How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

TECHNICAL SPECIFICATIONS

Frame

Frame consists of 14-gauge, 1" diameter steel tubing, bent and welded to a 13-gauge steel stamped seat plate, and finished with baked-on powder-coat paint. The chair frame is topped by two aluminum die castings with a baked-on black powder-coated finish. Castings support the unit's seat and provide a means of rotation of the tablet about the seat.

Shell

Döni®

The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Under-seat structure is a die-drawn 12-gauge steel plate. Structure is finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint.

The Doni shell is designed by Giancarlo Piretti.

Upholstered Seat (optional)

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness.

Intellect Wave®

One-piece contoured shell is made of high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability is assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Shells have rolled edges for comfort and strength, textured front and back, with a wide, ergonomic handle molded into the chair back. Shell fastens to the chair by a 12-gauge formed steel plate with six Torx screws.

Upholstered Seat (optional)

Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over $\frac{9}{16}$ " foam on the seat and fastened to an inner shell with screws.

LimeLite®

The seat and backrest are integrated into a single shell that is injection-molded in polypropylene, reinforced with glass fiber. The shell is ergonomically contoured and features a passive-flex back movement for superior comfort.

Upholstered Seat (optional)

Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. Seat foam is nominal $\frac{1}{4}$ " thickness.

Strive®

Injection molded polypropylene back with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel construction provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire. Injection molded polypropylene seat is secured to the chair by a 12-gauge formed steel plate.

The Strive shell is designed by Giancarlo Piretti.

The chair shell (either option) swivels a total of 55 degrees (27.5 degrees each way from center) for ease of entry and exit.

TECHNICAL SPECIFICATIONS

Upholstered Seat (optional)

Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Arms (optional)

When equipped with optional cantilever arms, the supporting structure is $\frac{7}{8}$ " diameter by 13-gauge tubular steel, welded directly to the seat support structure, and matching the seat and back color. The armcaps are injection-molded glass filled polypropylene matching the seat and back color. Armcaps are attached to the steel structure by means of screws.

Surface Support

The worksurface is supported from the chair frame by a formed and welded support tube made from $1\frac{1}{8}$ " diameter, 14-gauge steel. The worksurface is supported from the support tube by an aluminum gusset die casting with a black powder-coated paint finish. The support tube rotates around the chair seat a total of 220 degrees (110 degrees each way from front-center). A $\frac{1}{2}$ " thick steel plug is drilled, tapped, and welded into the end of the support tube. The worksurface is structurally secured to the support tube with a Grade 5, $\frac{3}{8}$ -16 bolt, held secure with an epoxy patch.

Surface Mechanism

The gusset die casting rotates about the support tube by means of a plastic bushing connection, rotating a total of 154 degrees around the support tube (77 degrees each way from center). The worksurface slides back and forth for a total of 6" of straight in-and-out movement. The sliding motion is accomplished with an aluminum extruded rail and plastic bushing mechanism.

Surface

The worksurface measures 13" x 21 $\frac{1}{2}$ " for a writing surface area of 280 square inches.

Plastic

The writing surface of the plastic worksurface is injection molded ABS and includes two pencil grooves and a thumb guide. The understructure of the plastic worksurface is injection molded nylon with fiberglass reinforcement filling. Top surface available in Black, Flannel, or Warm Grey; bottom understructure is Black only.

Laminate

The laminate worksurface is 18 mm thick Baltic Birch plywood core with .040" laminate face and .020" paper backing sheet. The edge of the wood surface is shaped and sanded with a sealed and clear coat lacquered finish. KI standard laminates available (see Color Addendum).

Optional Accessory Racks

Accessory Rack (with or without cupholder)

Racks are constructed of 14-gauge perforated steel wrapped with $\frac{1}{4}$ " diameter steel wire and are welded to the frame. Optional cup holders are made of a $\frac{1}{4}$ " diameter steel wire, welded with an 11-gauge flat metal round trim plate to the steel racks. Accessory racks (with or without cupholder) are not field installable or retrofittable.

Flat Accessory Rack

Rack is constructed of 16-gauge perforated steel wrapped with $\frac{1}{4}$ " diameter steel wire welded to the frame. The rack is reinforced with stiffener channels that are constructed of 14-gauge cold rolled steel that are welded to the perforated steel rack assembly. The rack is fastened to weldments on the chair frame using #10-24 x $\frac{1}{2}$ " PEM self-clinching studs, #10-24 hex nuts and lock washers. The flat accessory rack is not field installable or retrofittable.

Poly Bookbag Rack

Rack is constructed of injection molded polypropylene and has a textured finish. It fastens to the chair using four #12 x $\frac{3}{8}$ " Truss head screws and has a molded-in cupholder and two accessory slots.

Castors and Glides

Castors are double wheels (60 mm) of high-impact thermoplastic with high impact plastic frame. Carpet or hard floor casters, Black only.

Optional Bell glides (2" high) made of high-impact plastic also available, Black only.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select worksurface type.
 LW - Laminate worksurface; add \$63
 PW - Plastic worksurface
- C** Select frame color.
- D** Select solid poly color.
- E** Select outside/inside poly color.
- F** Select surface finish.
- G** Select caster/glide option.

- C** - Carpet casters
- S** - Hard floor casters
- GL** - Glides
- SCG** - Front hard floor casters, rear glides
- CCG** - Front carpet casters, rear glides

H Select upholstery grade/color. Refer to ki.com/fabrics

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select worksurface type.
 LW - Laminate worksurface; add \$68
 PW - Plastic worksurface
- C** Select frame color.
 Refer to the **Product Color Options** page in this price list.
- D** Select solid poly color.
 Refer to the **Product Color Options** page in this price list.
- E** Select outside/inside poly color.
 Refer to the **Product Color Options** page in this price list.
- F** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- G** Select caster/glide option.

C	- Carpet casters
S	- Hard floor casters
GL	- Glides
SCG	- Front hard floor casters, rear glides
CCG	- Front carpet casters, rear glides

H Select upholstery grade/color.
 Refer to ki.com/fabrics

UPHOLSTERY INFORMATION

C.O.M. Upholstery
 C.O.M. requirement for 10 chairs or less with upholstered seat or upholstered seat and back is 3/4 yard per chair of 54" wide nondirectional fabric. For orders of 11 or more with upholstered seat and back and for complete information on ordering C.O.M. see "Ordering C.O.M., C.O.V. and C.O.L." section.
