How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

SPECIFICATIONS

Seat and Backrest

Seat is two-piece construction of molded plywood upholstery board with a molded compound curved nylon shroud with a textured finish. Seat is always upholstered. Foam (1-3/4") is applied to the molded plywood upholstery board. Fabric is then upholstered over the foam. Backrest is available in either a polypropylene or upholstered version. Backrest is molded compound curved polypropylene with a textured finish. Backrest has an integral, molded "handle."

Back upholstery liner is molded polypropylene with glued-on foam (1/2"). Fabric is upholstered over the foam. The liner is secured to the backrest by four #10 color-matched machine screws.

Seat flips up to allow chairs to nest for storage and transport.

Backrest Supports

Two welded steel backrest supports attach the backrest to the torsion mechanism.

Torsion® Mechanism

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Frame

The frame is made up of four legs welded to a steel mechanism tube. The legs are 1", 13-gauge steel tubing. Reinforcement plates are welded between front and back legs for added strength. Nylon covers fit over the plates.

Casters/Glides

Double wheels (60mm) of high-impact thermoplastic. High-impact plastic frame. Carpet and hard floor casters are always black. Bell glide (2" high) made of high-impact plastic also available, black only.

Leg Finishes

Baked-on electrostatically-applied epoxy powder coating or bright nickel-chrome plating.

Arms

Armrests are made of nylon and match the seat and back poly color. Armrests rotate with the back.

Tablet/Tablet Arm

The tablet is available in a plywood core (5/8" thick, 11-ply hardwood surfaced with .030" high-pressure laminate top and plain backer undersurface) or a black molded polyethylene. It is connected to the mechanism and supported by a 12-gauge steel plate. It has an effective working surface 12" deep by 22" across. The tablet arm is not field addable. The tablet arm is available in right-hand and left-hand versions. The tablet mechanism consists of aluminum die cast housings and through bolted pivots with bushings on two axis. The mechanism allows for horizontal rotation for ingress/egress without stowing the tablet. The mechanism stows the tablet so that the chair will nest with other Torsion® on the Go!® chairs with tablets and Torsion® on the Go!® chairs without tablet or arms.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

HOW TO ORDER

- Indicate the following information on order form:
1. Quantity of each item.
 2. Model number, including options. See “How To Build a Model Number”.
 3. Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select frame color.
Refer to the **Product Color Options** page in this price list.
The metal back support matches the frame color.
- C** Select seat and back color.
Refer to the **Product Color Options** page in this price list.
Armrest color will match seat/back poly color.
- | | |
|------------------------------|-----------------------------------|
| D Select base option. | |
| G | - Bell glides (black only) |
| C | - Carpet casters (black only) |
| S | - Hard floor casters (black only) |
- E** Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs either poly or upholstered is 3/4 yard of 54” wide nondirectional fabric. For orders of 11 of more chairs and for complete information on ordering C.O.M., see “Ordering Customer Ordered Material (C.O.M) Upholstery.” section.
