TECHNICAL SPECIFICATIONS

Stool
Stool seat support, base and column spacers (stool heights 14” and taller) are constructed of polypropylene specified in select KI colors. Seat, base and spacers are separated by polypropylene spacer rings standard in KI’s Blue Grey. Polypropylene parts are held together using appropriately sized M10 through bolt. Stools feature convex base permitting an active-sit with 12 degrees of stable rocking motion.

Seating Surface Pad
Seating surface pad is constructed of plastic polymer and is standard in KI’s Blue Grey. The pad is adhered to the seat support using a round double-sided tape pad.

Non-Slip Bottom
Stool bottom is constructed of a textured, non-slip thermoplastic rubber padding that is suitable for carpeted and hard floors.

Compliance
Seating exceeds BIFMA’s X5.1-2017 seating durability test and drop test; and passes KI’s internal standard testing for 400-pound capacity. Meets CA 01350.
