Customer's Own Material ■

Specifications Form

January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54" wide. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7"	8"-13"	14"-21"	22"-27"	28"-33"	34"-40"	41"-48"
	FABRIC	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10" vertical with 14" horizontal would be $14 + 5 = 19$.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Diagram A

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

Spine Screens

Spine screens allow for a mechanical connection between screen frames and include optional 10-wire power. Spine screens are available with the monolithic core style only, made of magnetic dry-erasable steel or thermally-fused laminate, and include adjustable-height feet to accommodate installation (accommodate uneven floor heights). Spine screens ship partially assembled.

Spine screens are available in the following dimensions:

- Widths: 48", 54", 60", 66", 72", 78", 84", 90", 96"
- Heights: 48", 54"

Flex Screens

Flex screens offer freestanding, user-controlled, space dividing screens in a variety of sizes and finishes, and are non-powered only. Flex screens are offered in monolithic and segmented styles and can be specified with adjustable feet or flat/bridge style feet. The flat/bridge style feet allow for 90° intersections and can also nest with adjustable height feet. Flex screens ship fully assembled, except when a horizontal topper is specified.

Flex screens are available in the following dimensions:

- Widths: 42", 48", 54", 60", 66", 72", 78", 84", 90", 96"
- Heights: 42", 48", 54", 60"

Note: 48" and 54" high flex screens have optional segmentation available at 29" from the floor. 42" flex screens are always monolithic. 60" high flex screens are always segmented.

All flex screens may be specified with horizontal toppers, which attach to the top of the screen when a top cap is not specified.

Frame Construction

All Tattoo spine & flex screen frames are constructed of 2½" by 1¼" aluminum extrusions finished with powder-coat paint. Frames are assembled in the factory (feet and base raceway trim are not installed on spine screens) and may consist of the following:

Base Raceway Trim (for spine screens)

Aluminum extrusions finished in powder-coat paint, measuring 6" tall by screen length, with receptacle and data cutouts per specification. Optional data cutouts are sized 2.88" width by 1.82" height with two holes to accommodate a #6-32 screw.

Wireway Mounting Bracket (for spine screens)

16-gauge formed steel, connects the 10-wire rigid wireway into the frame extrusion at the top of the base raceway area.

Floor Channel (for spine screens)

14-gauge formed steel finished in powder-coat paint, measuring 2½" wide by 1¼" tall, spanning the length of the screen and making up the bottom of the base raceway area.

Bridge & Flat Plate foot (for flex screens)

¼" thick steel with a footprint of 2¼" x 15" finished in powder-coat paint. Each foot includes a pair of 1" diameter non-adjustable nylon glides, adhered into counter-bores in the bottom of the foot. Each flex screen as specified ships with one flat and one bridge foot. Not available on spine screens.

Frame Construction (cont.)

Adjustable Glide Feet

Constructed of cast aluminum with a footprint of 2¼" x 15" finished in powder-coat paint. Feet pair is standard on spine screens and may be ordered on flex screens.

Adjustable Glide (for spine & flex screen adjustable glide feet)

½" diameter nylon base glides are threaded into the foot and allow for 1" of adjustability.

Trim Kits

All spine screens require a trim kit which is specified by size of screen, finish selection and power infeed location, if applicable. Trim kits include vertical caps, corner caps, attachment clips and electrical infeed conditions. Horizontal top caps are also included standard with spine screens and factory installed. When a topper is desired on a specific screen "no top cap" is specified. Trim caps are formed of extruded aluminum and are finished with powder-coat paint. Installation of horizontal and vertical trim caps require no tools. Removal of trim caps require a flat prybar. Flex screens come fully trimmed and do not require specification of additional trim kits.

Core Styles

Monolithic

Monolithic panels are dual-sided and available in a variety of substrate and finish options. Spine screens are always monolithic. 42" high flex screens are always monolithic.

Segmented

Segmented panels are available in a variety of substrate and finish options. Segmented screens feature a 29" segmentation height, with specified upper and lower cores. 48" and 54" high flex screens have optional segmentation available at 29" from the floor. 60" high flex screens are always segmented.

Core Materials

Fabric Cores

Fabric panel cores are constructed of LDF (low density fiberboard), upholstered and glued on both sides using water-based spray adhesive. Nominal thickness is ½". Fabric cores are fully tackable.

Fluted Polycarbonate Cores

Fluted polycarbonate cores are 10 mm multiwall polycarbonate and are available with a clear finish. Clear extruded PVC gaskets are used between the core and supporting frame.

Magnetic Dry-Erasable Steel Cores

Magnetic dry-erasable steel cores are constructed of 28-gauge steel panels, laminated on both sides of a Fibrex core material. The steel panels include a polyester outer film creating a writable and dry-eraseable surface. Overall thickness is nominal ¼". Clear extruded PVC gaskets are used between core and supporting frame.

Thermally-Fused Laminate Cores

Thermally-fused laminate cores are constructed of laminate, adhered by thermally-fusing both sides to particleboard. Overall thickness is nominal ½".

Acrylic Cores

Acrylic cores are constructed of ¼" thick, Acrylite Satinice material with a velvet texture, a very fine satin surface on both sides and are available in a variety of colors. Clear extruded PVC gaskets are used between core and the supporting frame.

Polyester Felt Cores

Polyester felt cores are constructed from ½" thick, 100% polyester felt and are available in a variety of colors. The cores have a density of 0.5 lb/ft² and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Polyester felt cores are fully tackable.

Horizontal Toppers

Toppers are available for use on spine & flex screens and take the place of the horizontal top cap. Specify "no top cap" on screens when a horizontal topper is to be used. Horizontal toppers are 12" in height and are specified to match the length of a corresponding screen. Extruded aluminum top caps hold the toppers in place without the use of fasteners.

Acrylic Horizontal Topper

Acrylic toppers are 1/4" thick Acrylite Satinice material with satin surface on both sides, and are offered in a variety of colors. Acrylic toppers have a slight bull-nosed edge and a 1/4" radius on the top corner. The length of acrylic topper is consistent with the length of the screen. Cork gaskets are used between the acrylic and aluminum top cap.

Polyester Felt Horizontal Topper

Polyester felt toppers are constructed from 1/2" thick, 100% polyester felt and are available in a variety of colors. The felt cores have a density of 0.5 lb/ft² and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Felt toppers have square edges and corners. The length of felt dividers is consistent with the length of the screen.

Electrical

Refer to the Planning Guide for information on product specification.

Optional Power - 810 Electrical

Optional power is offered on the Tattoo powered spine screens only. Power is 810 electrical system, for the US standard electrical system. 10-wire rigid wireways are factory mounted to powered screens.

Power is supplied through a 6-2-2 configuration:

- (6) hot wires
- (2) shared oversized neutral wires
- (2) ground wires - one isolated ground and one building ground

Compliance

Tattoo spine screen system is a UL Listed Office Furnishing per standard UL 1286. Non-powered flex screens are not included in this listing. Spine screens meet all applicable ANSI/BIFMA X5.6 - Panel Systems.

Base Infeeds (Power and/or Data)

The Spine screen's electrical system allows for base infeed to enter in-line, at end-of-run, or at a receptacle opening on the screen's base raceway trim. End-of-run base infeed kits utilize either a base infeed spacer or a base infeed vertical trim. In-line base infeed kits use a base infeed spacer where power and/or data enters from the side. Base infeed power enters into the bottom of the screen system through a cutout in the appropriate end or side trim. Receptacle infeed enters along the side of the screen and occupies the space of one receptacle cutout. Power for base infeed utilizes an 8' long, 1/2" liquid-tight flexible conduit, containing ten wires and having a modular connector end for the 810 electrical system. Data wires can enter the base of the screen through the cutout in the bottom of the trim, or through an opening in the bottom of the screen's floor channel. Data cabling, mounting plates and accessories are not provided by KI. **Note:** Data mounting plates must have ports oriented at 45°.

Top Infeeds (Power and/or Data)

Top infeed includes a 3" square, 120" long extruded aluminum power and data pole to bring power and/or data in from at, or above, ceiling level. A 5' long extension pole with splice plate is available for taller ceilings. Top infeed kits may be specified as end-of-run, or in-line. Power for top infeed utilizes a 12' long (18' long with extension option) 1/2" liquid-tight flexible metal conduit containing ten wires and having a modular connector end for the 810 electrical system. Data wires enter the pole the in the same manner as power. Data cabling, mounting plates and accessories are not provided by KI. **Note:** Data mounting plates must have ports oriented at 45°.

TECHNICAL SPECIFICATIONS

Electrical (cont.)

10-Wire Rigid Wireways

Each powered screen requires the use of 10-wire rigid wireways to provide power to receptacles. 10-wire rigid wireways are factory installed onto the bottom frame of the screen. Each screen includes two wireways, one at each end with a 10-wire power jumper in between. On both sides of each wireway, at each end of a powered screen, is a receptacle (ordered separately), plugged into the rigid wireway. The centerline of each receptacle is 12 inches from the end of each screen. The rigid wireway design allows for snap-connection of one screen's wireway to that of another screen using common 10-wire screen-to-screen jumpers (ordered separately).

10-Wire Pass-Through Screen-to-Screen Jumpers

The electrical system provides a method of passing power from one powered screen through a non-powered screen to the powered 10-wire rigid wireway of the next screen. The pass-through screen does not include wireways and receptacles. 10-Wire pass-through screen-to-screen jumpers (ordered separately) are required to connect adjacent in-line screen wireways.

10-Wire Screen-to-Screen Jumpers

10-wire screen-to-screen jumpers feature modular connector ends with nylon mesh casing over wires and are specified separate from the screens.

10-Wire Duplex Receptacles

10-wire duplex receptacles for the modular electrical system feature injection molded components, which snap fit into the 10-wire rigid wireways of the screens. The rated capacity of the duplex receptacles is 15 amps in a 6-2-2 circuit configuration.

Bezels & Filler Plates

Bezels and filler plates are molded in nylon and are available in a variety of colors. Bezels and filler plates are included with Tattoo spine screen base covers when power is specified and are field-installed.

Data Cover Plates

Data cover plates are 2 1/4" x 4 1/2" steel plates finished in powder-coat paint. Each plate includes attachment hardware and are field installed. Data cover plates are specified separate from the screens.

Electrical Infeed - New York City

The City of New York, 10-wire power infeed consists a service entry box sized for the 10-wire power distribution system. Building source power wires enter the box and are hard wired to the 10-wire ends in the box. Power exits the box through flexible conduit with a 10-wire modular connector end. The connector end feeds to the factory-installed 10-wire power distribution system. All wiring, connections, accessories and installation are to be performed by a licensed electrician.

Electrical - Hardwired

Hardwired electrical components may be specified for use in installations where required by local code (such as Chicago). Tattoo screens so specified are shipped only with receptacle enclosures, are absent of other electrical components, but are ready to receive field-added electrical components to the receptacle enclosure by the customer's licensed electrician. Receptacle enclosures are constructed of 14-gauge galvanized metal in accordance with the National Electrical Code. 4.31" width by 2.44" height openings are located asymmetrical on both sides of the screen for dual-sided applications. Left-hand openings (when facing screen) are located 16" on center from left edge of screen. Right-hand opening (when facing screen) is located 6" on center from right-hand edge of screen. Infeeds, wiring, connections and all other electrical accessories are provided and connected by a licensed electrician.

TECHNICAL SPECIFICATIONS

Accessories

Polyester Felt Magnetic Inserts

Polyester felt magnetic inserts are constructed from 1/2" thick tackable, 100% polyester felt and are available in a variety of colors. The inserts have a density of 0.5lb/ft² and are sound absorbing with an acoustic rating of 0.45-0.90 NRC (acoustic range varies due to size and space relation). The panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Magnetic strips are applied to one side using adhesive. Nominal thickness is 1/2". Not offered on 42" height screens and can only be used on screens with a dry-erasable steel core.

Widths: 40", 46", 52", 58", 64", 69", 75", 81", 87" & 93"
Heights: 39" & 45"

Patterned Polyester Felt Magnetic Inserts

Patterned polyester felt magnetic inserts are constructed from two layers of 100% polyester felt and are available in a variety of colors. The inserts have a density of 0.12lb/ft² are sound absorbing with an acoustic rating of 0.35-0.90 NRC (acoustic range varies due to size and space relation). Magnetic strips are applied to one side using adhesive. Nominal thickness is 5/8". Not offered on 42" height screens and can only be used on screens with a dry-erasable steel core.

Widths: 40", 46", 52", 58", 64", 69", 75", 81", 87" & 93"
Heights: 39" & 45"

Magnetic Tackboard Tiles

Magnetic tackboard tiles are constructed of a multilayer fiberglass core upholstered on one side using adhesive. Magnetic strips are applied to the non-upholstered side using adhesive and can only be used on screens with a dry-erasable steel core. Nominal thickness is 1/2".

Sizes Offered: 18" x 18", 18" x 24" & 24" x 24".

Coat Hook

Formed 11-gauge bent steel powder-coat painted hook in a variety of colors. Coat hook comes with an aluminum glide which is attached to the hook using a 1/2" cap screw. The aluminum glide fits into an access opening in top frame of spine & flex screens allowing the coat hook to slide into location.

Sliding Dual-Purpose Board

The sliding boards are constructed of a fiberglass core, upholstered on one side and adhered to a 28-gauge steel pan on the other. The steel includes a polyester film creating a writable and dry-eraseable surface. The core is framed two sides by extruded aluminum frames. Attached nylon glide fits into access opening in top frame of spine & flex screens allowing slide panel to slide into location.

Dimensions: 24" width by 39" height by 1/2" depth.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge
- C** Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)
- D** Select frame/trim color.
Refer to the **Product Color Options** page in this price list.
- E** Select laminate.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge
- C** Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)
- D** Select frame/trim color. Refer to the **Product Color Options** page in this price list.
- E** Select lower laminate color. Refer to the **Product Color Options** page in this price list.
- F** Select upper fabric color. Refer to ki.com/fabrics

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge
- C** Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)
- D** Select frame/trim color. Refer to the **Product Color Options** page in this price list.
- E** Select lower polyester felt color. Refer to the **Product Color Options** page in this price list.
- F** Select upper polyester felt color. Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge
- C** Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)
- D** Select frame/trim color. Refer to the **Product Color Options** page in this price list.
- E** Select lower fabric color. Refer to ki.com/fabrics

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge
- C** Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)
- D** Select frame/trim color.
Refer to the **Product Color Options** page in this price list.
- E** Select lower fabric color.
Refer to ki.com/fabrics
- F** Select upper polyester felt color.
Refer to the **Product Color Options** page in this price list.

Locks

Locks are standard on all units. Locks are a high-security double-bit design. Two KI break-away keys are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order).

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:

- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

installed or shipped separately. To remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "no lock core (NLC)" when configuring. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs

PRODUCT SPECIFICATIONS ■

Tattoo™ Storage

June 2023

TECHNICAL SPECIFICATIONS

Construction & Standard Features

All Tattoo storage units are constructed primarily of steel, which is powder-coat painted in standard KI colors. Drawers feature smooth rolling, steel ball-bearing extension slides. Chest, low cupboard, vanity and tower units are supported off the floor by leg posts of 16-gauge steel which are welded to 1/4" thick steel mounting plates and include either a caster or glide option. Leg post lengths are different for either casters or glides to accomplish a uniform 7" distance from the underside of the unit to the floor. Optional 1 1/8" diameter nylon leveling glides allow for height-adjustability of approximately 3/4". Optional 1 1/2" diameter twin-wheel swiveling casters are constructed of soft non-marking plastic, in a set of two locking and two non-locking wheels. Mobile pedestal is standard with casters only, two locking and two non-locking with one additional non-locking caster at the bottom of the lower drawer front for stability. All storage units are stand-alone units.

Tattoo Storage Finish

Tattoo storage is offered in all standard KI powder-coat finishes. Powder-coat application is a hybrid epoxy, baked on to provide a scratch and stain resistant finish. Doors, drawer fronts, steel lids and locking filler rails (on vanity units) may be specified in different colors than the shell at no up charge. Mechanical components are nickel-chrome plated or finished with other protective coatings. Legs are powder-coated the same finish as the shells.

Tattoo Pulls

All Tattoo storage drawers and doors can be ordered to receive either cast metal Connection Zone, arc or beveled style pulls in select metallic finishes. Woven nylon strap pulls are available as well, and come in black or silver tone.

Tattoo Locks

Tattoo storage ships standard with high security double-bit locks, with master key-able P-Series lock cores. The locks are randomly keyed and can be specified with or without lock cores. Wardrobe and vanity units contain multiple locks but will be keyed alike for each entire unit. Locks are available in black chromate and satin chrome finishes.

Optional Seat Pads & Padded Topper

The mobile pedestal and low cupboard are offered with optional loose seat pads. The chest ships with a standard fixed padded topper. Pads are upholstered in a selection of fabrics. Total pad thickness is 1 1/4", consisting of 3/4" polyurethane foam of 2.0 average density, 100 average IFD, and glued to 1/2" particle board. Loose seat pad bottoms have rubberized non-skid strips to protect surface finishes. Fixed padded toppers are fastened to the steel storage tops using steel machine screws into inserts in the particle board base.

Storage Door/Lid Hinges

Cupboard, wardrobe, vanity doors and lid each use two Euro-style "hidden hinges" for a seamless finish. The chest utilizes a piano-style hinge for maximum durability as a seating surface. Vanity and chest lids also feature two soft close lid stays for ease of use and silent operation.

Compliance

Tattoo storage is designed and manufactured to meet or exceed required ANSI/BIFMA x5.9-2012.

Mobile Pedestal

Mobile pedestal outer upper shell construction is of 20-gauge steel with an 18-gauge steel bottom pan. The primary drawer is constructed of 22-gauge steel and comes standard with side-to-side filing for letter and legal-sized folders. Primary drawer front features an internal pencil drawer behind the drawer front. The hidden drawer is constructed of 20-gauge steel.

Chest

Chest top and sides construction is of 20-gauge steel. Folder rails, bottom pan and its reinforcements are made from 18-gauge steel. Chest allows for side-to-side filing of legal size paper, with folder bars included for front-to-back filing of letter and legal-sized paper. An additional pair of folder bars may be ordered separately to file a second set of letter or legal sized paper front-to-back. Chest lid features two soft-closing hinges for ease of use and silent operation of the lid. All chest units are standard with an upholstered padded topper to act as a sitting surface.

Low Cupboard

Low cupboard case construction is of 20-gauge steel. The shell's top reinforcement, bottom pan and its reinforcements are made from 18-gauge steel. Unit is available with a steel top, or with optional 3/4" thick raised worktop of HPL laminated particleboard, with a 2 mm (73P) edge. Raised worktop is supported by .060" thick wall aluminum tubing, allowing for 4 1/2" of clearance between the worktop underside and the top of the unit shell. Raised worktop low cupboard units are also available with a height-adjustable, 1/2" thick polyester felt screen. The screen has a density of 0.5 lb/ft² and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (a mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Screen is raised/lowered by hand and is 44 1/2" high when fully raised. Felt screen mechanism lowers the screen top to be flush with the worktop surface.

Vanity

Vanity case construction is of 20-gauge steel. The bottom pan and its reinforcements are made from 18-gauge steel. Drawer fronts are constructed of 20-gauge steel, with 18-gauge steel reinforcements. The primary drawer back is constructed of 18-gauge steel. The cupboard door and shelf are constructed of 22-gauge steel.

The vanity has a flip-up lid to provide additional privacy. The hinged lid has two soft closing hinges for ease of use and silent operation. Lids are available in 18-gauge steel, or laminated particleboard construction. The lid includes a white markerboard surface at the underside. The 3/4" laminated particleboard lid has HPL laminate on top, a white markerboard backer surface underneath, a 2 mm (73P) edge and a standard nylon strap pull. A storage space is located below either lid type, with a full-size felt pad to help gently store items.

The vanity cupboard door is either right- or left-hand and determines the hand of the unit. A right-hand unit features a cupboard door on right side of the unit. Inside the vanity cupboard is a removable shelf. The main drawer body is constructed with side access oriented towards the cupboard door. The drawer incorporates a stow-able folder bar, which can be moved out of the way for improved drawer access, or be used to allow front-to-back filing of letter sized paper. A pencil drawer is hidden behind the main drawer front for improved utility and aesthetics. Unit can be ordered with grommets in the upper lid shelf, 1 7/8" overall clearance diameter with a 3/4" diameter cord pass through and the rear cupboard grommet with 1 5/8" overall clearance through to route wires. Grommet will be located on the cupboard side.

Tower

Tower case construction is of 20-gauge steel. The bottom pan and its reinforcements are made from 18-gauge steel. Drawer fronts and wardrobe door are constructed of 22-gauge steel. The drawer bodies and backs are constructed of 18-gauge steel. Unit features a pedestal in file/file or box/box/file configuration. File drawers may be filled with letter sized paper front-to-back, or letter or legal sized paper side-to-side. A front- and side-accessible storage shelf is located above the pedestal. The location of the full vertical-height wardrobe, with coat rod bracket and boot tray determine the hand of the unit. A right-hand unit features the wardrobe on the right side of the unit.

Specifications Form

January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54" wide. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN	UNDER 7"	8"-13"	14"-21"	22"-27"	28"-33"	34"-40"	41"-48"
	FABRIC	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10" vertical with 14" horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

TECHNICAL SPECIFICATIONS

Seat/Backrest & Table Frames

All seat/backrest and table frames are constructed of $\frac{3}{4}$ " CNC machined, laminated hardwood plywood. Main frame joints are nailed and glued in addition to interlocking joinery across all stress points. Frames have $\frac{1}{4}$ " thick, 2.5 density 45 lb compression "soft feel" foam covering all exposed frame areas under the upholstery.

Seat & Backrest Foam

Seat and backrest foam is 2.5 density 45 lb compression, with $2\frac{1}{2}$ " thickness on seat surface and $1\frac{1}{2}$ " thick at the backrest front. Both seat and backrest have an additional $\frac{1}{2}$ " layer of 2.6 density, 80 lb compression "topper" foam for tight seat and back upholstery fit. Other exposed surfaces have $\frac{1}{4}$ " thick, 2.5 density 45 lb compression "soft feel" foam under the upholstery.

Base Leg Options

Leg assemblies are specified differently for glides or casters. Legs are constructed of $1\frac{1}{4}$ " O.D. by 16-gauge round steel tubing, welded to a 7-gauge steel spider plate at one end and are fitted with $\frac{5}{16}$ -18 threaded inserts at the opposite end to accept glides or casters. Overall distance from floor to bottom of seat is 7" for both caster and glide. Length of leg varies to accommodate either caster or glide. Leg assemblies are powder-coat painted in select KI colors and attach to the base structure using $\frac{1}{4}$ -20 x 1" flat head screws.

Glides

Adjustable glides have $1\frac{1}{4}$ " diameter feet in black nylon with $\frac{5}{16}$ -18 threaded steel stems which twist in and secure to steel legs. Allows for $\frac{3}{4}$ " of adjustability.

Casters

Fully swiveling and locking casters have $1\frac{1}{2}$ " diameter dual-wheels, constructed with soft, non-marring rubber, and are individually rated at 85 lb static loading. Caster stems are $\frac{5}{16}$ -18 and thread into optional caster legs. Casters are 2" tall overall when installed and four caster assemblies are used per seat or table unit.

Tabletop

Table top structure is machined from 45 lb medium density fiberboard core material. The top is finished with .025" to .030" thick high-pressure plastic laminate on five sides, glued in place. Two opposite edges are "waterfall" profile with $\frac{5}{8}$ " radius post formed laminate, and two edges are "self-edge" laminate profile. The overall thickness of the finished table top structure is $3\frac{3}{4}$ " and it is secured to the upholstered frame structure below.

Optional AC Power & USB Charger

The optional USB/AC power module houses one 15-amp, 125 volt AC simplex receptacle with one 2.1-amp, 5 volt DC USB Type A and one Type C port (2.0 and 3.0 compatible, no data). Power module provides device charging and direct AC power. The module's aluminum housing contains the power & USB circuitry. The 72" exposed power cord is 14 AWG, 15-amp NEMA rated, three-conductor SJT, with a three-prong grounded plug. The 3-prong plug is oriented straight off the power cord. The power cord is strain-relief mounted to the rear of the module's aluminum housing and as it exits the lounge.

The entire electrical power and USB module is UL listed and passes UL spill test rating for protection against liquids. Both USB ports can power and charge two separate mobile devices simultaneously. The power module's optional faceplate/power & USB color combinations are: black/black, white/white and silver/white. Faceplates are finished with powder-coat paint.

Compliance

Tattoo Seating is designed and manufactured to meet or exceed required ANSI/BIFMA x5.4-2012. Glides meet KI's internal 400 lb weight rating standard on TLS800, TLT800, TLT3800 and TLE800 models. Casters meet KI's internal 300 lb weight rating standard on TLS600, TLT600, TL3600 and TLE600.

Tattoo Slim Seat w/ Left Facing table

Unique design is space saving to maximize a limited footprint. Created for user control of elements relating to placement, purpose, accessibility and power.

Laminate tables are available in the slim seat, or as larger stand alone products.

Overall depth on all seating products is 22" allowing for modular configurations and ease of rearrangement.

Optional power on all seating products available (except ottoman) accepts USB and 120V.

Customer's Own Material ■

Specifications Form January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54" wide. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7"	8"-13"	14"-21"	22"-27"	28"-33"	34"-40"	41"-48"
	FABRIC	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT	REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10" vertical with 14" horizontal would be $14+5=19$.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select power option.
 NP - No power
 WP - With power; add \$333
- C** Select power module color.
 WPBL - Black/Black power module
 WPSL - Silver/White power module
 WPWH - White/white power module
- D** Select moisture barrier.
 MB - Moisture barrier
 NMB - No moisture barrier
 See pricing column for moisture barrier upcharge.
- E** Select base finish color.
 Refer to the **Product Color Options** page in this price list.
- F** Select non-contrast or fabric contrast 1.
 Refer to ki.com/fabrics.

- For yardage pricing, see Fabric Yardage Pricing page
- G** Select fabric contrast 2.
 Refer to ki.com/fabrics
- For yardage pricing, see Fabric Yardage Pricing page

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturers name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested thru the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select power option.
 NP - No power
 WP - With power; add \$333
- C** Select power module color.
 WPBL - Black/Black power module
 WPSL - Silver/White power module
 WPWH - White/white power module
- D** Select moisture barrier.
 MB - Moisture barrier
 NMB - No moisture barrier
 See pricing column for moisture barrier upcharge.
- E** Select base finish color.
 Refer to the **Product Color Options** page in this price list.
- F** Select non-contrast or fabric contrast 1.
 Refer to ki.com/fabrics.

• For yardage pricing, see Fabric Yardage Pricing page
G Select laminate color.
 Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturers name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested thru the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

TECHNICAL SPECIFICATIONS

Base

The table base assembly consists of a column upright with a base plate at the floor and a table support plate attached at the top, both attach to the column using $\frac{5}{16}$ " - 18 cap head screws. The column is 3" in diameter and is constructed of 14-gauge steel, with threaded straps welded in each end for base and table support plate attachment. The square base plate is constructed of $\frac{1}{4}$ " thick steel plate with $\frac{1}{2}$ " radiused corners and has $\frac{3}{4}$ " steel glide bushings welded near each corner for adjustable glides. All 30" x 44" rectangular tops receive a $23\frac{3}{4}$ " x $23\frac{3}{4}$ " base plate and 30" x 30" tops use a 20" x 20" base plate. The table support plate is of 7-gauge steel and attaches to the underside of the table using #12 x $\frac{3}{4}$ " Phillips pan head screws.

Glides

Adjustable glides are 1" diameter, nickel plated with $\frac{5}{16}$ " stems and offer $\frac{1}{2}$ " of adjustability.

Laminate Table Surfaces

Laminate tops feature a $\frac{3}{4}$ " high-density particleboard core with a .030" thick high-pressure laminate top and a .028" thick phenolic backer (bottom). The table edge is 2mm polypropylene (73P) edge. Tops are pre-drilled for the table bases.

Base Finishes

The base components are finished in electrostatically applied hybrid powdercoating. The coating is then fused and cured in a baking oven to form a smooth, continuous finish that is chemical-resistant, hard, tough and mar-resistant. Powder-coated paint is available in all standard KI paint colors except for chrome.

Compliance

Tattoo Table is designed and manufactured to meet or exceed required ANSI/BIFMA x5.5-2014.

TECHNICAL SPECIFICATIONS

Toggle Dual & Triple Motor Electric-Base (Model EL, ELC & SS)

General

The Model EL table consists of two adjustable height T-bases (centered column on a horizontal foot). The Model ELC table consists of two adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to a tabletop support that spans the two bases. The Model SS table consists of three adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to the tabletop support that spans the three bases. All tabletops adjust between 25" and 51" from the floor by means of electric controls that can be located at either end of the table.

Base

The base consists of a column assembly and foot both finished with baked-on 30-sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member consists of a 2³/₈" x 4³/₈" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The intermediate member consists of a 2" x 4" rectangular 14-gauge steel tubing. The inner member consists of a 1 1/2" x 3 1/2" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. A 6-gauge formed steel motor housing is welded to each outer leg member for strength. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Tabletop Support

The tabletop support consists of a 14-gauge 1" x 1" steel tubing attached to each leg column with 6 mm bolts. An 11-gauge U-shaped cross member connects each leg assembly for stability.

Tabletop

Tabletops are constructed with 1 1/8" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high-impact plastic edging. Model EL and ELC tabletops are pre-drilled and attached to the bases using eight M5.5 x 22 pan head screws. Model SS tabletops are pre-drilled and attached to the bases using sixteen M5.5 x 22 pan head screws.

Control Box

Tables ship standard with a compact corded two-button remote control switch. This allows two switch options for every customer. All table control switches come standard with programmable container/shelf stop, and ISP (Intelligent System Protection). The stand-by power consumption of the control box is 0.3 watts. Power cord length is 120" with a 3-prong. Refer to "Toggle Control Unit Product Specifications" (KI-62686) for more details.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

Polyester Felt Modesty Panel

Modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft³ and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high by 46 1/2", 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide.

Mounting Hooks

The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 46 1/2" wide use two hooks per panel. Panels 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide use three hooks per panel.

Toggle Fixed-Base (Model FX)
General

The table consists of two T-bases (centered column on a horizontal foot) supporting a tabletop. The top of the tabletop is 29" from the floor. See page 11 for top sizes.

Base

The base consists of a top plate, column and foot all finished with baked-on 30-sheen powder-coat paint. The top plate is 6-gauge thick steel. The column consists of a 2³/₈" x 4³/₈" rectangular 14-gauge steel tubing with a 1/4" thick steel plate welded on the bottom and top end. The top plate is attached to the column with four 6 mm bolts. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Tabletop

Tabletops are constructed with 1 1/8" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The tabletop is pre-drilled and attached to each mounting plate using seven #10 x 1" tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations.

Polyester Felt Modesty Panel

Modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft³ and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 PL - Postformed edge
 KN - Knife edge
 Knife edge (KN) and Postformed edge (PL) on user side only
- C** Select modesty panel.
 NMP - No modesty panel
 PMP - Polyester felt modesty panel
- D** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- E** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
 Surface finish offerings are based on edge style selections.
- F** Select base finish.
 Refer to the **Product Color Options** page in this price list.
- G** Select modesty panel color (only if polyester felt panel is chosen).
 Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.

- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
 Knife edge (KN) on user side only
- C** Select modesty panel.
NMP - No modesty panel
PMP - Polyester felt modesty panel

- D** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.

- E** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
 Surface finish offerings are based on edge style selections.

- F** Select base finish.
 Refer to the **Product Color Options** page in this price list.

- G** Select modesty panel color (only if polyester felt panel is chosen).
 Refer to the **Product Color Options** page in this price list.

TECHNICAL SPECIFICATIONS

WorkUp Crank-Base (Model CR)

General

The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 27.11" and 44.83" from the floor by means of a front crank that can be located at either end of the table. A 3/4" diameter steel connecting rod spans from column to column to enable simultaneous adjustment of both columns.

Base

The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot is made of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot. The base adjusts at a rate of 6 1/3 turns per inch.

Worksurface Support

The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

Worksurface

Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Fixed-Base (Model FX)

General

The table consists of two T-bases (centered column on a horizontal foot) supporting a worksurface. The top of the worksurface will be 29" from the floor. See pages 8 & 9 for top sizes.

Base

The base consists of a top plate, welded to a column and a foot, all finished with baked on 30 sheen powder-coat paint. The top plate is 1/4" thick steel. The column is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The foot is made of two formed and welded 11-gauge steel components. The top plate and foot is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface

Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp ANSI/HFES Electric-Base (Model HF)

General

The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 22.35" and 48.33" from the floor by means of electric controls that can be located at either end of the table. The leg moves up or down at a speed of 50mm/sec (2"/sec). Maximum amps per table is 4 amps.

Base

The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The intermediate member is 2 1/2" square, 14-gauge steel tubing. The inner member is 2 1/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support

The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

Worksurface

Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Ratchet-Base (Model RT)

General

The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface adjusts to thirteen positions between 27.11" and 36.56" from the floor by manually lifting the worksurface.

Base

The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support

The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

Worksurface

Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Counterbalance-Base (Model CB)

General

The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 28 1/4" and 46 3/4" from the floor by activating a release lever and manually lifting or lowering the worksurface. The worksurface weight is counterbalanced by pneumatic springs to minimize the manual force required to move the worksurface. The two bases are synchronized with steel bands to maintain a level worksurface. The column uses a roller bearing system to minimize friction in the column.

Base

The base consists of a column assembly and foot finished with baked-on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support

The worksurface support consists of two steel end supports and two steel cross supports welded together using rectangular steel tubing, 50mm x 25mm x 2mm wall thickness. The worksurface support is attached to the column with 8mm bolts.

Worksurface

Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the base using M5 x 70mm tapping screws.

Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

36"	60" & 66"
48"	72"

24" Wire Trough

36" Wire Trough

48" Wire Trough

Wire Trough Placement (Fixed-Base Tables)

For Fixed-Base Tables (excluding the 36" and 42" wide rectangular models), an optional wire trough can be mounted in the center of the tabletop, under the leg mounting plates. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted along the rear edge of the tabletops, behind the leg mounting plates, if desired. The optional wire troughs are not available for 36" and 42" wide rectangular tables due to insufficient clearance between the legs.

**WorkUp Rectangular Fixed-Base Tables,
22" -36" Deep (22" x 48" Model FX shown)**

Wire Trough Placement (Ratchet, Crank & Counterbalance-Base Tables)

For Ratchet, Crank, and Counterbalance Tables, an optional wire trough can be mounted in the center of the tabletop. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted along the rear edge of the tabletops, behind the worksurface support beam, if desired.

**WorkUp Rectangular Ratchet, Crank &
Counterbalance-Base Tables, 22" -36" Deep
(22" x 48" Model RT shown)**

**WorkUp Rectangular Ratchet, Crank &
Counterbalance-Base Tables, 36" Deep
(36" x 48" Model RT shown)**

**WorkUp 120° Ratchet, Crank & Counterbalance-Base
Tables, 24" Deep (24" x 36" Model RT shown)**

Wire Trough Placement (Electric-Base Tables)

For Electric-Base Tables, an optional wire trough can be mounted in the center of the tabletop. For 22" & 24" deep rectangular tables, the optional wire trough can be mounted under the rear support beam. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted along the rear edge of the tabletops, behind the worksurface support beam, if desired.

**WorkUp Rectangular Electric-Base Tables,

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 - 74P** - 74P edge
 - PL** - Postformed edge
 - KN** - Knife edge
 Knife edge (KN) and Postformed edge (PL) on user side only
- C** Select modesty panel.
 - NMP** - No modesty panel
 - PMP** - Polyester felt modesty panel; add \$203
- D** Select base option.
 - G** - Glides
 - R** - Rolling base (1 foot w/rollers, 1 foot w/glides); add \$60
- E** Select edge color. Refer to the **Product Color Options** page in this price list. Edge color offerings are based on edge style selections.
- F** Select surface finish. Refer to the **Product Color Options** page in this price list. Surface finish offerings are based on edge style selections.
- G** Select base finish. Refer to the **Product Color Options** page in this price list.
- H** Select modesty panel color (only if polyester felt panel is chosen). Refer to the **Product Color Options** page in this price list.

Universal Height Adjustable Screens

General Information

Universal Height Adjustable Screens

General Information

Universal Height Adjustable Screen

Features	
Height adjustable by user	•
Material is 100% polyester felt	•
Only standard on select Pirouette fixed leg tables, WorkUp, and Toggle tables. Applications may be possible on other tables through Product Modification Requests. Contact Customer Service for details.	•
Field-installed	•

Adjustable Privacy Screens attach to the back length of a table or to the side depth of a table.

Screen Size (W x H)	Recommended for:
23 x 24	24" deep tops
29 x 24	30" deep tops
35 x 24	36" deep tops
46 x 24	48" long tops
52 x 24	54" long tops
58 x 24	60" long tops
64 x 24	66" long tops
70 x 24	72" long tops
82 x 24	84" long tops

The screens are standard for a variety of models on Pirouette, Toggle and WorkUp tables. These particular tables include pilot holes for mounting the screens to the undersides of the worksurfaces. Reference the following for table models within these products that include and exclude the screen pilot holes:

YES	NO
Toggle Rectangles and Square Shoe	Toggle 120 Degree
WorkUp Rectangles	WorkUp 120 Degree
Pirouette Fixed Training Rectangles	Pirouette Collaborative Rectangles
Pirouette Fixed Chevrons (Straight Side Only)	Pirouette 42" & 48" Deep Rectangles
	Pirouette Nesting Tables
	Pirouette Scale Up Tables
	Pirouette Half Rounds
	Pirouette Trapezoids
	Pirouette Double Chevrons
	Pirouette Guitar Picks
	Pirouette Squares
	Pirouette Rounds

SPECIFICATIONS

Screen

Screens are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The screen is 1/2" thick with a density of .05 lb/ft and is 100% tackable. Screens are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard screens are 23.75" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide.

Brackets

The mounting brackets are 14-gauge cold rolled steel and the glide plates are injected molded Delrin. The rack is made from cast aluminum and a nylon pinion gear is synchronized between the brackets with a steel connecting rod. The mounting brackets and rack are powder coated for durability. The PET screens are fastened to the brackets using stainless steel thumb screws (two per bracket). Screen sizes 23", 29", 35", and 46" wide are assembled with two adjustable brackets while screens 52", 58", 64", 70" and 82" have three adjustable brackets.
