Yardage	Grade	List Price Per Yard
1	C	\$ 49
1	D	\$ 64
1	E	\$ 78
1	F	\$ 100
1	G	\$ 122
1	H	\$ 144
1	I	\$ 178
1	J	\$ 222
1	K	\$ 289
1	L	\$ 333
1	M	\$ 422

To calculate the fabric option price, multiply the model's total yardage by the fabric grade's list price per yard. Add this fabric option price to the base model price to determine the total price. Fabric yardage can be found on the model pricing page.

Specifications Form
January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied. RAILROADED FABRIC REQUIRES A PRODUCT MODIFICATION REQUEST DUE TO ADDITIONAL YARDAGE REQUIREMENTS

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54” wide. Fabrics less than 54” wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries). This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7” REPEAT	8”–13” REPEAT	14”-21” REPEAT	22”-27” REPEAT	28”-33” REPEAT	34”-40” REPEAT	41”-48” REPEAT
54”	0	20%	25%	30%	45%	55%	70%	80%
51”-53”	15%	25%	30%	35%	50%	60%	80%	90%
48”-50”	20%	30%	35%	40%	55%	65%	85%	95%
45”-47”	30%	45%	50%	55%	60%	80%	90%	100%
36”-44”	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10” vertical with 14” horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

Base Frames

Seat Base Frames Construction

Seat base frames are constructed of 18 mm laminated hardwood plywood, CNC-cut. All frame joints are nailed and glued in addition to the application of interlocking joinery at all stress points. Base frame surfaces have foam and upholstery applied.

Storage Unit Construction

Storage cubby sides, backs, and dividers are constructed using 3/4” thick particleboard core with a density of 45 lbs/cu ft, high-pressure laminate facing on visible surfaces, phenolic backing sheet on non-visible surfaces and 2 mm polypropylene (73P) edge banding. Storage cubby tops are constructed using 1 1/8” thick medium-density particleboard core, high-pressure laminate facing on visible surfaces, phenolic backing sheet on non-visible surfaces and 2 mm polypropylene (74P) edge banding. Panels are secured together using dowels, wood screws and glued joints.

Tote Storage Configurations

Tote storage is only available on 48” wide storage units. The totes are always located in the center cubby. Two preconfigured options are available: three totes at 3” high or one 3” and one 6” tote. The storage units come with the pullout slides pre-installed per the totes configuration specified. If no totes are ordered, no pullout slides are installed. Totes can be slid in and out freely with no stops. The totes and pullout slides are made from translucent polypropylene.

Removable & Replaceable Tops

All Clamber units have either upholstered tops or laminate tops, which are replaceable. With the exception of the wave-shaped tops (upholstered tops only), both options may be specified. These removable tops attach to the base frames with the use of compression dowels.

Upholstered Tops

Upholstery over foam covers a 12 mm laminated hardwood, CNC cut. The finished top is approximately 1 1/4” thick.

Laminate Tops

Tabletops are nominally 1 1/4” overall thickness with a .030” thick high-pressure laminate top surface and a .028” phenolic backer bottom surface. The density of the particleboard core for standard tops is 45 lb/cu ft. Laminate tops are available with 74P edge. Grade 1 laminates are offered for durability. See Product Color Options page in the Clamber Pricelist for color options offered.

Walls

Non-structural upholstered walls may be specified to attach to select Clamber two-tiered units. Walls are installed on-site to the rear of a unit with mounting hardware supplied with the wall. The frame of a straight wall is constructed of 12 mm laminated hardwood plywood. The frame of a curved wall is constructed of 18 mm laminated hardwood plywood. All frame joints are nailed and glued in addition to the application of interlocking joinery at all stress points. Frames are covered in foam and upholstered. Each finished upholstered wall is 3” thick, 45” high, and has adjustable glides at the base.

Wall with Worksurface Mount

Clamber wall with worksurface mount must be specified to accompany Clamber wall laminate worksurface, which is installed on-site, to the rear of the wall, 42” from the floor. Two steel brackets support the narrowest worksurface, and three brackets support the worksurface on wider walls. Each mounting bracket is powder-coat painted in Warm Grey only. Worksurfaces are ordered and shipped separately. Walls with worksurface mount ship with all hardware required for worksurface installation. Worksurfaces are 12” deep and width is determined by wall length. Worksurfaces are nominally 1 1/4” overall thickness with a .030” thick high-pressure laminate top surface and a .028” phenolic backer bottom surface. The density of the particleboard core for standard tops is 45 lb/cu ft. Laminate tops are available with 74P edge. Grades 1-3 laminates are offered on worksurfaces to enhance the specifications options. See Product Color Options page in the Clamber Pricelist for color options offered.

Wall Worksurface Leg Kit

Wall worksurface leg kits are available and ordered separately as desired. Leg kits can be specified to better accommodate the visually impaired, or based on customer preference. Each kit contains one post leg, one L-bracket and connection hardware. The L-bracket is an optional replacement for the standard cantilever bracket to maintain a clean aesthetic. L-bracket is available in Warm Grey only. See Product Color Options in the Clamber Tiered Seating pricelist for post-leg color options.

Foam

All Clamber units have foam on all four sides of bases and frames, under the fabric. Foam is 1/4” thick, rated at 2.5 lb density, 40 lb compression. The removable upholstered seat panel has 3/4” thick foam rated at 2.6 lb density, 80 lb compression.

Dimensional Tolerance

Due to variations in foam and upholstery in the manufacturing process, all units have a dimensional tolerance of up to + 1/4” (width & depth) when fitting together or into spaces. The tolerance is compounded as more units are added into a configuration. For example: two 48” units side-to-side should factor in a possible overall width of 96 1/2” (+ 1/4” per unit).

Sewing

All clamber units are sewn with double-needle stitching at all seams for lasting durability. Stitching is available in contrasting or coordinating color choices per the KI thread finish card.

Concealed Glides

Height-adjustable concealed glides are made of steel, with a 1” diameter white nylon bottom. Glide stem is 1/4-20 thread and is fitted with a 1/4” thick white nylon spacer at the top of the glide body. The glides give Clamber frames a minimum 3/4” clearance from the floor and allow for an additional 1/2” adjustment for uneven floors. A minimum of four or five glides are used on each unit, depending on the model.

Ganging Kits

Clamber is offered with optional (but recommended) ganging kits which are installed on-site and secure units together to achieve numerous module-inspired configurations. Ganging kits are optional and ordered separately, however fourteen specific tiered-seating ganging configurations require the use of gangers. When required, ganging kits will be provided. See Clamber Tiered Seating - Planning Guide (KI-PG-000046) for ganging requirements and recommendations.

Tiered Seating Ganging Kit

Tiered-seating ganging plates are made from 14-gauge cold-rolled steel and are powder-coat painted Black. Each ganging kit includes two plates and eight #10 x 1" Phillips flat head wood screws. Plates mount to the top of the base frame of two units to be joined and are concealed under the removable tops. See Clamber Tiered Seating - Planning Guide (KI-PG-000046) for ganging requirements and recommendations.

Tiered Seating Glide Ganging Kit

Tiered-seating glide ganging plates are made from 14-gauge cold-rolled steel and are powder-coat painted Black. Each ganging kit includes two plates. Plates mount to glide stems of two units to be joined and are installed on the front and rear at the sides.

Wall with Worksurface Ganging Kit

Wall with worksurface ganging plates are made from 11-gauge cold-rolled steel and are powder-coat painted Black. Each ganging kit includes one plate and four #12 x 3/4" Phillips pan head wood screws. Plates mount to the underside of the worksurface of two units to be joined. See Clamber Tiered Seating - Planning Guide (KI-PG-000046) for configurations and recommended ganging locations.

Power Modules

Axil Z® Power Module with 3-Prong Plug

Most of Clamber can be configured with optional Axil Z power modules with 3-prong plug. The USB/AC power module houses one AC simplex receptacle (rated at 15 amps/125 volts), one DC USB-A port, and one USB-C port (rated at 2.1-amps/5-volts) (2.0 & 3.0 compatible, no data). All circuitry is contained in an extruded aluminum housing and the entire electrical power module assembly is UL listed, having a UL spill test rating for protection against liquids. Modules come with a 10' power cord with a 3-prong grounded plug, specified 14AWG, 15-amp NEMA rated 3-conductor SJT. The 3-prong plug is oriented on a 90 degree angle off the power cord. The power cord is strain relief mounted to the rear of the housing. Module colors available are Warm Grey, Cool Grey, White, and Black in matte finishes. The cord is in black color only.

One-tier units are available with one Axil Z power module, while two-tiered units are available with up to two modules. See Clamber Tiered Seating - Planning Guide (KI-PG-000046) for configurable power locations.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See “How To Build a Model Number”.
- Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A

Select basic model.
- B

Select non-contrast or fabric contrast 1. Refer to [ki.com/fabrics](https://www.ki.com/fabrics).
 - For yardage pricing, see Fabric Yardage Pricing page
- C

Select power option.

LFP

- Left-facing power; add \$368

RFP

- Right-facing power; add \$368

NP

- No power
- D

Select power color.

MBL

- Black

MCG

- Cool Grey

MWG

- Warm Grey

MWH

- White
- E

Select thread color. Refer to the **Product Color Options** page in this price list.

- F

Select 74P edge color. Refer to the **Product Color Options** page in this price list.
- G

Select worksurface finish. Refer to the **Product Color Options** page in this price list.
