Training Tables

April 2025

TECHNICAL SPECIFICATIONS

Fixed-Height Training Tables

Table Legs

Fixed-top base and nesting-top base training table legs feature a cast aluminum foot secured to an 8-gauge extruded aluminum, stylized pill-shaped leg upright using $\frac{1}{4}$ -20 Torx pan head draw bolts. Each leg has a side-welded aluminum gusset that serves to connect the two table legs together via a stringer mounted between them.

Fixed-Top Legs

Each fixed-top training table leg has a 7-gauge steel, table mounting plate secured on top using $\frac{5}{16}$ -18 x $2\frac{1}{2}$ " Torx flat head screws.

Nesting-Top Legs

Each nesting-top training table leg has a cast aluminum mounting head secured to it on top with $\frac{5}{16}$ -18 x 2" hex head bolts. A nesting mechanism assembly mounts directly to the inside of each mounting head using $\frac{1}{4}$ -20 x $\frac{3}{4}$ " Allen flat head screws.

The table feet are either 18", 24", or 30" in depth, depending on the depth of the overall table footprint. Both fixed-top and nesting-top legs have options for 29", 36", and 42" table heights.

Table Bases

Fixed-Top Bases

Fixed-top training table bases consist of two legs with feet, joined together by a 16-gauge steel, pill-shaped tube stringer, secured using $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws to a gusset near the top of the leg column on 29" and 36" high tables, and near the bottom of each leg column on 42" high tables. At the top of each leg, a 7-gauge steel, table mounting plate is secured to the underside of the table at pre-drilled mounting holes, using #12 x 1" Phillips flat head tapping screws. Fixed-top bases may be specified with either casters or glides.

Nesting-Top Bases

Nesting-top training table bases feature a steel hinged mechanism secured to each leg. The top of each hinged mechanism is secured to the underside of the table using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes. Below the hinged mechanisms, the nesting-top bases consist of two legs with feet, joined together by a 16-gauge steel, pill-shaped tube stringer, secured using $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws to a gusset near the top of the leg column on 29" and 36" high tables, and near the bottom of each leg column on 42" high tables. Nesting-top bases may be specified with either casters or glides.

Nesting-top bases allow for the tabletops to be rotated 90-degrees from horizontal to the vertical position, and nested so multiple tables may be compactly stored together.

Nesting Mechanisms

The hinged flipping and nesting mechanisms consist of a 4 mm thick formed steel lower table support assembly secured to each leg, and above it is a 3 mm thick table mounting plate assembly. The two assemblies are hinged together with a 10 mm steel pin. A 9.9 mm steel hex rod joins through each leg mechanism assembly, utilizing zinc latches to hold the hinged mechanism closed in the horizontal position for use. At each end of the base, nylon release paddles are actuated to release the inner zinc latches and allow the table to rotate up 90-degrees and into the nesting position. Pulling the table down from nesting to horizontal position, then applying downward force on the front edge of the table allows the latches to re-engage the top in the use position.

TECHNICAL SPECIFICATIONS

Fixed-Height Training Tables (cont.)

Collaborative Tables

Collaborative tables use training table bases with larger sized tops, allowing users to sit at all four sides of the table. Collaborative tables are only available in a height of 29". Table depths of 30" and 36" are available with power modules.

Base Finish

Fixed-top training table base finishes are either all powder-coat painted, or are chrome-plated aluminum feet, with a powder-coat painted leg tube. Mounting plates on fixed-top bases are always powder-coat painted with black textured paint.

Nesting-top training table base finishes are either all powdered-coat painted, or are chrome-plated aluminum feet, with a powder-coat painted leg tube. Nesting mechanisms are always e-coated black (electrocoating is a cross-process between painting and plating).

See Product Color Options page in the Tributaire Collection Pricelist for color options offered.

Tabletops

Tabletops are nominal $1\frac{1}{4}$ " overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core for standard tops is 45 lb/cu ft. Tributaire training tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have an optional grommet cutout in the table surface which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Casters

All training tables specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are compatible or interchangeable with glides. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with $\frac{1}{2}$ " diameter friction ring fit posts, requiring no tools to install.

Telescopic Glides

Telescopic glides are constructed of a powder-coat painted die-cast aluminum post, a molded nylon body, and replaceable molded nylon floor pad. Glides are 2" in diameter at the base and have an adjustment range of approximately 1.2". Glides are compatible or interchangeable with casters. The telescopic glide post's color will match the color of the base frame. The nylon body of the glides come in three color options: Black, Warm Grey, or Cottonwood. The nylon pad on the glides come in a natural color (off-white). Glides are mounted with .43" friction ring fit posts, requiring no tools to install.

TECHNICAL SPECIFICATIONS

Adjustable-Height Training Tables

Table Legs

Adjustable-height training table legs feature a cast aluminum foot secured into an 8-gauge extruded aluminum, stylized pill-shaped leg upright using 1/4-20 Torx pan head draw bolts. Each leg has a side-welded aluminum gusset that serves to connect the two table legs together via a stringer mounted between them. Both screw-adjustable and pneumatic-adjustable legs have a free moving inner aluminum extrusion, supported by thermoplastic Delrin glide bushings, that telescopes smoothly upward to a desired height between 29"-44".

Each adjustable-height leg has a cast aluminum mounting head secured to it on top with 1/4-20 x 1" Phillips pan head screws. It then is secured to either a fixed mounting plate, or a nesting mechanism using 1/4-20 x 3/4" Allen flat head screws.

Screw-Adjustable Height Legs

T-Leg table base feet are of die-cast aluminum, secured to the outer leg tube with 1/4-20 Torx pan head draw bolts. Outer leg tubes are a .10" thick extruded aluminum. The inner leg tube is .125" thick extruded aluminum, which is secured to a die-cast aluminum head using two 5/16-18 x 4" thread-cutting hex bolts. The inner leg tube is supported internally by a set of Delrin glide bushings that provide smooth adjustment. The inner tube contains a set of threaded adjustment holes spaced 1" apart which mate up with two holes on the outer leg. By removing the locking screws, the tabletop height may be adjusted in 1" increments. Each leg assembly is attached to the mechanism using four 1/4-20 x 5/8" Torx head thread forming screws.

Pneumatic-Adjustable Height Legs

T-Leg table base feet are die-cast aluminum, secured to the outer leg tube using two 1/4-20 Torx pan head draw bolts. Outer leg tubes are a .10" thick closed profile aluminum extrusion. The inner leg tube is .125" thick extruded aluminum which is secured to die-cast aluminum head using two 5/16-18 x 4" thread-cutting hex bolts. The inner leg tube is supported internally by a set of Delrin glide bushings that provide smooth adjustment. Housed inside each leg tube is a pneumatic cylinder which includes a locking feature to prevent vertical movement when any force is applied to the work surface and the cylinder is not actuated.

The table feet on adjustable-height legs are 24" deep. Both pneumatic- and screw-adjustable height table legs can be used on a fixed-top or nesting-top base.

Table Bases

Fixed-Top Bases

Fixed-top training table bases consist of two adjustable-height legs which are joined together with a pill-shaped 16-gauge steel tube stringer, secured with 1/4-20 x 5/8" Torx pan head screws to the gussets, near the top of each leg column. The leg mounting plates of the base assembly are then secured to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws. Fixed-top bases are specified with either casters or glides, and are user installed.

Nesting-Top Bases

Nesting-top training table bases consist of two adjustable-height legs which are joined together with a pill-shaped 16-gauge steel tube stringer, secured with 1/4-20 x 5/8" Torx pan head screws to the gussets, near the top of each leg column. The top of each hinged mechanism is then secured to the underside of the tabletop using #12 x 1 1/2" Phillips flat head screws. Nesting-top bases are specified with either casters or glides, and are user installed.

Nesting-top bases allow for the tabletops to be rotated 90° from horizontal to the vertical position, and nested so that multiple tables can be compactly stored together.

TECHNICAL SPECIFICATIONS

Adjustable-Height Training Tables (cont.)

Table Bases (cont.)

Nesting-Top Bases (cont.)

Nesting Mechanisms

The hinged flipping and nesting mechanisms consist of a 4 mm thick formed steel lower table support assembly secured to each leg, and above it is a 3 mm thick table mounting plate assembly. The two assemblies are hinged together with a 10 mm steel pin. A 9.9 mm steel hex rod joins through each leg mechanism assembly, utilizing zinc latches to hold the hinged mechanism closed in the horizontal position for use. At each end of the base, nylon release paddles are actuated to release the inner zinc latches and allow the table to rotate up 90-degrees and into the nesting position. Pulling the table down from nesting to horizontal position, then applying downward forced on the front edge of the table allows the latches to re-engage the top in the use position.

Base Finish

Fixed-top training table base finishes are either all powder-coat painted, or are chrome-plated aluminum feet, with a powder-coat painted leg tube. Mounting brackets on fixed-top bases are always powder-coat painted with black textured paint.

Nesting-top training table base finishes are either all powdered-coat painted, or are chrome-plated aluminum feet, with a powder-coat painted leg tube. Nesting mechanisms are always e-coated black (electrocoating is a cross-process between painting and plating).

See Product Color Options page in the Tributaire Collection Pricelist for color options offered.

Tabletops

Tabletops are nominal 1 1/4" overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core for standard tops is 45 lb/cu ft. Tributaire training tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have an optional grommet cutout in the table surface which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Casters

All training tables specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are compatible or interchangeable with glides. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with 1/2" diameter friction ring fit posts, requiring no tools to install.

Telescopic Glides

Telescopic glides are constructed of a powder-coat painted die-cast aluminum post, a molded nylon body, and replaceable molded nylon floor pad. Glides are 2" in diameter at the base and have an adjustment range of approximately 1.2". Glides are compatible or interchangeable with casters. The telescopic glide post's color will match the color of the base frame. The body of the glides come in three color options: Black, Warm Grey, or Cottonwood. The nylon pad on the glides come in their natural color (off-white). Glides are mounted with .43" friction ring fit posts, requiring no tools to install.

TECHNICAL SPECIFICATIONS

Grommets

Dean & Nacre Flip-Top Grommets

Flip-top grommets are surface-mounted, constructed of 18-gauge steel and have a flip-up door. The grommets may be fastened with wood screws into the 6.94" x 3" tabletop cutouts. Flip-top grommets are sized the same as Nacre or Dean power modules (sold separately), which allows for retrofitting of corresponding power modules at a later date. The grommet's flip-up door allows cords to pass through to a power source while closed, and allows for more cord routing space when the flip-up door is opened. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommets are field installed.

Flip-top grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page.

Node Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommet is field installed.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Dean® Clamp-On Power Modules

Dean clamp-on power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module is 5.51" wide by 2.65" deep by 2.75" high (above the tabletop). The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module face at a right angle to the worksurface and uses two thumb screws underneath for attachment, without the need for a table cutout. Clamp is 3" wide, extends 1³/₄" onto edge of surface and can accommodate a maximum surface thickness of 1¹/₂". Module may be clamped onto any side or back table edge, but installation is not recommended on tabletop backs with modesty panels, or on tabletop edges which will be ganged to other tables. Modules must be ordered as an accessory, separate from the table. The Dean Clamp-On power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dean Clamp-On power module with Pattern connector end is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dean In-Surface Power Modules

Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean In-Surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. Dean In-Surface power module for Pattern electrical is only available on fixed-height training tables. The Dean In-Surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Dean in-surface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Dean Undersurface Power Modules

The Dean undersurface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. The module mounts flush under the bottom, front edge of the tabletop with two #12 x 3/4" screws through the mounting plate. The module is made of a molded plastic body with an anodized aluminum housing and a steel mounting plate. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. Dean Undersurface power module for Pattern electrical is only available for fixed-height training tables. The Dean Undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dean Undersurface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dubbel™ Undersurface Power Modules

Dubbel Undersurface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 5.25" deep by 1.75" tall, and mounts flush with the bottom, front edge of the tabletop with two #10 x 3/4" screws included. The module is made of a molded plastic body with a molded plastic face. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. Dubbel Undersurface power module for Pattern electrical is only available for fixed-height training tables. The Dubbel Undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dubbel power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Nacre In-Surface Pop-Up Power Modules

Nacre In-Surface Pop-Up power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand data jacks. Data tree ships with Nacre power modules, providing different data face plates to accompany different data connectors. Data connectors are not supplied with the module and are purchased separately by the customer. The Nacre power module is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout. The power module is press fit into the worksurface cutout and secured with spring loaded metal tabs. The module has a molded plastic face that can rotate via a dampened spring-loaded mechanism inside a molded plastic sleeve. Nacre In-Surface Pop-Up power module for Pattern electrical is only available on fixed-height training tables. The Nacre in-surface pop-up power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Nacre in-surface pop-up power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Node® In-Surface Power Modules

Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. Node In-Surface power module for Pattern electrical is only available on fixed-height training tables. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Node power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Electrical

Snap-In RPT Power Module

Snap-in module consists of two simplex receptacle ports (rated at 15 amps/125 volts).

Snap-in RPT fits securely in user facing cutouts located on the wire trough, mounted under the table. The Snap-In RPT power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed. Snap-In RPT module is only available for use with the Pattern Electrical System.

Cord length options are 20" or 40" with a Pattern connector. Snap-In RPT power modules are available in Black only.

Pattern Single-Circuit Electrical System

Pattern electrical system is a single circuit system that allows up to 18 power modules or 50' of power jumpers to be powered from a single 15-amp power supply cord (in either direction). Tables in a single run that are using the same infeed must be ganged together while using proper wire management between them. Tables ordered with the Pattern Electrical System include associated Pattern power modules, gangers, and wire management. Pattern infeeds and table-to-table jumper quantities must be ordered separate from the tables and depend on how many total tables and configuration.

Pattern is a non-sequential system with a ground fault interrupter (GFI/GFCI) compatible infeed. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/CSA-C22.2 No. 308 (Canada).

Pattern Power Distribution Blocks

Pattern power distribution blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits

Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits

The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run. Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp plug on one end of the 108" cord and a keyed connector at the opposite end of the cord. A Pattern quick-release tool is also included to assist with disconnecting connector ends from distribution blocks.

Modesty Panels

Polyester Felt Modesty Panels

Polyester felt modesty panels are constructed from a sound-absorbing 100% polyester felt. They have a rectangular shape with sizes that vary depending on overall table width and height. They mount under the back edge of the table and run the full length (undersized by 1/2" on each end). Tables that are 29" & 36" high use 9 1/4" tall modest panels, while tables 42" high use 14 3/4" tall modesty panels. The felt modesty panels on nesting and fixed tables are hung on two or three 18-gauge steel mounting hooks, which allow the modesty panel to rotate 90° when the table is flipped-up and nested. The panels have a density of 0.5 lb/ft² and are sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A-Mount testing method) and an NRC rating of .81 with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Felt modesty panel color options are found in the Tributaire Collection Pricelist, on the Product Color Options page.

TECHNICAL SPECIFICATIONS

Modesty Panels

Laminate Modesty Panels

Laminated modesty panels are made of high-density particle board covered in high-pressure laminate with matching edge banding. They have a rectangular shape with a size that varies depending on overall table width and height. They mount under the back edge of the table and run the full length (undersized by 1/2" on each end). Tables that are 29" & 36" high use 9 1/4" tall modest panels while tables 42" high use 14 3/4" tall modesty panels. The modesty panel on nesting tables is mounted using two or three hinged brackets which rotate 90° while the tabletop is flipped-up and nested. The modesty panel on non-nesting tables always sits perpendicular to the top and mounts using two or three 14-gauge formed steel brackets. The modesty panel's laminate color matches that of the tabletop.

Ganging Mechanism

Ganging kits consist of two ganging paddles and six ganging pegs. Once installation of the pegs is complete, the ganging paddles can be used without tools to gang and un-gang tables. Ganging is required for tables using the Pattern single-circuit electrical system but is optional for all other tables. Tabletops are pre-drilled for placement of ganging pegs. One ganging kit per joining table is required. All ganging accessories are included for tables with Pattern electrical and are ordered as a separate accessory for all others. Gangers are self-storing under the table when not in use.

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop to the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a table leg using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management.

Wire Troughs

The wire trough is constructed of formed 18-gauge steel, is powder-coat painted and is mounted under a tabletop to help secure loose cords. Troughs have openings on all sides which allow users to access cords while keeping them managed and out of the way. Each trough also has one or two special sized cutouts that allow the Snap-In RPT power module to be secured in place. Troughs and mounting hardware are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Each trough is sized for the corresponding table base. Troughs are powder-coat painted with color options that are found in the Tributaire Collection Pricelist, on the Product Color Options page.

Cable Troughs

The cable trough is a cable and cord management accessory that is only provided on pneumatic-adjustable height tables. Constructed of 18-gauge steel with a black powder-coated finish. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for cable trough locations. Provides multiple access holes to feed wires, and cables.

Velcro Wire Manager

The Velcro wire manager is constructed of a 2" x 4 1/2" Velcro hook and loop material and is mounted under the tabletop using screws, or with it's adhesive backing. Tabletops are pre-drilled for locating screw mounted wire managers, but a wire manager may be installed in any convenient location. Two or four Velcro wire managers are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Simple wire clips are provided in place of Velcro wire managers for tables that have a power module with 3-prong plug.

TJHAA Rectangular Tables - 18"D

- Training tables designed for maximum leg spacing for the width of the table
- Chrome bases are plated foot only, leg upright will be painted
- Gangers ordered separately
- 60", 66", 72" tables include work surface stiffener channel
- Fixed base at 29" high
- KN edge on user side only, all other edges 74P
- Power modules include wire management (when applicable)
- Laminate modesty panel will be same finish as surface (when applicable)

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
 NCH - No chrome base
 WCH - With chrome base; add \$126
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
 G - Glides
 C - Casters
- H** Select glide or caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.
 NNN - No grommets, power, wire management/No cutouts
 WMO - Wire management only-no cutouts; add \$70
 MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
 MU1 - Module, Dean under-surface w/USB-A/C (1); add \$465
 MB1 - Module, Dubbel under-surface w/dual USB-A/C (1); add \$280
 MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
 MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
 GA1 - Grommet, Nacre (1); add \$222

- GD1** - Grommet, Dean (1); add \$222
G01 - Grommet, Node (1); add \$153
- J** Select grommet/module color.
 Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
 9 - 9' cord length
 15 - 15' cord length
- L** Select modesty panel.
 NMP - No modesty panel
 PMP - Polyester felt modesty panel
 LMP - Laminate modesty panel
 See pricing column for full modesty panel upcharge.
- M** Select modesty panel color (only if polyester felt panel is chosen).
 Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
WCH - With chrome base; add \$137
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.
- G** Select glides or casters.
G - Glides
C - Casters
- H** Select glide or caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.
NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts; add \$70
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
GA1 - Grommet, Nacre (1); add \$222
GD1 - Grommet, Dean (1); add \$222
GO1 - Grommet, Node (1); add \$153
- J** Select grommet/module color.

Refer to the **Product Color Options** page in this price list.

- K** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

- L** Select modesty panel.
NMP - No modesty panel

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
 NCH - No chrome base
 WCH - With chrome base; add \$137
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
 G - Glides
 C - Casters
- H** Select glide or caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.
 NNN - No grommets, power, wire management/No cutouts
 WMO - Wire management only-no cutouts; add \$70
 MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
 MU1 - Module, Dean under-surface w/USB-A/C (1); add \$465
 MB1 - Module, Dubbel under-surface w/dual USB-A/C (1); add \$280
 MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
 MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
 GA1 - Grommet, Nacre (1); add \$222

- GD1** - Grommet, Dean (1); add \$222
G01 - Grommet, Node (1); add \$153
- J** Select grommet/module color.
 Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
 9 - 9' cord length
 15 - 15' cord length
- L** Select modesty panel.
 NMP - No modesty panel
 PMP - Polyester felt modesty panel
 See pricing column for full modesty panel upcharge.
- M** Select modesty panel color (only if polyester felt panel is chosen).
 Refer to the **Product Color Options** page in this price list.

TJUNA
Rectangle Table w/Single Circuit - 24"D

- One grommet or module per table unit
- A trough, velcro wire managers, gangers and all electrical accessories (excluding infeed kits and table-to-table jumpers) are included
- Infeed kits and table-to-table jumpers ordered separately
- Training tables are designed for maximum leg spacing for the width of the table
- Chrome bases are plated foot and mounting head only, leg upright will be painted
- Nesting base at 42" high
- KN edge on user side only, all other edges 74P
- Laminate modesty panel will be same finish as surface (when applicable)
- Recommended stool height is 30" stool

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
• The absence of the indicates that no choice is required.
• Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
WCH - With chrome base; add \$137
- F** Select leg finish.
Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
G - Glides
C - Casters
- H** Select glide or caster color.
Refer to the **Product Color Options** page in this price list.
- I** Select power option.
PMD1 - Pattern module, Dean in-surface (1); add \$520
PMU1 - Pattern module, Dean under-surface (1); add \$593
PMB1 - Pattern module, Dubbel under-surface (1); add \$432
PMA1 - Pattern module, Nacre pop-up (1); add \$700
PMO1 - Pattern module, Node in-surface (1); add \$407
PSA1 - Pattern black snap-in RPT (1) & grommet, Nacre (1); add \$293
PSA5 - Pattern black snap-in RPT (1), Pattern Dean under-surface (1) & grommet, Nacre (1); add \$847

- PSA3** - Pattern black snap-in RPT (1), Pattern Dubbel under-surface (1) & grommet, Nacre (1); add \$724
PSA2 - Pattern black snap-in RPT (2) & grommet, Nacre (1); add \$470
PSA6 - Pattern black snap-in RPT (2), Pattern Dean under-surface (1) & grommet, Nacre (1); add \$1299
PSA4 - Pattern black snap-in RPT (2), Pattern Dubbel under-surface (1) & grommet, Nacre (1); add \$814
- J** Select grommet/module color.
Refer to the **Product Color Options** page in this price list.
- K** Select modesty panel.
NMP - No modesty panel
PMP - Polyester felt modesty panel
LMP - Laminate modesty panel
See pricing column for full modesty panel upcharge.
- L** Select modesty panel color (only if polyester felt panel is chosen).

Refer to the **Product Color Options** page in this price list.

PRODUCT SPECIFICATIONS

Tributaire Collection

Post-Leg Tables

April 2025

TECHNICAL SPECIFICATIONS

Table Legs

Post-leg table legs feature a stylized pill-shape, 8-gauge extruded aluminum tube. At the top of the post-leg extrusion is a 7-gauge steel table mounting plate, secured using $\frac{5}{16}$ -18 x $2\frac{1}{2}$ " Torx flat head screws. The table mounting plate then secures to the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes. At the bottom of the leg extrusion is a cast aluminum cap, secured to the extrusion using $\frac{5}{16}$ -18 x $1\frac{1}{4}$ " Torx flat head screws. The aluminum cap is threaded to accept either casters or glides. Legs are specified and sized for either casters or glides, and glides/casters are not interchangeable, or table height is affected. Post legs run from table mounting plate to the cap for each caster or glide and are available in table height options of 29", 36", and 42". Each post leg table has three, four, or six table legs depending on the size and shape of the tabletop. If the table is 30, 36, or 42" deep and has six legs, the middle pair of legs will feature two stylized pill-shape, 8-gauge extruded aluminum tubes on one 7-gauge mounting plate.

Leg Finish

Legs on post leg tables are powder-coat painted. Mounting plates on post leg tables are always powder-coat painted with black textured paint.

See Product Color Options in the Tributaire Collection pricelist for color options offered.

Tabletops

Tabletops are nominal $1\frac{1}{4}$ " overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core for standard tops is 45 lb/cu ft. Tributaire post-leg tables are available with the 2 mm (74P) edge band or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface, which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Casters

All post-leg tables specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are not compatible or interchangeable with glides, as glide and caster installed heights are different. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with $\frac{1}{2}$ " diameter friction ring fit posts, requiring no tools to install.

Low Profile Glides

All legs specified with glides are shipped with four adjustable-height glides. Glides are $1\frac{1}{2}$ " in diameter at the base and have a $\frac{5}{16}$ -18 x $\frac{3}{4}$ " threaded stem, allowing for an adjustment range of $\frac{1}{2}$ ". Glides are only available in black nylon.

TECHNICAL SPECIFICATIONS

Grommets

Dean & Nacre Flip-Top Grommets

Flip-top grommets are surface-mounted, constructed of 18-gauge steel and have a flip-up door. The grommets may be fastened with wood screws into the 6.94" x 3" tabletop cutouts. Flip-top grommets are sized the same as Nacre or Dean power modules (sold separately), which allows for retrofitting of corresponding power modules at a later date. The grommet's flip-up door allows cords to pass through to a power source while closed, and allows for more cord routing space when the flip-up door is opened. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommets are field installed.

Flip-top grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page.

Node Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommet is field installed.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Dean® Clamp-On Power Modules

Dean clamp-on power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module is 5.51" wide by 2.65" deep by 2.75" high (above the tabletop). The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module face at a right angle to the worksurface and uses two thumb screws underneath for attachment, without the need for a table cutout. Clamp is 3" wide, extends $1\frac{3}{4}$ " onto edge of surface and can accommodate a maximum surface thickness of $1\frac{1}{2}$ ". Module may be clamped onto any side or back table edge, but installation is not recommended on tabletop backs with modesty panels, or on tabletop edges which will be ganged to other tables. Modules must be ordered as an accessory, separate from the table. The Dean Clamp-On power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dean Clamp-On power module with Pattern connector end is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dean In-Surface Power Module

Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean In-Surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. The Dean In-Surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Dean in-surface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Dean Undersurface Power Modules

The Dean undersurface power module consists of two simplex receptacles ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. The module mounts flush under the bottom, front edge of the tabletop with two #12 x 3/4" screws through the mounting plate. The module is made of a molded plastic body with an anodized aluminum housing and a steel mounting plate. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dean Undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dean Undersurface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Double Ellora B In-Surface Power Module

Double Ellora B In-Surface power module is a two-sided, in-surface power module which consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB, one USB-A and one USB-C port, 2 amps per port, on each side of the double power module. Module area is 10.19" long by 8.31" wide by 2.71" high when open. The pop-up module housing is of painted aluminum and steel, with smooth plastic faceplates for the ports. The surface trim and hinged soft-close covers are of painted aluminum. The covers allow for cable routing when closed. All metal surfaces of the module are powder-coat painted in four select colors. The Double Ellora B In-Surface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Double Ellora B In-Surface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dubbel™ Undersurface Power Module

Dubbel Undersurface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 5.25" deep by 1.75" tall, and mounts flush with the bottom, front edge of the tabletop with two #10 x 3/4" screws included. The module is made of a molded plastic body with a molded plastic face. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dubbel Undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Dubbel power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 40" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Nacre In-Surface Pop-Up Power Module

Nacre In-Surface Pop-Up power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand data jacks. Data tree ships with Nacre power modules, providing different data face plates to accompany different data connectors. Data connectors are not supplied with the module and are purchased separately by the customer. The Nacre power module is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout. The power module is press fit into the worksurface cutout and secured with spring loaded metal tabs. The module has a molded plastic face that can rotate via a dampened spring-loaded mechanism inside a molded plastic sleeve. The Nacre in-surface pop-up power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Nacre in-surface pop-up power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Node® In-Surface Power Module

Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Node power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Snap-In RPT Power Module

Snap-in module consists of two simplex receptacle ports (rated at 15 amps/125 volts). Snap-in RPT fits securely in user facing cutouts located on the wire trough, mounted under the table. The Snap-In RPT power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed. Snap-In RPT module is only available for use with the Pattern Electrical System.

Cord length options are 20" or 40" with a Pattern connector. Snap-In RPT power modules are available in Black only.

Electrical

Pattern Single-Circuit Electrical System

Pattern electrical system is a single circuit system that allows up to 18 power modules or 50' of power jumpers to be powered from a single 15-amp power supply cord (in either direction). Tables in a single run that are using the same infeed must be ganged together while using proper wire management between them. Tables ordered with the Pattern Electrical System include associated Pattern power modules, gangers, and wire management. Pattern infeeds and table-to-table jumper quantities must be ordered separate from the tables and depend on how many total tables and configuration.

Pattern is a non-sequential system with a ground fault interrupter (GFI/GFCI) compatible infeed. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/ CSA-C22.2 No. 308 (Canada).

Pattern Power Distribution Blocks

Pattern power distribution blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits

Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits

The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run. Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp plug on one end of the 108" cord and a keyed connector at the opposite end of the cord. A Pattern quick-release tool is also included to assist with disconnecting connector ends from distribution blocks.

TECHNICAL SPECIFICATIONS

Modesty Panels

Polyester Felt Modesty Panels

Polyester felt modesty panels are constructed from a sound-absorbing 100% polyester felt. They have a rectangular shape with sizes that vary depending on overall table width and height. They mount under the back edge of the table and run the full length (undersized by 1/2" on each end). Tables that are 29" & 36" high use 9 1/4" tall modest panels, while tables 42" high use 14 3/4" tall modest panels. The felt modesty panels on post-leg tables are hung on two or three 18-gauge steel mounting hooks. The panels have a density of 0.5 lb/ft² and are sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A-Mount testing method) and an NRC rating of .81 with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Felt modesty panel color options are found in the Tributaire Collection Pricelist, on the Product Color Options page.

Laminate Modesty Panels

Laminated modesty panels are made of high-density particle board covered in high-pressure laminate with matching edge banding. They have a rectangular shape with a size that varies depending on overall table width and height. They mount under the back edge of the table and run the full length (undersized by 1/2" on each end). Tables that are 29" & 36" high use 9 1/4" tall modest panels while tables 42" high use 14 3/4" tall modest panels. The modesty panel on post-leg tables are mounted using two or three hinged brackets which rotate 90° while the tabletop is flipped-up and nested. The modesty panel sits perpendicular to the top and mounts using two or three 14-gauge formed steel brackets. The modesty panel's laminate color matches that of the tabletop.

Ganging Mechanism

Ganging kits consist of two ganging paddles and six ganging pegs. Once installation of the pegs is complete, the ganging paddles can be used without tools to gang and un-gang tables. Ganging is required for tables using the Pattern single-circuit electrical system but is optional for all other tables. Tabletops are pre-drilled for placement of ganging pegs. One ganging kit per joining table is required. All ganging accessories are included for tables with Pattern electrical and are ordered as a separate accessory for all others. Gangers are self-storing under the table when not in use.

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop, down the leg and toward the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a table leg using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management.

Wire Trough

The wire trough is constructed of formed 18-gauge steel, is powder-coat painted and is mounted under a tabletop to help secure loose cords. Troughs have openings on all sides which allow users to access cords while keeping them managed and out of the way. Each trough also has one or two special sized cutouts that allow the Snap-In RPT power module to be secured in place. Troughs and mounting hardware are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Each trough is sized for the corresponding table base. Troughs are powder-coat painted with color options that are found in the Tributaire Collection Pricelist, on the Product Color Options page.

Velcro Wire Manager

The Velcro wire manager is constructed of a 2" x 4 1/2" Velcro hook and loop material and is mounted under the tabletop using screws, or with it's adhesive backing. Tabletops are pre-drilled for locating screw mounted wire managers, but a wire manager may be installed in any convenient location. Two or four Velcro wire managers are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Simple wire clips are provided in place of Velcro wire managers for tables that have a power module with 3-prong plug.

Rectangular Tables - 42"D

- Tables are designed for maximum leg spacing
- Glides/casters are not interchangeable
- Gangers ordered separately
- Post leg at 29" high
- KN edge on entire perimeter; tables are non-gangable
- Power modules include vertical and horizontal wire management (when applicable)
- 6 post legs for support; 2 center legs inset for leg clearance

A **B** **C** **D** **E** **F** **G** **H** **I** **J** **K** **L**

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
• The absence of the indicates that no choice is required.
• Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
- F** Select leg finish.
Refer to the **Product Color Options** page in this price list.
- G** Select glides or casters.
GLP - Glides - low profile
C - Casters
- H** Select caster color.
Refer to the **Product Color Options** page in this price list.
- I** Select power option.
NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts; add \$70
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$889
MT2 - Modules, Double Ellora B in-surface w/USB-A/C (2); add \$2808
MB2 - Modules, Dubbel under-surface w/ dual USB-A/C (2); add \$560
MD2 - Modules, Dean in-surface w/USB-A/C (2); add \$749
MU2 - Modules, Dean under-surface w/USB-A/C (2); add \$921
MO2 - Modules, Node in-surface w/USB-A/C (2); add \$560
- J** Select grommet/module color.
Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length
- L** Select modesty panel.
NMP - No modesty panel
- GA2** - Grommets, Nacre (2); add \$432
GD2 - Grommets, Dean (2); add \$432
GO2 - Grommets, Node (2); add \$293

- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
• The absence of the indicates that no choice is required.
• Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
- F** Select leg finish.
Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
C - Casters
- H** Select caster color.
Refer to the **Product Color Options** page in this price list.
- I** Select power option.
NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts; add \$70
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$889
MT2 - Modules, Double Ellora B in-surface w/USB-A/C (2); add \$2808
MB2 - Modules, Dubbel under-surface w/ dual USB-A/C (2); add \$560
MD2 - Modules, Dean in-surface w/USB-A/C (2); add \$749
MU2 - Modules, Dean under-surface w/USB-A/C (2); add \$921
MO2 - Modules, Node in-surface w/USB-A/C (2); add \$560

- GA2** - Grommets, Nacre (2); add \$432
- GD2** - Grommets, Dean (2); add \$432
- GO2** - Grommets, Node (2); add \$293
- J** Select grommet/module color.
Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length
- L** Select modesty panel.
NMP - No modesty panel

HOW TO ORDER

- Indicate the following information on order form:
1. Quantity of each item.
 2. Model number, including options. See "How To Build a Model Number".
 3. Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.

74P - 74P edge
KN - Knife edge
- B** Select edge style.

74P - 74P edge
KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.

NCH - No chrome base
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.

GLP - Glides - low profile
C - Casters
- H** Select caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.

NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts; add \$70
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
GA1 - Grommet, Nacre (1); add \$222
GD1 - Grommet, Dean (1); add \$222
GO1 - Grommet, Node (1); add \$153
- J** Select grommet/module color.
 Refer to the **Product Color Options** page in this

price list.

- K** Select cord length (feet).

9 - 9' cord length
15 - 15' cord length

HOW TO ORDER

- Indicate the following information on order form:
1. Quantity of each item.
 2. Model number, including options. See "How To Build a Model Number".
 3. Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.

- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
- F** Select leg finish.
Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
C - Casters
- H** Select caster color.
Refer to the **Product Color Options** page in this price list.
- I** Select power option.
NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts; add \$70
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$889
MT2 - Modules, Double Ellora B in-surface w/USB-A/C (2); add \$2808
MD2 - Modules, Dean in-surface w/USB-A/C (2); add \$749
MO2 - Modules, Node in-surface w/USB-A/C (2); add \$560
GA2 - Grommets, Nacre (2)
GD2 - Grommets, Dean (2); add \$432
GO2 - Grommets, Node (2); add \$293

- J** Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

- K** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

Rectangle Table w/Single Circuit - 24"D

- One grommet or module per table unit
- A trough, velcro wire managers, gangers and all electrical accessories (excluding infeed kits and table-to-table jumpers) are included
- Infeed kits and table-to-table jumpers ordered separately
- Tables are designed for maximum leg spacing
- Glides/casters are not interchangeable
- Post leg at 29" high
- KN edge on user side only, all other edges 74P
- Laminate modesty panel will be same finish as surface (when applicable)

A B C D E F G H I J K L

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.

- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
74P - 74P edge
KN - Knife edge
- B** Select edge style.
- C** Select edge color.
- D** Select surface finish. Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
- F** Select leg finish. Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
C - Casters
- H** Select caster color. Refer to the **Product Color Options** page in this price list.
- I** Select power option.
PM01 - Pattern module, Dean in-surface (1); add \$520
PMU1 - Pattern module, Dean under-surface (1); add \$593
PMB1 - Pattern module, Dubbel under-surface (1); add \$432
PMA1 - Pattern module, Nacre pop-up (1); add \$737
PM01 - Pattern module, Node in-surface (1); add \$439
PSA1 - Pattern black snap-in RPT (1) & grommet, Nacre (1); add \$293
PSA5 - Pattern black snap-in RPT (1), Pattern Dean under-surface (1) & grommet, Nacre (1); add \$847
PSA3 - Pattern black snap-in RPT (1),

- Pattern Dubbel under-surface (1) & grommet, Nacre (1); add \$724
PSA2 - Pattern black snap-in RPT (2) & grommet, Nacre (1); add \$470
PSA6 - Pattern black snap-in RPT (2), Pattern Dean under-surface (1) & grommet, Nacre (1); add \$1299
PSA4 - Pattern black snap-in RPT (2), Pattern Dubbel under-surface (1) & grommet, Nacre (1); add \$814
- I** Select grommet/module color. Refer to the **Product Color Options** page in this price list.
- K** Select modesty panel.
NMP - No modesty panel
PMP - Polyester felt modesty panel
LMP - Laminate modesty panel
 See pricing column for full modesty panel upcharge.
- L** Select modesty panel color (only if polyester felt panel is chosen). Refer to the **Product Color Options** page in this

price list.

PRODUCT SPECIFICATIONS

Tributaire Collection Conference Tables

April 2025

TECHNICAL SPECIFICATIONS

Table Bases

Conference table bases feature a pair of cast aluminum feet joined together with a cross-brace of pill-shaped, tubular steel. Each foot contains a machined-in side pocket to accept the tubular cross-brace. Extending up from each foot of the foot and cross-brace set, is a stylized pill-shaped leg upright of 8-gauge extruded aluminum. At each side of the assembly, the foot, cross-brace and leg upright are secured together from underneath using $\frac{5}{16}$ -18 x 5" hex washer head screws. Atop each extruded aluminum leg upright is a 7-gauge steel table mounting plate, secured to the upright using $\frac{3}{16}$ -18 x 2 $\frac{1}{2}$ " Torx flat head screws. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes. Each conference table base assembly is joined to the next base with a rectangular shaped stringer of tubular seam-welded steel. Stringer attachment at each base assembly is at a welded-on lower bracket on the foot-to-foot steel cross-brace, using two $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws at each end of the stringer.

Each conference table foot extends out 13.5" from its respective extruded aluminum leg upright and is threaded at the floor level to accept low profile adjustable glides. Steel cross-braces between feet are different lengths depending on table width. Each conference table has four to twelve table base assemblies depending on table length. Conference table bases support tables at 29" high.

Base Finishes

Conference table bases are either all powder-coat painted, or are chrome-plated aluminum feet and leg columns, with a black powder-coat texture painted stringers.

See Product Color Options page in the Tributaire Collection Pricelist for color options offered.

Tabletops

Tabletops are nominal 1 $\frac{1}{4}$ " overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core in standard tops is 45 lb/cu ft. Tributaire conference tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface, which allows for a power module or a grommet cover. Tables above 144" consist of two separate pieces that must be joined together during assembly.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Low Profile Glides

All legs specified with glides are shipped with adjustable-height glides. Glides are 1 $\frac{1}{2}$ " in diameter at the base and have a $\frac{3}{16}$ -18 x $\frac{3}{4}$ " threaded stem, allowing for an adjustment range of $\frac{1}{2}$ ". Glides are only available in black nylon.

TECHNICAL SPECIFICATIONS

Grommets

Dean & Nacre Flip-Top Grommets

Flip-top grommets are surface-mounted, constructed of 18-gauge steel and have a flip-up door. The grommets may be fastened with wood screws into the 6.94" x 3" tabletop cutouts. Flip-top grommets are sized the same as Nacre or Dean power modules (sold separately), which allows for retrofitting of corresponding power modules at a later date. The grommet's flip-up door allows cords to pass through to a power source while closed, and allows for more cord routing space when the flip-up door is opened. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommets are field installed.

Flip-top grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page.

Node Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommet is field installed.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Dean In-Surface Power Module

Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean In-Surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. The Dean In-Surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Dean in-surface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20' with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Double Ellora B In-Surface Power Module

Double Ellora B In-Surface power module is a two-sided, in-surface power module which consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB, one USB-A and one USB-C port, 2 amps per port, on each side of the double power module. Module area is 10.19" long by 8.31" wide by 2.71" high when open. The pop-up module housing is of painted aluminum and steel, with smooth plastic faceplates for the ports. The surface trim and hinged soft-close covers are of painted aluminum. The covers allow for cable routing when closed. All metal surfaces of the module are powder-coat painted in four select colors. The Double Ellora B In-Surface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Double Ellora B in-surface power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20' with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Nacre In-Surface Pop-Up Power Module

Nacre In-Surface Pop-Up power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand data jacks. Data tree ships with Nacre power modules, providing different data face plates to accompany different data connectors. Data connectors are not supplied with the module and are purchased separately by the customer. The Nacre power module is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout. The power module is press fit into the worksurface cutout and secured with spring loaded metal tabs. The module has a molded plastic face that can rotate via a dampened spring-loaded mechanism inside a molded plastic sleeve. The Nacre in-surface pop-up power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Nacre in-surface pop-up power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Node® In-Surface Power Module

Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. The Node power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug, or is 20" with a Pattern connector. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Electrical

Pattern Single-Circuit Electrical System

Pattern electrical system is a single circuit system that allows up to 2 power modules to be powered from a single 15-amp power supply cord. Tables ordered with the Pattern Electrical System include associated Pattern power modules and wire management. Pattern infeeds must be ordered separate from the tables and depend on how many total tables and configuration.

Pattern is a non-sequential system with a ground fault interrupter (GFI/GFCI) compatible infeed. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/CSA-C22.2 No. 308 (Canada).

Pattern Power Distribution Blocks

Pattern power distribution blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, two grey Pattern power distribution blocks.

Pattern Power Infeed Kits

The Pattern power infeed kit must be ordered separately. Kit comes with two grey Pattern power distribution blocks, one power jumper, and Pattern power infeed cord. Power infeed consists of a 15-amp plug on one end of the 108" cord and a keyed connector at the opposite end of the cord. A Pattern quick-release tool is also included to assist with disconnecting connector ends from distribution blocks.

TECHNICAL SPECIFICATIONS

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop, down the leg and toward the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a table leg using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management.

Velcro Wire Manager

The Velcro wire manager is constructed of a 2" x 4 1/2" Velcro hook and loop material and is mounted under the tabletop using screws, or with it's adhesive backing. Tabletops are pre-drilled for locating screw mounted wire managers, but a wire manager may be installed in any convenient location. Two or four Velcro wire managers are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Simple wire clips are provided in place of Velcro wire managers for tables that have a power module with 3-prong plug.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.

- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH -No chrome base
WCH -With chrome base
 60-84"Width WCH; add \$420
 96-144"Width WCH; add \$578
- F** Select leg finish.

Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
- H** Select power option.
NNN - No grommets, power, wire management/No cutouts
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
MT1 - Module, Double Ellora B in-surface w/USB-A/C (1); add \$1430
MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
GA1 - Grommet, Nacre (1); add \$222
GD1 - Grommet, Dean (1); add \$222
GO1 - Grommet, Node (1); add \$153
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$889
MT2 - Modules, Double Ellora B in-surface w/USB-A/C (2); add \$2808
MD2 - Modules, Dean in-surface w/USB-

- A/C (2); add \$749
MO2 - Modules, Node in-surface w/USB-A/C (2); add \$560
GA2 - Grommets, Nacre (2); add \$432
GD2 - Grommets, Dean (2); add \$432
GO2 - Grommets, Node (2); add \$293
- I** Select grommet/module color.
 Refer to the **Product Color Options** page in this price list.
- J** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
• The absence of the indicates that no choice is required.
• Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
WCH - With chrome base
60-84"Width WCH; add \$420
96-144"Width WCH; add \$578
- F** Select leg finish.

Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
- H** Select power option.
NNN - No grommets, power, wire management/No cutouts
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
MT1 - Module, Double Ellora B in-surface w/USB-A/C (1); add \$1430
MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$445
MO1 - Module, Node in-surface w/USB-A/C (1); add \$280
GA1 - Grommet, Nacre (1); add \$222
GD1 - Grommet, Dean (1); add \$222
GO1 - Grommet, Node (1); add \$153
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$889
MT2 - Modules, Double Ellora B in-surface w/USB-A/C (2); add \$2808
MD2 - Modules, Dean in-surface w/USB-

- A/C (2); add \$749
- MO2 - Modules, Node in-surface w/USB-A/C (2); add \$560
- GA2 - Grommets, Nacre (2); add \$432
- GD2 - Grommets, Dean (2); add \$432
- GO2 - Grommets, Node (2); add \$293

I Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

- J** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How to Build a Model Number".
- Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.
 74P - 74P edge
 KN - Knife edge

C Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.

D Select surface finish.
 Refer to the **Product Color Options** page in this price list.

E Select chrome base.
 NCH -No chrome base
 WCH -With chrome base
 96-144"Width WCH; add \$578
 156-168"Width WCH; add \$840
 192-240"Width WCH; add \$1155

F Select leg finish.
 Refer to the **Product Color Options** page in this price list.

G Select glides or casters.
 GLP - Glides - low profile

H Select power option.
 PMD2 - Pattern modules, Dean in-surface (2) ; add \$1413
 PMT2 - Pattern modules, Double Ellora B in-surface (2); add \$3550
 PMA2 - Pattern modules, Nacre pop-up (2) ; add \$1707
 PMO2 - Pattern modules, Node in-surface (2) ; add \$1185

I Select module color.
 Refer to the **Product Color Options** page in this price list.

PRODUCT SPECIFICATIONS

Tributaire Collection

Y-Leg Tables

November 2025

TECHNICAL SPECIFICATIONS

Table Legs

Y-legs feature a pair of Y-angled cast aluminum feet, each joint together at the underside using a small bent steel bracket where the feet are close together. Extending up from each foot is a stylized pill-shaped upright of 8-gauge extruded aluminum. Each table foot extends 13¹/₂" from its respective aluminum upright. On the underside of each foot, the foot is secured to the leg upright using ⁵/₁₆-18 x 4" hex washer head screws. Feet are specified to accept either casters or glides; these are not interchangeable. The stylized aluminum extrusions run from the foot to the table mounting plate, and are available in table height options 29", 36", & 42". The mounting plate atop of each pair of extruded aluminum legs is made of 7-gauge steel, secured to each aluminum leg using ⁵/₁₆-18 x 2" hex washer head screws. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes.

Leg Finish

Y-legs are either all powder-coat painted, or are chrome-plated aluminum feet and leg columns, with a textured black powder-coat painted mounting plate.

See Product Color Options in the Tributaire Collection pricelist for color options offered.

Tabletops

Tabletops are nominal 1¹/₄" overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core in standard tops is 45 lb/cu ft. Tributaire conference tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface, which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Casters

All Y-leg tables specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2¹/₂" (65 mm) in diameter, with a total mounted height of 2³/₄" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are not compatible or interchangeable with glides, as glide and caster installed heights are different. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with ¹/₂" diameter friction ring fit posts, requiring no tools to install.

Low Profile Glides

All legs specified with glides are shipped with four adjustable-height glides. Glides are 1¹/₂" in diameter at the base and have a ⁵/₁₆-18 x ³/₄" threaded stem, allowing for an adjustment range of ¹/₂". Glides are only available in black nylon.

TECHNICAL SPECIFICATIONS

Grommets

Dean & Nacre Flip-Top Grommets

Flip-top grommets are surface-mounted, constructed of 18-gauge steel and have a flip-up door. The grommets may be fastened with wood screws into the 6.94" x 3" tabletop cutouts. Flip-top grommets are sized the same as Nacre or Dean power modules (sold separately), which allows for retrofitting of corresponding power modules at a later date. The grommet's flip-up door allows cords to pass through to a power source while closed, and allows for more cord routing space when the flip-up door is opened. One or two grommet ship depending on the number of cutouts specified per tabletop.

Flip-top grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page.

Node Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One or two grommets ship, depending on the number of cutouts specified per tabletop.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Dean In-Surface Power Module

Dean in-surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean in-surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. The Dean in-surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dean Undersurface Power Module

The Dean undersurface power module consists of two simplex receptacles ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. The module mounts flush under the bottom, front edge of the tabletop with two #12 x ³/₄" screws through the mounting plate. The module is made of a molded plastic body with an anodized aluminum housing and a steel mounting plate. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dean undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dubbel Undersurface Power Module

Dubbel undersurface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 5.25" deep by 1.75" tall, and mounts flush with the bottom, front edge of the tabletop with two #10 x ³/₄" screws included. The module is made of a molded plastic body with a molded plastic face. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dubbel undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Nacre In-Surface Pop-Up Power Module

Nacre in-surface pop-up power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand data jacks. Data tree ships with Nacre power modules, providing different data face plates to accompany different data connectors. Data connectors are not supplied with the module and are purchased separately by the customer. The Nacre power module is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout. The power module is press fit into the worksurface cutout and secured with spring loaded metal tabs. The module has a molded plastic face that can rotate via a dampened spring-loaded mechanism inside a molded plastic sleeve. The Nacre in-surface pop-up power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed. The Nacre in-surface pop-up power module with the Pattern connector is rated at 15 amps/120 volts and is ETL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Node® In-Surface Power Module

Node in-surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop, down the leg and toward the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a table leg using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management.

Velcro Wire Manager

The Velcro wire manager is constructed of a 2" x 4 1/2" Velcro hook and loop material and is mounted under the tabletop using screws, or with it's adhesive backing. Tabletops are pre-drilled for locating screw mounted wire managers, but a wire manager may be installed in any convenient location. Two or four Velcro wire managers are included (and must be used) for tables with the Pattern single-circuit electrical system, but must be ordered as a separate accessory for all other tables. Simple wire clips are provided in place of Velcro wire managers for tables that have a power module with 3-prong plug.

- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
 NCH - No chrome base
 WCH - With chrome base
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.
- G** Select glides or casters.
 GLP - Glides - low profile
 C - Casters
- H** Select caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.
 NNN - No grommets, power, wire management/No cutouts
 WMO - Wire management only-no cutouts
 MU1 - Module, Dean under-surface w/USB-A/C (1); add \$439
 MB1 - Module, Dubbel under-surface w/ dual USB-A/C (1); add \$264
 MD1 - Module, Dean in-surface w/USB-A/C (1); add \$354
 MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$420
 MO1 - Module, Node in-surface w/USB-A/C (1); add \$264
 GA1 - Grommet, Nacre (1); add \$209
 GD1 - Grommet, Dean (1); add \$209
- J** Select grommet/module color.
 Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
 9 - 9' cord length
 15 - 15' cord length

- G01** - Grommet, Node (1); add \$144
- MA2** - Modules, Nacre pop-up w/USB-A/C (2); add \$839
- MB2** - Modules, Dubbel under-surface w/ dual USB-A/C (2); add \$528
- MD2** - Modules, Dean in-surface w/USB-A/C (2); add \$707
- MU2** - Modules, Dean under-surface w/USB-A/C (2); add \$869
- MO2** - Modules, Node in-surface w/USB-A/C (2); add \$528
- GA2** - Grommets, Nacre (2); add \$408
- GD2** - Grommets, Dean (2); add \$408
- G02** - Grommets, Node (2); add \$276

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of the indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.

74P - 74P edge
KN - Knife edge
- C** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- D** Select surface finish.
 Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
WCH - With chrome base
- F** Select leg finish.
 Refer to the **Product Color Options** page in this price list.

- G** Select glides or casters.
GLP - Glides - low profile
C - Casters
- H** Select caster color.
 Refer to the **Product Color Options** page in this price list.
- I** Select power option.
NNN - No grommets, power, wire management/No cutouts
WMO - Wire management only-no cutouts
MU1 - Module, Dean under-surface w/USB-A/C (1); add \$439
MB1 - Module, Dubbel under-surface w/ dual USB-A/C (1); add \$264
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$354
MA1 - Module, Nacre pop-up w/USB-A/C (1); add \$420
MO1 - Module, Node in-surface w/USB-A/C (1); add \$264
GA1 - Grommet, Nacre (1); add \$209
GD1 - Grommet, Dean (1); add \$209

- G01** - Grommet, Node (1); add \$144
MA2 - Modules, Nacre pop-up w/USB-A/C (2); add \$839
MB2 - Modules, Dubbel under-surface w/ dual USB-A/C (2); add \$528
MD2 - Modules, Dean in-surface w/USB-A/C (2); add \$707
MU2 - Modules, Dean under-surface w/USB-A/C (2); add \$869
MO2 - Modules, Node in-surface w/USB-A/C (2); add \$528
GA2 - Grommets, Nacre (2); add \$408
GD2 - Grommets, Dean (2); add \$408
G02 - Grommets, Node (2); add \$276
- J** Select grommet/module color.
 Refer to the **Product Color Options** page in this price list.
- K** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

Shipping
 Ships knocked down, FOB Bonduel, WI 54107, freight prepaid.

TECHNICAL SPECIFICATIONS

Table Base

C-Leg Base (café tables)

Café C-leg bases feature four cast aluminum feet and framework making up two pair of connected leg sets. To form each connected leg set, a pair of cast aluminum feet are joined together with a cross-brace of pill-shaped, tubular steel. Each foot contains a machined-in side pocket to accept the tubular cross-brace. Extending up from each foot of the feet and cross-brace set is a stylized pill-shaped leg upright of 8-gauge extruded aluminum. At each side of the assembly, the foot, cross-brace and leg upright are secured together from underneath using $\frac{5}{16}$ -18 x 5" hex washer head screws. Atop each extruded aluminum leg upright is a 7-gauge steel table mounting plate, secured to the upright using $\frac{5}{16}$ -18 x 2 $\frac{1}{2}$ " Torx flat head screws. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes. Each connected leg set is joined to the next leg set with a rectangular shaped stringer of tubular seam-welded steel, making up the four foot base. Stringer attachment at each leg set is at a welded-on lower bracket on the foot-to-foot steel cross-brace, using two $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws at each end of the stringer.

Each C-leg table foot extends out 13.5" from its respective extruded aluminum leg upright and is threaded at the floor level to accept either casters or low-profile adjustable glides. Steel cross-braces between feet are the same length regardless of table width. Conference table bases support tables at 29" high.

X-Base (café tables)

Café X-bases are of cast aluminum, attached via four $\frac{5}{16}$ -18 x 5" hex washer head cap head screws from underneath to a 10-gauge extruded aluminum upright. The fluted upright is 2 $\frac{5}{8}$ " diameter and has the same profile as the mating surface of the X-base. Atop the upright, a 10" diameter cast aluminum table mounting plate is secured to the top of the upright using four $\frac{5}{16}$ -18 x 2" hex washer head cap head screws from above. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes.

The four feet of the X-base each extend out 15" from the center upright and each foot is threaded at the floor level to accept low-profile adjustable glides. The entire base assembly has an open channel in the center for seamless cable management. The upright's length varies depending if the table is 29", 36", or 42" high.

Double X-Base (café tables)

Double X-base tables consist of two individual X-base assemblies mounted to the underside of the table. Café X-bases are of cast aluminum, attached via four $\frac{5}{16}$ -18 x 5" hex washer head cap head screws from underneath to a 10-gauge extruded aluminum upright. The fluted upright is 2 $\frac{5}{8}$ " diameter and has the same profile as the mating surface of the X-base. Atop the upright, a 10" diameter cast aluminum table mounting plate is secured to the top of the upright using four $\frac{5}{16}$ -18 x 2" hex washer head cap head screws from above. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes.

The four feet of the X-base each extend out 15" from the center upright and each foot is threaded at the floor level to accept low-profile adjustable glides. The entire base assembly has an open channel in the center for seamless cable management. The upright's length varies depending if the table is 29", 36", or 42" high.

Base Finish

Café bases are either all powder-coat painted, or are chrome-plated. See Product Color Options in the Tributaire Collection pricelist for color options offered.

Tabletops

Laminate Tabletops

Laminate tabletops are nominal 1 $\frac{1}{4}$ " overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core in standard tops is 45 lb/cu ft. Tributaire conference tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface, which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Solid Wood Tabletops

Solid wood tabletops are finished to a nominal 1 $\frac{1}{4}$ " thickness and are made of either Ash, Walnut, Maple or White Oak, featuring the beauty of face grain on the top surface. All boards chosen for each tabletop are 3" to 8" wide, select grade and better, and each board runs the full length of the finished table. Boards are machine planed and edge jointed true, are glued and clamped, then all surfaces are pre-sanded. The tables are precisely cut to their final size, and fine-sanded smooth, including all edges and corners lightly softened prior to final finishing.

When specified, top, edge, and end surfaces are stained using a hand-wiped alkyd resin-based stain. For the final finishing process, all surfaces are first coated with two coats of clear high-build spray sealer, then the top and all edges receive an additional two coats of commercial grade clear finish. This accounts for a total of four coats on exposed surfaces, creating a durable a 2-3 mil finish thickness.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface which allows for a power module or grommet cover.

Wood species and stain options can be found in the Product Color Options page of the Tributaire Collection Price List.

Casters

All café tables specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are not compatible or interchangeable with glides, as glide and caster installed heights are different. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with $\frac{1}{2}$ " diameter friction ring fit posts, requiring no tools to install.

Low Profile Glides

All legs specified with glides are shipped with four adjustable-height glides. Glides are 1 $\frac{1}{2}$ " in diameter at the base and have a $\frac{5}{16}$ -18 x $\frac{3}{4}$ " threaded stem, allowing for an adjustment range of $\frac{1}{2}$ ". Glides are only available in black nylon.

Grommets

Dean & Nacre Flip-Top Grommets

Flip-top grommets are surface-mounted, constructed of 18-gauge steel and have a flip-up door. The grommets may be fastened with wood screws into the 6.94" x 3" tabletop cutouts. Flip-top grommets are sized the same as Nacre or Dean power modules (sold separately), which allows for retrofitting of corresponding power modules at a later date. The grommet's flip-up door allows cords to pass through to a power source while closed, and allows for more cord routing space when the flip-up door is opened. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommets are field installed.

Flip-top grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page.

TECHNICAL SPECIFICATIONS

Grommets (cont.)

Node Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommet is field installed.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Dean In-Surface Power Module

Dean in-surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be adapted to fit various brands of data jacks using the data tree, which ships with Dean in-surface power module. Data connectors are not supplied with the module and are purchased by the customer. The Dean In-Surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. The power module is secured to the worksurface with screws from the underside of the table. The module has a molded plastic faceplate with steel trim and an aluminum housing. The Dean In-Surface power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dean Undersurface Power Module

The Dean undersurface power module consists of two simplex receptacles ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. The module mounts flush under the bottom, front edge of the tabletop with two #12 x 3/4" screws through the mounting plate. The module is made of a molded plastic body with an anodized aluminum housing and a steel mounting plate. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dean undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. Dean undersurface power modules are only available on café tables with a double X-base.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Dubbel™ Undersurface Power Module

Dubbel Undersurface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 5.25" deep by 1.75" tall, and mounts flush with the bottom, front edge of the tabletop with two #10 x 3/4" screws included. The module is made of a molded plastic body with a molded plastic face. Tabletops come pre-drilled with holes at recommended mounting locations, but users may pre-drill mounting locations where they prefer. The Dubbel Undersurface power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed. Dubbel undersurface power modules are only available on café tables with a double X-base.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Nacre In-Surface Pop-Up Power Module

Nacre in-surface pop-up power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand data jacks. Data tree ships with Nacre power modules, providing different data face plates to accompany different data connectors. Data connectors are not supplied with the module and are purchased separately by the customer. The Nacre power module is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout. The power module is press fit into the worksurface cutout and secured with spring loaded metal tabs. The module has a molded plastic face that can rotate via a dampened spring-loaded mechanism inside a molded plastic sleeve. The Nacre in-surface pop-up power module with 3-prong plug is rated at 15 amps/120 volts, and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Node® In-Surface Power Module

Node in-surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop, down the leg and toward the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a C-leg or X-base using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management. Vertical wire managers are only available on café tables with a C-leg base or double X-base.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 - 74P - 74P edge
 - KN - Knife edge
- C** Select edge color. Refer to the **Product Color Options** page in this price list. Edge color offerings are based on edge style selections.
- D** Select surface finish. Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
 - NCH - No chrome base
 - WCH - With chrome base
 - 29"H WCH; add \$315
 - 36"H WCH; add \$368
 - 42"H WCH; add \$420
- F** Select leg finish. Refer to the **Product Color Options** page in this price list.
- G** Select glides.
 - GLP - Glides - low profile
- H** Select power option.
 - NNN - No grommets, power, wire management/No cutouts
 - M01 - Module, Node in-surface w/USB-A/C (1); add \$280
 - G01 - Grommet, Node (1); add \$153
- I** Select grommet/module color. Refer to the **Product Color Options** page in this price list.
- J** Select cord length (feet).
 - 9 - 9' cord length
 - 15 - 15' cord length

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.

- B** Select edge style.
74P - 74P edge
KN - Knife edge
- C** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- D** Select surface finish.
Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
NCH - No chrome base
WCH - With chrome base; add \$840
- F** Select leg finish.
Refer to the **Product Color Options** page in this price list.
- G** Select glides.
GLP - Glides - low profile
- H** Select power option.
NNN - No grommets, power, wire management/No cutouts
MD1 - Module, Dean in-surface w/USB-A/C (1); add \$375
MU1 - Module, Dean under-surface w/USB-A/C (1); add \$465
MB1 - Module, Dubbel under-surface w/dual USB-A/C (1); add \$280
MQ2 - Modules, Node in-surface w/USB-A/C (2); add \$560
G02 - Grommets, Node (2); add \$153
- I** Select grommet/module color.
Refer to the **Product Color Options** page in this price list.
- J** Select cord length (feet).
9 - 9' cord length
15 - 15' cord length

PRODUCT SPECIFICATIONS

Tributaire Collection

Occasional Tables

December 2025

TECHNICAL SPECIFICATIONS

Table Base

C-Leg Base

Occasional C-leg bases feature four cast aluminum feet making up two base sets. To form each base set, two cast aluminum feet are joined each to a stylized pill-shaped leg upright of 8-gauge extruded aluminum. At each foot of the base pair, the foot and leg uprights are secured together from underneath using $\frac{5}{16}$ -18 x 5" hex washer head screws. Atop each of the two extruded aluminum leg uprights is a 7-gauge steel table mounting plate, secured to both uprights using $\frac{5}{16}$ -18 x $1\frac{1}{4}$ " Torx flat head screws. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes.

Each C-leg table foot extends out 13.5" from its respective extruded aluminum leg upright and is threaded at the floor level to accept low-profile adjustable glides. Occasional table bases support tables at 14" or 18" high.

X-Base

Occasional X-bases are of cast aluminum, attached via four $\frac{5}{16}$ -18 x 5" hex washer head cap head screws from underneath to a 10-gauge extruded aluminum upright. The fluted upright is $2\frac{5}{8}$ " diameter and has the same profile as the mating surface of the X-base. Atop the upright, a 10" diameter cast aluminum table mounting plate is secured to the upright using four $\frac{5}{16}$ -18 x 2" hex washer head cap head screws from above. The table mounting plate then secures to the underside of the tabletop using #12 x 1" Phillips flat head tapping screws at pre-drilled mounting holes.

The four feet of the X-base each extend out 15" from the center upright and each foot is threaded at the floor level to accept low-profile adjustable glides. The entire base assembly has an open channel in the center for seamless cable management. Occasional table bases support tables at 14" or 18" high.

Base Finish

C-Leg Base

Occasional C-leg bases are either all powder-coat painted, or are chrome-plated aluminum feet and leg columns, with a black powder-coat texture painted spider plate.

X-Base

Occasional C-leg bases are either all powder-coat painted, or are chrome-plated aluminum x-base, leg column and spider plate.

See Product Color Options in the Tributaire Collection pricelist for color options offered.

Tabletops

Laminate Tabletops

Laminate tabletops are nominal $1\frac{1}{4}$ " overall thickness with a .030" thick high-pressure laminate top surface and a .028" phenolic backer bottom surface. The density of the particleboard core in standard tops is 45 lb/cu ft. Occasional tables are available with the 2 mm (74P) edge or knife edge.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They also have an optional grommet cutout in the center of the table surface, which allows for a power module or a grommet cover.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

TECHNICAL SPECIFICATIONS

Solid Wood Tabletops

Solid wood tabletops are finished to a nominal $1\frac{1}{4}$ " thickness and are made of either Ash, Walnut, Maple or White Oak, featuring the beauty of face grain on the top surface. All boards chosen for each tabletop are 3" to 8" wide, select grade and better, and each board runs the full length of the finished table. Boards are machine planed and edge jointed true, are glued and clamped, then all surfaces are pre-sanded. The tables are precisely cut to their final size, and fine-sanded smooth, including all edges and corners lightly softened prior to final finishing.

When specified, top, edge, and end surfaces are stained using a hand-wiped alkyd resin-based stain. For the final finishing process, all surfaces are first coated with two coats of clear high-build spray sealer, then the top and all edges receive an additional two coats of commercial grade clear finish. This accounts for a total of four coats on exposed surfaces, creating a durable a 2-3 mil finish thickness.

Tabletops come pre-drilled with mounting holes for their corresponding table bases and various accessories. They may also have one or two optional grommet cutouts in the table surface which allows for a power module or grommet cover.

Wood species and stain options can be found in the Product Color Options page of the Tributaire Collection Price List.

Low Profile Glides

All legs specified with glides are shipped with adjustable-height glides. Glides are $1\frac{1}{2}$ " in diameter at the base and have a $\frac{5}{16}$ -18 x $\frac{3}{4}$ " threaded stem, allowing for an adjustment range of $\frac{1}{2}$ ". Glides are only available in black nylon.

Grommets

Node® Circular Grommet

The Node circular grommet is an open top, surface mounted grommet constructed of aluminum. The grommet may be fastened with wood screws into the tabletop cutout. Circular grommet is sized the same as the Node power module, which allows for retrofitting of the tabletop corresponding power module at a later date. The circular grommet opening allows cords to pass through to a power source. The overall diameter is 3.15" and it fits into a 3" diameter cutout in the surface. One grommet ships per table with cutout, located at the center, rear of the tabletop. Grommet is field installed.

Circular grommets are finished in powder-coat paint colors found in the Tributaire Collection Pricelist, on the Product Color Options page. Not available in chrome.

Power Modules

Node® In-Surface Power Module

Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall and fits securely into a 3" diameter cutout. The module is secured from underneath the table with a twist-on clamping collar. The module housing is made of plastic with a powder-coat painted aluminum faceplate. The Node power module with 3-prong plug is rated at 15 amps/120 volts and is UL listed.

Cord length options are either 9' or 15' with a 3-prong plug. Color options are Black, Warm Grey, Cool Grey, or Cottonwood.

Wire Management

Vertical Wire Manager

Vertical wire manager is 16-gauge aluminum extrusions designed to route cords from the tabletop, down the leg and toward the power source. Each wire manager is cut to length and powder-coat painted in the color of the corresponding table base. The wire manager is user installed on a C-leg using the provided double sided tape. Once installed, cords can be pushed through the extrusion's opening, which helps provide table to floor management. Vertical wire managers are only available on occasional tables with a C-leg base.

HOW TO ORDER

- Indicate the following information on order form:
1. Quantity of each item.
 2. Model number, including options. See "How To Build a Model Number".
 3. Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
 - 74P** - 74P edge
 - KN** - Knife edge
- B** Select edge style.
 - 74P** - 74P edge
 - KN** - Knife edge
- C** Select edge color. Refer to the **Product Color Options** page in this price list. Edge color offerings are based on edge style selections.
- D** Select surface finish. Refer to the **Product Color Options** page in this price list.
- E** Select chrome base.
 - NCH** - No chrome base
 - WCH** - With chrome base; add \$263
- F** Select leg finish. Refer to the **Product Color Options** page in this price list.
- G** Select glides.
 - GLP** - Glides - low profile
- H** Select power option.
 - NNN** - No grommets, power, wire management/No cutouts
 - MO1** - Module, Node in-surface w/USB-A/C (1) ; add \$280
 - GO1** - Grommet, Node (1); add \$153
- I** Select grommet/module color. Refer to the **Product Color Options** page in this price list.
- J** Select cord length (feet).
 - 9** - 9' cord length
 - 15** - 15' cord length

HOW TO ORDER

- Indicate the following information on order form:
1. Quantity of each item.
 2. Model number, including options. See "How To Build a Model Number".
 3. Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select surface finish. Refer to the **Product Color Options** page in this price list.
- C** Select chrome base.
 - NCH** - No chrome base
 - WCH** - With chrome base; add \$315
- D** Select leg finish. Refer to the **Product Color Options** page in this price list.
- E** Select glides.
 - GLP** - Glides - low profile
- F** Select power option.
 - NNN** - No grommets, power, wire management/No cutouts
 - MO1** - Module, Node in-surface w/USB-A/C (1); add \$280
 - GO1** - Grommet, Node (1); add \$153
- G** Select grommet/module color. Refer to the **Product Color Options** page in this price list.
- H** Select cord length (feet).
 - 9** - 9' cord length
 - 15** - 15' cord length

PRODUCT SPECIFICATIONS

Tributaire Collection

Lecterns

June 2025

TECHNICAL SPECIFICATIONS

Base Frame

Lecterns feature a modified X-shape base of cast aluminum with the user-side legs extending out 16" and the back legs extending out 11" from the base. The four legs each are threaded under the foot to accept either casters or adjustable glides. X-shape bases of all models offered use a version of an 8-gauge extruded aluminum stylized pill-shape upright which has the same profile as the mating surface of the X-shape base.

Base Finish

X-shape base, outer and inner upright finishes are either all powder-coat painted black, or all chrome-plated, except when storage is specified, then the outer upright in the storage cabinet is powder-coat painted cottonwood.

Lectern Uprights

Fixed-Height Lectern Upright

Models with, or without a storage cabinet, have an 8-gauge extruded aluminum, stylized pill-shape upright atop the modified x-base, secured from underneath using two 1/4-20 x 31" long Torx head draw bolts, up and into a cast aluminum upright mounting head. Mounting head then secures to a lectern worktop support platform assembly, using five 1/4-20 x 5/8" pan head screws. Lecterns with a storage cabinet additionally have a steel cabinet mounting plate between the aluminum base and the extruded aluminum stylized pill-shape upright, and use the above mentioned 1/4-20 x 31" Torx head draw bolts to secure the base, mounting plate and upright to the lectern worktop support platform. The underside of the storage cabinet secures directly to the mounting plate using #12 x 3/4" steel tapping screws.

Screw Adjustable-Height Lectern Upright

Models with, or without a storage cabinet, have an inner and outer upright. The outer .10" thick extruded aluminum stylized pill-shape upright secures atop the modified x-base from underneath, using 1/4-20 x 20 1/2" Torx head draw bolts, up into a cast aluminum top cap atop the outer upright. The inner upright tube is .125" thick extruded aluminum and has secured to its top, a cast aluminum upright mounting head using four 1/4-20 x 1" Phillips pan head screws. Mounting head then secures to a lectern worktop support platform assembly, using five 1/4-20 x 5/8" pan head screws. The inner upright is supported by a set of Delrin glide bushings that provide smooth adjustment. The inner upright contains a set of threaded adjustment holes spaced 1" apart which mate up with two holes on the outer upright. By removing the 1/4-20 x 1/2" Allen serrated head locking screws, the lectern height may be adjusted in 1" increments to between 29" and 44". Lecterns with a storage cabinet additionally have a steel cabinet mounting plate between the X-shape base and the extruded aluminum stylized pill-shape upright, and also use 1/4-20 hex head draw bolts to secure the base, mounting plate and upright to a cast aluminum top cap. The underside of the storage cabinet secures directly to the mounting plate using #12 x 1" steel tapping screws.

Pneumatic Adjustable-Height Lectern Upright

Models with, or without a storage cabinet, have an inner and outer upright. The outer .10" thick extruded aluminum stylized pill-shape upright secures atop the modified x-base from underneath using 1/4-20 x 20 1/2" Torx head draw bolts, up to a cast aluminum top cap atop the outer upright. The inner upright tube is .125" thick extruded aluminum and has secured to its top, a cast aluminum upright mounting head using four 1/4-20 x 1" Phillips pan head screws. Mounting head then secures to a lectern worktop support platform assembly, using five 1/4-20 x 5/8" pan head screws. The inner upright is supported by a set of Delrin glide bushings that provide smooth adjustment. Housed inside the upright is a pneumatic cylinder which is activated by depressing a paddle under the lectern support platform to raise, or lower to between 29" and 44". The cylinder includes a locking feature to prevent vertical movement when any force is applied to the lectern and when the cylinder is not activated. Lecterns with a storage cabinet additionally have a steel cabinet mounting plate between the X-shape base and the extruded aluminum stylized pill-shape outer upright, and also use 1/4-20 hex head draw bolts to secure the base, mounting plate and upright to a cast aluminum top cap. The underside of the storage cabinet secures directly to the mounting plate using #12 x 1" steel tapping screws.

TECHNICAL SPECIFICATIONS

Support Platform & Lectern Worktop

Worktop support platform assembly is constructed of 11-gauge steel, formed, welded, and secured to an aluminum top cap on each lectern upright using five 1/4-20 x 5/8" Phillips pan head screws. Support platform includes an 11- and 14-gauge welded steel hinge assembly, designed for the worktop to set level, or be inclined 12-degrees at the back. The inclined position is locked in place with a 12-gauge hinged steel "stay" which is mounted to the worktop underside back using three #10-16 x 5/8" Phillips pan head screws, which flips and nests into the worktop support platform in the inclined position. Stay is easily unlocked, flipped and repositioned to level or incline the worktop.

Worktop surface is 21 3/4" wide by 18 1/2" deep with rounded corners, by 3/4" nominal thickness, and has a particleboard core density of 45 lb/cu ft. It has a .030" thick high-pressure laminate top surface and a .030" phenolic backer bottom surface, and is available with the 2 mm (73P) edge. Worktop surfaces come pre-drilled with mounting holes for their corresponding support platform and various accessories. Worktop secures to the support platform using seven #10-16 x 5/8" Phillips pan head screws. At the user side, an aluminum book stop, 18 1/2" long by 1/4" thick by 1/2" installed height and powder-coat painted in any KI color, is inset to a milled slot in the top of the lectern worktop, and is secured from underneath using two #8-32 x 3/4" Torx pan head screws.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection pricelist. Edge color matches laminate surface.

Storage Cabinet

The optional storage cabinet is made of 3/4" thick medium-density fiberboard (MDF) on all sides, with all members joined using glue and hidden screws throughout. All visible outside surfaces and doors have .030" thick high-pressure laminate. All internal surfaces are balanced thickness white backer. Any exposed cut ends are edge banded in matching or complementary color 74P edge banding. The top of the cabinet is 1 1/4" thick MDF, laminated with colored (PP) edge band. The cabinet front has two hinge-mounted doors with steel hinges that each have a 110-degree full-overlap swing. Hinges are clear zinc plated and are hidden from external view while being fully adjustable. The cabinet has a pin-adjustable shelf that allows for various height equipment and allows a maximum vertical space of 10 1/2" with shelf. Total available internal space without the shelf is 15 1/2" deep by 19 1/4" wide by 15 1/2" high. A perforated front divider panel, powder-coat painted in any KI color, increases airflow throughout the cabinet. All doors can be ordered with steel pawl and keyed lock in black or clear zinc finish. Openings in the bottom of the cabinet allow for cord routing. A steel powder-coat painted cable routing grommet with hinged top is set in the top of the cabinet.

Laminate color options can be found in the Product Color Options page in the Tributaire Collection Pricelist.

Casters

All lecterns specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are compatible or interchangeable with glides. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with 1/2" diameter friction ring fit posts, requiring no tools to install.

Telescopic Glides

Telescopic glides are constructed of a powder-coat painted die-cast aluminum post, a molded nylon body, and replaceable molded nylon floor pad. Glides are 2" in diameter at the base and have an adjustment range of approximately 1.2". Glides are compatible or interchangeable with casters. The telescopic glide post's color will match the color of the base frame. The nylon body of the glides come in three color options: Black, Warm Grey, or Cottonwood. The nylon pad on the glides come in a natural color (off-white). Glides are mounted with .43" friction ring fit posts, requiring no tools to install.

TECHNICAL SPECIFICATIONS

Modesty Panel

Felt Modesty Panel

Polyester felt modesty panels are constructed from a sound-absorbing 100% polyester felt. They have a rectangular shape with rounded edges, and are secured to the non-user side of the landing pad. Felt modesty panels are 20.85" wide by 20.5", 29.6", or 27" tall (depending on corresponding lectern configuration) and are secured with a steel mounting bracket. Felt modesty panel color options are found in the Product Color Options page in the Tributaire Collection Pricelist.

Laminate Modesty Panel

Laminated modesty panels are made of high-density particle board covered in high-pressure laminate with matching edge banding. They have a rectangular shape with rounded edges, and are secured to the non-user side of the landing pad. Laminate modesty panels are 20.85" wide by 20.5", 29.6", or 27" tall and are secured with a steel mounting bracket. The modesty panel's laminate color matches that of the tabletop.

Power Modules

Mini-Tap® Power Module

The Mini-Tap power module consists of one simplex receptacle port (rated at 15 amps/125 volts), one USB-A port and one USB-C port (2 amps per port). The Mini-Tap module is 5" deep by 5" wide by 1³/₈" high and is secured to an internal surface of the storage cabinet using four mounting screws. The end user can decide where they would like to mount the Mini-Tap power module. The module has molded plastic faceplates with a black steel housing.

Cord length is 108" long with a 3-prong plug.

Bag Hook

Bag hooks consist of formed 12-gauge steel and are either screwed to the vertical support column or press fit onto the opening on either side of the storage cabinet. Bag hooks have a surface finish that matches that of the lectern base.

Cup Holder

Cupholder consists of welded 12-gauge steel that is secured to a mounting bracket underneath the worktop support platform. Cup holders can pivot fully underneath the platform or be extended out when in use. Cup holders have a surface finish that matches that of the lectern base.

Lectern-to-Table Ganging Kit

The ganging kit consists of two steel ganging hooks and two nylon ganging blocks. One hook secures to each side of the lectern through an upper opening at each side of the storage cabinet. Ganging hook is powder-coat painted in select KI colors and secured inside at pre-drilled holes using two #10-16 x 5/8" Phillips truss head screws. One nylon ganging block is secured to the underside of a post-leg table at each side. Nylon block is a dark grey Flannel color and is secured to pre-drilled holes using two #10-16 x 5/8" Phillips truss head screws. Only lecterns with storage may be ganged, and only a separate post-leg table may be used as the corresponding ganging table. Lifting up on the edge of a ganging table and lowering the nylon ganging block into the steel ganging hook of the lectern allows the two pieces to be fully ganged together.

MODEL	MODEL NUMBER		Approx. Packaged Weight	Delivered Pricing
	Basic Model	Paint Color		
TJAC2	Cup Holder Kit • Attaches on right side to surface plate • Swiveling cup holder swings under worksurface when not in use	TJAC2A <input type="checkbox"/>	0.0#	\$ 59
TJAC2	Bag Hook Kit - No Storage • Attaches to column under worksurface attachment plate • If unit is height adjustable, hook and contents will raise and lower with height adjustment	TJAC2B <input type="checkbox"/>	0.0#	\$ 93
TJAC2	Bag Hook Kit - With Storage • Attaches to the accessory slot on side of cabinet	TJAC2C <input type="checkbox"/>	0.0#	\$ 93
TJAC2	Ganging Kit • Used on lecterns with storage only • Includes two ganging hooks to attach to each side of lectern storage and 2 ganging blocks to attach to each side of a 24" or 30"D post leg tables • Toollessly connect lectern with storage to post Leg table to create an instructor desk--either right or left handed • Ganging hook doubles as a bag hook when table is not ganged on that side	TJAC2D <input type="checkbox"/>	0.0#	\$ 209

PRODUCT SPECIFICATIONS

Tributaire Collection
Monitor Stand, Storage Screen & Credenza

June 2025

TECHNICAL SPECIFICATIONS

Base Frame

Base frames for storage screen, monitor stand and storage cabinet credenza feature a cast aluminum foot at each end, attached to a cabinet support weldment which is secured to the underside of the credenza cabinet. Support weldment is of 10-gauge steel and is secured to the aluminum foot using two $\frac{5}{16}$ -18 x 2" hex washer head screws into the top of the foot, and two $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws at the center-facing side. The Support weldment is secured to the underside of the credenza cabinet using thirteen #12 x $\frac{3}{4}$ " Phillips pan head reverse serrated screws at pre-drilled mounting locations. Each aluminum foot is 21.8" long and is threaded at floor level to accept either casters or adjustable glides. The base assembly is finished with powder-coat paint. See Product Color Options in the Tributaire Collection price list.

Casters

All monitor stands, storage screens, and credenzas specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are compatible or interchangeable with glides. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with $\frac{1}{2}$ " diameter friction ring fit posts, requiring no tools to install.

Telescopic Glides

Telescopic glides are constructed of a powder-coat painted die-cast aluminum post, a molded nylon body, and replaceable molded nylon floor pad. Glides are 2" in diameter at the base and have an adjustment range of approximately 1.2". Glides are compatible or interchangeable with casters. The telescopic glide post's color will match the color of the base frame. The nylon body of the glides come in three color options: Black, Warm Grey, or Cottonwood. The nylon pad on the glides come in a natural color (off-white). Glides are mounted with .43" friction ring fit posts, requiring no tools to install.

Storage & Credenza Cabinet

The storage and credenza cabinet side and bottom panels are constructed of $\frac{3}{4}$ " thick 45 lb/cu ft. medium-density fiberboard (MDF), with all members joined using glue and hidden "kreg" fasteners throughout. All visible outside surfaces and doors have .030" thick high-pressure laminate. Internal surfaces are .030" thick white backer. Any exposed-cut ends are edge banded in matching or complementary color polypropylene banding. Cabinet construction includes a central front-to-back open plenum for storage of and aid in routing cords and cables. The cabinet top surface is constructed of $1\frac{1}{4}$ " thick MDF, with .030" thick high-pressure laminate top, and .028" thick phenolic backer bottom surface. The density of the MDF core is 45 lb/cu ft. Top surfaces have colored (PP) edge band around the perimeter.

Doors & Ganging

Each cabinet is configured for either two or four hinge-mounted doors. One-sided cabinets have two doors. Two-sided cabinets with four doors. Cabinets may be configured for either non-ganging on both sides or ganging on one, and non-ganging on the other cabinet side. Doors can be ordered with optional keyed locks in clear zinc finish. Door hinges are of steel, adjustable soft close, with 110-degree full-overlap swing. Ganging cabinet sides are designed to gang to an optional post leg table, which seats either five or seven occupants. Non-ganging door sides are hinged to swing open at the center, and have a decorative perforated front, center divider panel weldment of 18-gauge steel which acts as a door stop, and the perforations increase airflow through the cabinet. Perforated divider panel is powder-coat painted in any KI colors and is secured at the top and bottom of the cabinet's center using four #10-16 x $\frac{1}{2}$ " Phillips truss head screws. Ganging doors are hinged centrally and swing open at each cabinet end. A face panel at each cabinet end has a powder-coat painted door stop strip of 16-gauge formed steel attached behind it using three #10-16 x $\frac{1}{2}$ " Phillips truss head screws. Ganging cabinet doors, when closed leave an opening above each door for installed gangers. Two gangers per cabinet are of nylon molded hooks that secure to nylon pegs. After installation of pegs with #14 x $1\frac{1}{2}$ " wood screws, no tools are required to join cabinet and post leg table together. All cabinet doors are available in any KI color per the Product Color Options in the Tributaire Collection pricelist.

TECHNICAL SPECIFICATIONS

Support Frame for Screen & Monitor Frames

Each screen or monitor panel has support aided by a tubular framework assembly, consisting of two 1.5" diameter, 16-gauge steel tubing vertical uprights, bent to horizontal for a bracket, one at each end. Tube frames at each top horizontal end are joined together by a half-round shaped 16-gauge steel center support weldment. Weldment ties the tubes together and serves to also be a support bracket for screen and monitor support frames. Center support bracket is secured to the horizontal tubes using two $\frac{1}{4}$ -20 x $\frac{5}{8}$ " Torx pan head screws at each end, under the support and into the tube. Both sides of the tubular frame assembly are secured to an undermount plate at the cabinet underside. Each undermount plate secures to the bottom of the vertical tube using one $\frac{5}{16}$ -18 x 2" hex washer head screws, and the bracket secures to the underside of the cabinet using four #12 x $\frac{3}{4}$ " Phillips pan head reverse serrated screws at pre-drilled mounting locations. Frame components are finished with powder-coat paint. See Product Color Options page in the Tributaire Collection Pricelist for color options offered.

Screen & Monitor Insert Frames

Screen and monitor insert frame, upper framework consists of $1\frac{5}{8}$ " x $\frac{3}{4}$ " x $\frac{1}{16}$ " thick, oval-styled extruded aluminum rails. Framework for the sides and top member are joined by two rounded cast aluminum corners, using hidden #8-32 x $\frac{1}{4}$ " Phillips flat head screws and internal joiner brackets. At both ends, the bottom of the aluminum framework secures to a tie bar of 12-gauge steel, which includes a $\frac{3}{8}$ " x $\frac{3}{4}$ " by $\frac{1}{8}$ " thick extruded aluminum U-channel atop it to capture the bottom of the screen insert. The tie-bar and U-channel pair bridges between both extruded aluminum rails and sets on the top of the credenza cabinet. Two $\frac{1}{4}$ -20 x $1\frac{1}{2}$ " Phillips flat head screws secure from underneath the tie bar and up into the bottom of the extruded aluminum side rails at each end. The tie bar and U-channel are secured together underneath the screen or monitor insert panel using one #8-32 x $\frac{1}{2}$ " Torx flat head screw at each end. Additionally, the tie bar, U-channel and screen are secured to the cabinet top using two $\frac{1}{4}$ -20 x 1" Phillips pan head screws per screen. A pair of vertical-oriented, 14-gauge steel formed brackets are secured to the back of each screen insert (monitor stand, markerboard, laminate, PET felt or fabric insert) using five #10-16 x $\frac{1}{2}$ " Phillips truss head screws at each bracket, and into the insert. The vertical metal brackets secure at the top, to the steel center support weldment of the support frame using one #8-18 x $\frac{1}{2}$ " Phillips pan head screw at each bracket. At the bottom, the vertical metal brackets both install to the top of the credenza cabinet using two $\frac{1}{4}$ -20 x 1" Phillips pan head screws with washer and $\frac{1}{4}$ -20 hex nylon-insert cap lock nut. Frame components are finished with powder-coat paint. See Product Color Options page in the Tributaire Collection Pricelist for color options offered.

Screen Insert Construction

All screen inserts are approximately $\frac{1}{2}$ " finished thickness inside of the $1\frac{5}{8}$ " thick panel frame. Both screen and monitor stand models may be configured with one or two panel frames. Each panel frame contains an insert and may have the same insert front surface on each frame's side or may have a different finished insert surface on each frame side, depending on unit configuration. Individual panel inserts have a front, usable surface and a back, non-usable surface due to bracketry attachment at the back surface.

Screen Inserts

Monitor Stand Insert

Constructed with a front surface of .030" thick high-pressure laminate (HPL) on the front side in any KI laminate color per the Product Color Options page in the Tributaire Collection pricelist. Back side is of black .030" thick high-pressure laminate. Both surfaces are glued to a medium-density fiberboard (MDF) core. Insert includes a central oblong passage for routing cables. Durable construction for installation of video monitors via customer supplied and customer installed monitor and mounting brackets. Construction allows for 100 pounds maximum monitor weight. Other storage screen models are not designed for monitor installation.

Markerboard Insert

Dry-erase magnetic steel insert front surface consists of .017" thick, white-finish steel front. Back surface is a black, powder-coat painted .017" thick steel backer sheet. Both surfaces are glued to a medium-density fiberboard (MDF) core.

Laminate Insert

Constructed with a front surface of .030" thick high-pressure laminate (HPL) in any KI laminate color per the Product Color Options page in the Tributaire Collection pricelist. Back side is of black .030" thick high-pressure laminate. Both surfaces are glued to a medium-density fiberboard (MDF) core.

TECHNICAL SPECIFICATIONS

Screen Inserts (cont.)

PET Felt Insert

PET felt material is 1/2" thick front to back, available in standard KI colors per the Product Color Options page in the Tributaire Collection pricelist.

Fabric Insert

Fabric style in any approved KI fabric, glued to both sides of a pin-able, 1/2" thick low-density fiberboard (LDF) core. Fabric is oriented "railroad" (horizontal) direction.

Power Modules

Quad-Tap® Power Module

The Quad-Tap power module (a self-contained, UL listed single relocatable power tap), with four 15-amp, 125 volt AC simplex receptacles. The module is standard with a 108" long, 14 AWG, 15-amp NEMA rated 3-conductor black SJT cord with 3-prong grounded plug. Module is colored black with two AC ports on either side of the 5" x 5" x 1 3/8" enclosure. The module can be mounted on any internal surface determined by the customer.

Cord length is 108" long with a 3-prong plug.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge color. Refer to the **Product Color Options** page in this price list.
- C** Select storage laminate finish. Refer to the **Product Color Options** page in this price list.
- D** Select leg finish. Refer to the **Product Color Options** page in this price list.
- E** Select accent color. Refer to the **Product Color Options** page in this price list.
- F** Select lock option.
 - NLK - No lock
 - WLK - With lock
- G** Select glides or casters.

- G** - Glides
- C** - Casters
- H** Select glide or caster color. Refer to the **Product Color Options** page in this price list.
- I** Select power option.
 - MQ1 - Module, Quadtap black (1); add \$370
 - NNN - No grommets, power, wire management/No cutouts

PRODUCT SPECIFICATIONS

Tributaire Collection

Nesting Screens

February 2024

TECHNICAL SPECIFICATIONS

Base Frame

The base of a nesting screen features two 18" deep, angled cast aluminum legs, which allow screens to be nested straight against each other during storage. Each leg has two feet, threaded at the bottom to accept either casters or glides. Near the inside, top of each leg is a welded-on aluminum gusset, used to connect the two legs together via a 14-gauge extruded aluminum support stringer. The support stringer is secured to the inner gusset at each end using two 1/4-20 x 5/8" Torx pan head screws through riveted-on cast caps under the stringer.

Nesting base frames are available in sizes from 24" to 48" wide and are powder-coat painted. See Product Color Options in the Tributaire Collection Pricelist for color options offered.

Screen Frame

Screen upper framework consists of 3/4" x 1 5/8" extruded aluminum channels at the top and both sides, joined by two cast aluminum corners at the top using #8-32 x 1/4" Phillips flat head screws and internal joiner brackets. Upper framework secures at the bottom to cast aluminum leg caps on the base, using two 1/4-20 x 1 1/2" Phillips flat head screws at each side. Cast aluminum leg caps secure to the base from underneath using 1/4-20 x 3 1/2" hex head cap screws at each leg cap. An extruded aluminum U-channel captures the bottom of the screen insert, bridging between bases and is secured to the top of each leg cap from underneath using one #8-32 x 1/2" Torx flat head screw at each side.

Screen frames are available in widths between 24" & 48" and heights between 54" & 72" and are powder-coat painted. See Product Color Options in the Tributaire Collection Pricelist for color options offered.

Casters

All nesting screens specified with casters ship from the factory with two locking and two non-locking, twin-wheeled molded nylon casters. Caster wheels are 2.50" (65 mm) in diameter, with a total mounted height of 2.75" (70 mm). Caster wheel treads are soft for ease of mobility on carpet or hard floors. Casters are compatible or interchangeable with glides. Casters come in three color options: all Black, all Warm Grey or a two-tone combination of Cottonwood body with Warm Grey tread and brake lock. Casters are mounted with 1/2" diameter friction ring fit posts, requiring no tools to install.

Telescopic Glides

Telescopic glides are constructed of a powder-coat painted die-cast aluminum post, a molded nylon body, and replaceable molded nylon floor pad. Glides are 2" in diameter at the base and have an adjustment range of approximately 1.2". Glides are compatible or interchangeable with casters. The telescopic glide post's color will match the color of the base frame. The nylon body of the glides come in three color options: Black, Warm Grey, or Cottonwood. The nylon pad on the glides come in a natural color (off-white). Glides are mounted with .43" friction ring fit posts, requiring no tools to install.

TECHNICAL SPECIFICATIONS

Screen Inserts

Markerboard

Dry-erase magnetic steel inserts consist of .017" thick white-finish steel, glued to a medium-density fiberboard core and can be specified on one or both sides of the screen. If the markerboard is specified on a single side of the screen, the other side must be PET felt.

PET Felt

PET Felt inserts consist of 1/2" thick sheets of polyester felt on one or both sides of the screen. If PET felt is specified on a single side of the screen, the other side must be Markerboard. PET inserts come in standard KI colors per Product Color Options in the Tributaire Collection pricelist.

Fabric

Fabric inserts consist of a specified fabric glued to a medium-density fiberboard core and can be specified on both sides of the screen. Fabric types can be found in the Fabric Options section in the Tributaire Collection pricelist.

Accessories

PET Magnetic Tiles

PET magnetic tiles consist of 1/2" thick sheets of tackable polyester felt which are cut into a 14" diameter circle, a 16" square, a 16" rounded square, or a 9" x 24" pill shape. Each tile comes with magnetic strips glued to the backside that allow them to be attached to a Markerboard insert. PET magnetic tiles come in standard KI colors per Product Color Options in the Tributaire Collection pricelist.

Magnetic Storage

ABS plastic bins provide storage for a range of office and personal items. All plastic bin accessories include vinyl magnets, powder-coated steel mounts and work on the markerboard screen inserts. Magnetic storage is available in slate or white.
