Ordering Customer’s Own Material (C.O.M.) Upholstery

Information

Ordering Customer’s Own Material (C.O.M.) Upholstery

Information

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer’s fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer’s own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer’s responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

In all instances, send this form to the C.O.M. Specialist.

PRODUCT SPECIFICATIONS

Orenda® Casegoods Collection

February 2024

TECHNICAL SPECIFICATIONS

General Overview

Orenda is a laminate casegoods collection which adds a stylish environment to any workspace. Warm wood grains offers a timeless look while solid finishes and metal accents provide a more contemporary aesthetic. Laminates can be mixed and matched to create a two-toned look. The Orenda line includes desks, desk shells, returns, bridges, credenzas, aluminum frame tables, overhead storage, bookcase storage, under desk storage, freestanding storage, reception workstations, conference tables and various accessories.

Construction

Worksurfaces, tabletops and end panels are constructed of thermally-fused laminate (TFL) over a 1” particle-board core and include edge banding. Conference tabletops are constructed of TFL over either a 1” or 1.5” particle-board core and include edge banding. Exposed vertical surfaces are wood grain or solid laminate in color. Laminate surfaces offer lasting beauty, superior resistance to normal wear, and easy maintenance. Flat edge banding thickness is 1.5 mm ABS. A laser is used to melt a portion of the banding, fusing it to the board and creating a seamless look. Edge banding coordinates in color with the laminate finish. Inner cabinet panel surfaces may be unfinished, may be finished in various colors, and may not include edge banding. Adjustable glides on units account for uneven floors and keep surfaces level.

Most units ship pre-assembled and ready to configure, unless otherwise noted. Product shipped ready to configure will have most hardware and fittings pre-attached for quick and easy installation.

End Panels

Full-height end panels are standard on most units. Recessed end panels are available options on desk shells, extended corner desk shells, and corner units.

Modesty Panels

Modesty panels, constructed of TFL are primarily full-height, from worksurface to the floor. Partial-height modesty panels are 13.75” high on aluminum-frame Y-tables, aluminum-frame ellipse tables, D-shaped and P-shaped tops. Select models offer a no-back, no modesty panel option.

Box Drawer Construction

Pedestals cabinet box drawers feature five-sided drawer construction. Drawer sides and slides are 16” deep. Slide suspensions are full-extension, of ball bearing construction for smooth operation and have a 100 lb load capacity.

File Drawer Construction

Pedestal and lateral file drawers feature five-sided drawer construction. Drawer sides and slides are 16” deep. Slide suspensions are full-extension with over-travel, are of ball bearing construction for smooth operation and have a 150 lb load capacity. No file suspension bars are included and must be ordered separately. Drawers accommodate legal size filing in standard sizes but suspension bars (sold separately) are required for other sizes or orientation.

TECHNICAL SPECIFICATIONS

Overhead Storage

Overhead storage is available in five different cabinet styles: open, laminate hinged doors, aluminum framed hinged doors with acrylic frosted panels, laminate sliding door, or aluminum framed sliding door with frosted acrylic panel. Desktop and wall-mounted overheads each have an internal height clearance of 18¹/₄”. Desktop overheads are secured to tops using foam-core double-sided tape, have an under-shelf clearance of 22³/₄” and have a 2” diameter cut-out in the back for cable management. Task lights are available for installation to overhead storage, and must be ordered separately. Wall-mounted overheads include only hanging bar and instructions, mounting hardware is customer supplied.

Overhead Storage Doors

Anodized aluminum frame doors have a frosted acrylic center panel. Laminate panel doors are constructed of thermally-fused laminate over a particle-board core and include edge banding. Hinges are concealed, are 120-degree swing for laminate doors and 135-degree swing for aluminum-framed doors.

Desktop Screens

Desktop screens are constructed of 1/4” thick frosted acrylic, offered as either 12" or 18" high. Die-cast surface-mounted attachment brackets hold the screen in place. Brackets are secured from underneath using screws through the desk surface.

Tackboards

Tackboards are constructed using 3/4” industrial insulation board, with fabric on the front and a coating on the back for protection.

Grommets

Grommet is a circular surface mounted grommet constructed of plastic. Grommets (black color only) are installed to units at standard grommet hole locations at the factory. Grommet hole is 2³/₄” diameter. Grommet kits may be ordered separately for non-standard grommet locations and are field installed.

Conference Tables

Rectangle, racetrack and boat-shaped tops are offered with either laminate or aluminum frame bases.

Tables and Metal leg options

Post legs are 6” in diameter and painted black. All other leg profiles are finished in anodized aluminum.

Pulls

Four pull options are available:

Cubic Pulls

Anodized aluminum.

Integrated Pulls

Constructed into the fronts of doors and drawers: painted black.

Straight Pulls

Painted silver.

Waterfall Pulls

Painted silver.

TECHNICAL SPECIFICATIONS

Power Modules

Dean In-Surface Power Module
Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one available opening for various optional data ports. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean In-Surface module is 8.12” long by 2.31” wide by 2.5” high and fits securely into a 7.81” x 1.93” cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. The Dean In-Surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed.

Cord length is 10' with a 3-prong plug. Color is Black.

Key Options

All Cores and Keys must be order separately. Storage units are specified with the following lock options below:

- NL - No Lock
- WL - Locking - no lock core (ordered separately with kits).

Keyed-Alike Lock Kits (option one)
Determine the number of lock cores needed per area and specify the appropriate kit. Lock sets are sold separately and are field installed.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See “How To Build a Model Number”.
- Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select top laminate color.
Refer to the **Product Color Options** page in this price list.
- C** Select base laminate color.
Refer to the **Product Color Options** page in this price list.

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping
Ships **knocked down**, **FOB KI-Orenda Saint-Pie, QC Canada JOH 1W0, freight prepaid**. Freight class 85.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A**Select basic model.
- B**Select top laminate color.
Refer to the **Product Color Options** page in this price list.
- C**Select base laminate color.
Refer to the **Product Color Options** page in this price list.
