underneath with a #10 x 3/4" Phillips flat head screw. Leg support knuckle is constructed of die-cast aluminum, finished with baked-on electrostatically applied powder-coat paint in select KI colors to customer specification or may be specified as polished aluminum. Leg support knuckle top contains a 50 mm diameter, Ash wood post sized for 16", 20", 29", 36", or 42" table heights. Post attaches to the leg knuckle below using one M8 x 40mm nickel-plated screw and two #6 x 5/8" zinc plated (silver appearance) when knuckle is polished or powder-coat paint is specified on the frame, or two #6 x 5/8" black oxide screws when black finish is specified. Post attaches above to a black fixed steel top plate, 3 mm thick using one M8 x 35mm zinc plated screw (silver appearance) and two #6 x 5/8" black oxide wood screws on the side. Top plate attaches to the underside of the tabletop using four #10 x 3/4" black oxide screws. Base glide options available are none, felt or nylon. Glides each are attached using one #4 x 5/8" wood screw.
