How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

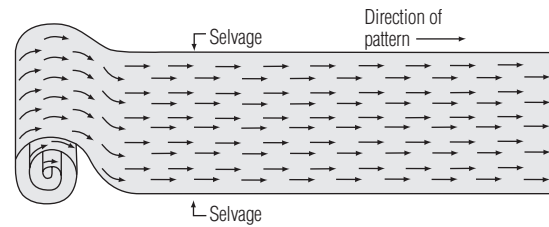

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

In all instances, send this form to the C.O.M. Specialist.

PRODUCT SPECIFICATIONS ■

WorkZone® Desking System

February 2026

TECHNICAL SPECIFICATIONS

Basic Worksurfaces

Worksurfaces define the shape of the workstation and provide support for overhead storage, hanging pedestals, electrical componentry and privacy screens. Worksurfaces are designed to integrate function and ergonomics to provide solutions that meet ANSI/HFS-100-1988 and ADA user requirements.

Rectangular Worksurfaces

Worksurface tops are 1 1/4" nominal overall thickness, high-density particleboard with .03" high-pressure laminate surface and .028" phenolic backing sheet. Tops are available with 74P edge or 180° post-formed and elliptical post-form edges. Worksurfaces will be available in 30", 36", 42", 48", 54", 60", 66" and 72" widths and 24" and 30" depths. They are available in 27" and 29" heights.

Basic rectangular worksurfaces have the option of including two wireway grommets, located in the back corners of each worksurface. Grommets are color coordinated to the worksurface edge/base color. An optional extruded PVC trough for the wire management is located at the top of the modesty panel.

Worksurfaces are supported as follows:

- Streamlined leg - Heavy-gauge seam-welded powder-coat finished tubular steel. Horizontal tabletop support tube, 16-gauge, 1" x 1" steel. Floor support member, 16-gauge, 1 1/8" x 1 3/4" belly rectangular steel tube. Top floor support tubes are welded with two steel tube vertical leg members. The rear vertical support is 16-gauge, 1" x 2" steel tube. The front vertical support is 16-gauge, 1" x 2 1/8" bullet oval steel tube. Leg interior provides concealed management of wire from floor to worksurface. Adjustable chrome-plated glides. Powder-coat finish on legs.

Three frame style options are available. The receptacle clearance beam option (WB) is a 16-gauge, 1/2" x 1 1/2" steel tube cross brace, welded to two 14-gauge, L-brackets for support. The modesty panel (WM) is 19-gauge steel. It is located 1 1/2" from the rear of the worksurface. The modesty panel is 13.31" high on the 27" high worksurfaces and 15.31" on the 29" tables. The full-height modesty panel (WF) is 19-gauge steel. It is located 1 1/2" from the rear of the worksurface. The full modesty panel spans the space between the underside of the worksurface and the floor. It is only available on 29" height desks. Modesty panel is 15" high on 27" high worksurfaces and 17 1/2" high on 29" worksurfaces. Legs and modesty panels are color matched and available in four trim colors. Extruded rigid PVC encloses the space between the two vertical leg members. Smooth finish with a sprayed clear acrylic scuff-resistant coating. Legs are located 1 1/2" from worksurface edge. Legs are equipped with 10" scuff plates and 1 1/8" adjustable chrome-plated glides to compensate for uneven floors.

Legs are available in two foot depths, standard and transitional. Transitional leg feet are six inches shorter in depth than standard leg feet. This allows for more clearance for feet and chair movement where worksurfaces join in a straight line or corner applications. Legs are located 1 1/2" from worksurface side edge.

Stand-Up Worksurface

Stand-up worksurfaces have the same features as the rectangular worksurfaces, but are available in only one size; 30" deep by 36" wide and is supported by 42" high 16-gauge welded 1" x 2" steel legs, and only connects to 30" wide worksurface. The 19-gauge steel modesty panel is 17 1/2" high and located 1 1/2" from worksurface side edge. Casters are not available on stand-up worksurfaces.

TECHNICAL SPECIFICATIONS

Stand-Alone Corner Worksurface

Stand-alone corner worksurfaces have the same basic construction as the rectangular worksurfaces. The stand-alone corner worksurface is used where a freestanding corner worksurface is needed. In freestanding applications, standard legs must be used. If attached to a basic rectangular worksurface, transitional legs may be ordered for the sides of the attachment on both worksurfaces. Transitional leg feet are 6" shorter than standard leg feet. Corner worksurfaces have a 7/8" sq. tubular steel corner support leg at the back. The front edge on 36" wide worksurface is 18" and 26 1/2" on 42" and 48" worksurfaces. Not available with both "B" transitional legs. Three worksurface grommets are available on a corner worksurface, with two basic rectangular grommets over the legs and one diagonal grommet in the back corner.

Rectangular Adjustable Keyboard Pad Worksurfaces

Rectangular adjustable keyboard pad worksurfaces have the same construction features as the basic worksurface except for the addition of 10" by 24" keyboard pad which have a 3" height adjustment, 15° negative and 15° positive tilt adjustment and 1" forward extension. The keyboard pad attaches to the worksurface with die formed L-brackets and screws. Threaded hand knobs lock keyboard pad in position. Keyboard is located 5 3/4" from edge of worksurface on either right or left hand locations. When adding a pedestal, worksurface must be a minimum of 60" wide. Worksurfaces are available in 30", 36", 42", 48", 54", 60" and 72" widths and 24" and 30" depths and available with 74P edge only. They are available in 27" and 29" heights. Rectangular adjustable keyboard pad worksurfaces are available with the keyboard pad located left, right, or center on widths of 48", 54", 60" and 72". The 36" and 42" wide worksurfaces are available with the keyboard pad located in the center position only.

Corner Adjustable Keyboard Pad Worksurfaces

Corner adjustable keyboard pad worksurfaces have the same construction as the Rectangular Adjustable Keyboard Pad Worksurface. Worksurfaces are available 42" wide by 24" deep and 48" wide by 30" deep. The corner worksurface is available with 27" and 29" high standard depth legs and a 7/8" square tubular 16-gauge steel corner support leg at the back. Not available with both "B" transitional legs.

Corner Transitional Worksurface

Corner transitional worksurfaces have the same construction as rectangular worksurfaces and are available in three sizes: 36" or 42" wide by 24" deep and 48" wide by 30" deep. The front edge dimension is 18" on 36" wide and 26 1/2" on 42" and 48" wide and is available in postformed with matching flat .024" PVC edge banding on side and rear edges or 74P edge. Worksurfaces include a 7/8" square tubular corner support leg at the back, with a stainless steel adjustable glide and full wrap modesty panels. Corner transitional worksurface tops join to fixed-height basic worksurfaces at the worksurface edge. The 19-gauge steel modesty panels attach to the legs of the adjoining basic worksurface. Tops are available in the same construction and finishes as basic worksurfaces and include one grommet located in the back corner along with one basic grommet on each side of the worksurface.

Corner Keyboard Pad Transitional Worksurface

Corner keyboard pad transitional worksurfaces have the same construction as the stand-alone corner adjustable keyboard pad worksurface with the addition of the 10" by 24" keyboard pad. The corner keyboard transitional table is only available with 74P edge. The pads have a 3" height adjustment, a tilt range of 15° negative and 15° positive, and a 1" forward extension. Worksurfaces are available in 42" by 42" and 48" by 48" with the 42" surface matching the depth of a 24" deep fixed-height basic worksurface and 48" surface matching the 30" deep fixed-height basic worksurface.

Square Transitional Worksurface

Square transitional worksurfaces have the same construction as the rectangular worksurface, are available as 24" or 30" square units and used with matching depth fixed-height basic worksurfaces to fill in a corner. They include a 7/8" square, 16-gauge tubular steel corner support leg in the back, with a 1 1/8" stainless steel adjustable glide and 19-gauge steel modesty panels. The worksurface is available with 74P edge only.

Rectangle Transitional Worksurface

Rectangle transitional worksurfaces have the same construction as the square transitional worksurface, and are 24" x 30" to match a 24" deep fixed-height basic worksurface with a 30" deep worksurface at a corner. Worksurfaces include a 7/8" square tubular 16-gauge steel corner support leg at the back, with a 1 1/8" stainless steel adjustable glide and 19-gauge steel modesty panel. The worksurface is available with 74P edge only.

TECHNICAL SPECIFICATIONS

End-of-Run Transitional Worksurface

End-of-run transitional worksurfaces have the same construction as the rectangular transitional surfaces and are available in three sizes: 36" by 36", 42" by 42" and 48" by 48". The 36" and 42" worksurface units attach to 24" deep worksurfaces and the 48" unit attach to 30" deep worksurfaces. Worksurfaces include an end support leg of 16-gauge steel, a 7/8" square tubular 16-gauge steel corner support leg at the back, with a 1 1/8" stainless steel adjustable glide and full wrap modesty panels with wire management ports that are located in the top center of each panel.

Conference End Transitional Worksurface

The conference end worksurface is 36" or 42" in diameter with a single 3" diameter, 14-gauge steel tubular leg with 1 1/8" adjustable stainless steel glide. The top is available with 74P edge only. The 42" worksurface attaches to the end of a 29" high, 30" deep worksurface and the 36" worksurface attaches to the end of a 24" deep worksurface.

Curvilinear Worksurface

The curvilinear worksurfaces have the same construction as the rectangular worksurfaces. The worksurface will be 24" deep on one end and 30" deep on the other end. Worksurfaces are available in 42", 48", 54" 60", 66" & 72" lengths. The curvilinear worksurface can join a 24" deep worksurface to a 30" deep worksurface. The front edge has a curvilinear front.

P-Shape Peninsula Worksurface

"P" shape worksurfaces have the same construction as the rectangular worksurfaces and are available in three sizes: 24" or 30" deep and 60", 66" or 72" long. The base consists of two standard Workzone C-legs on the back end of the worksurface and a D-leg that supports the peninsula end of the worksurface.

TECHNICAL SPECIFICATIONS

Piano Shape Peninsula Worksurface

Piano shape worksurfaces have the same construction as the rectangular worksurfaces and are available in three sizes: 24" or 30" deep and 60", 66" or 72" long. The base consists of two standard Workzone C-legs on the back end of the worksurface and a D-leg that supports the peninsula end of the worksurface.

Square Shoe Worksurface

Square shoe worksurfaces have the same construction as the rectangular worksurfaces and are available in three sizes: 24" or 30" deep and 60", 66", 72" or 84" long. The base consists of two standard Workzone C-legs on the back end of the worksurface and a D-leg that supports the peninsula end of the worksurface.

Quarter Round Transitional Worksurface

Quarter round transitional worksurfaces have the same construction as the rectangular worksurfaces and are available in two sizes: 24" x 24" and 30" x 30". Two splice plates are provided to affix between two fixed-height tables. Available with 74 edge only. The 24" surface has a radius of 26 2/3" and the 30" surface has a radius of 35".

Corner Transitional Worksurface

Corner transitional worksurfaces have the same construction as the rectangular worksurfaces and are available in two depths: 24" and 30", and three widths, 36", 42" and 48". Two splice plates are provided to affix between two fixed-height tables. A 7/8" sq. tubular corner support leg is installed to support the back corner of the worksurface.

Corner Curvilinear Transitional Worksurface

Corner curvilinear transitional worksurfaces have the same construction as the rectangular worksurfaces and are available in two depths: 24" and 30", and three widths, 36", 42" and 48". Two splice plates are provided to affix between two fixed-height tables. A 7/8" sq. tubular corner support leg is installed to support the back corner of the worksurface. The front edge of the worksurface is concaved in to provide a curved front surface.

Corner Curvilinear Reduction Worksurface

Corner curvilinear reduction worksurfaces have the same construction as the rectangular worksurfaces and are available in two widths, 42" and 48". The depths are 24" on one side and 30" on the other side. Two splice plates are provided to affix between two fixed-height tables. A 7/8" sq. tubular corner support leg is installed to support the back corner of the worksurface. The front edge of the worksurface is concaved in to provide a curved front surface.

End-of-Run Corner Worksurface

End-of-run corner worksurfaces have the same construction as the rectangular worksurfaces and are available in two widths, 24" and 30". The depths are 36", 42", or 48". One side attaches via splice plates to a fixed-height WorkZone table and the other side is comprised of a standard WorkZone leg and 7/8" corner support leg at the back. The front edge is straight.

End-of-Run Corner Curvilinear Worksurface

End-of-run corner curvilinear worksurfaces have the same construction as the rectangular worksurfaces and are available in two widths, 24" and 30". The depths are 36", 42" or 48". One side attaches via splice plates to a fixed-height WorkZone table and the other side is comprised of a standard WorkZone leg and 7/8" corner support leg. The front edge is concaved to provide a curved front worksurface.

The Full Leg Panel

The full leg panel fits over an existing WorkZone C-leg as a sleeve. It is non-handed and is available to fit over a leg that is under either a 24" or 30" deep worksurface.

TECHNICAL SPECIFICATIONS

PowerUp® Module with 3-Prong Plug

WorkZone tables are available with one or two surface-mounted PowerUp modules with 3-prong plug. The PowerUp module is a UL listed, relocatable power tap, which is a surface mounted power module with a plastic cover. When open, one duplex power receptacle and two data jack openings are exposed. The module is 3¹/₄" wide by 7" long and 2¹/₄" tall when opened and fits securely into a 6¹/₄" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 22" or 108" cord and 3-prong plug.

Wire Management system

The wire management system attaches under the worksurface between the table legs. It consists of a data door that contains a steel divider to separate power and data cables, a table-to-table steel wireway, a splice plate and notched vertical wireways on the legs to pass cables through to the next table. The data door is constructed of rigid PVC .06" wall thickness with a radius of 2¹/₂". The door is 8" deep and is 4¹/₂" high. It attaches to the underside of the worksurface and to the inside of the modesty panel. Power and data are separated from each other by a 24-gauge steel divider that is 2" high by 2³/₄" deep. There is also space allowed for cord management. The table-to-table wireway is a 16-gauge steel trough that attaches to the underside of the adjoining worksurfaces. The wireway is 3³/₄" deep by 4¹/₄" wide. The wireway routes the 10-wire, table-to-table connector and data wires between tables. The table-to-table wireway also includes a splice plate that attaches the front of the adjoining worksurfaces together to prevent separation.

The 10-Wire 6-Circuit Electrical Distribution System

The 10-wire 6-circuit rigid wireway may consist of a 10-wire 6-2-2 harness, table-to-table connectors, and 10-wire infeed kit. The 2¹/₂" wide single-sided, rigid wireway mounts to the underside of the worksurface with brackets and is available in widths to span the worksurface. The 30" to 54" wide worksurface harness accommodates two 15-amp duplex receptacles and the 60" to 72" wide worksurface harness accommodates up to four 15-amp duplex receptacles.

Receptacles are available to access the six circuits within the harness and must be ordered separately. They are marked for the circuit they will access. Circuits 1, 2 and 3 are convenience circuits and share a common neutral and ground. Available in black only. Circuits 4, 5 & 6 are used as a dedicated circuits and have their own neutral and ground. Circuit 4, 5, & 6 are easily identified by their orange color.

Power is supplied to the rigid wireway from a floor or wall source with the power infeed kit. The kit includes 6' of plastic covered flexible metal conduit with a 1/2", waterproof 90° connector. Two steel covers are included to replace the existing plastic vertical wireways in the table leg.

Power is transferred from table-to-table with the 10-wire table-to-table connector. The 18¹/₂" long connector consists of plastic coated flexible conduit, which provides power connections from adjoining tables. It is routed through the table-to-table wireway and plug into the ends of the rigid wireway to continue power from table-to-table. A steel wireway and splice plate is included to shield the connector between tables.

Pedestal Storage

Pedestal storage for WorkZone is provided by KI's 700 Series pedestals. Three styles are available to meet personal storage requirements: freestanding, mobile and hanging pedestals. Pedestals are available in three depths; 17⁵/₈" that may be used with any depth worksurface, 21⁵/₈" for maximum storage under a 24" worksurface and 27⁵/₈" for use under 30" worksurfaces. The 12" file and 15" EDP drawer sizes have full extension slide arm suspensions for full access to storage space. The 3" pencil drawers and 6" box drawers have three-quarter extension, steel ball-bearing suspension. Locks are included in each pedestal and are random keyed. Specific keying combinations are available.

TECHNICAL SPECIFICATIONS

Freestanding Pedestals

Freestanding pedestals have a finished top and four adjustable glides. They are placed under a worksurface or anywhere else in the office. A counterbalance weight is available for freestanding units when not placed under worksurfaces.

Mobile Pedestals

Mobile pedestals have a finished top and four twin-wheel hooded casters. Front casters are locking and back casters are non-locking. A counterbalance weight is included with each unit.

Hanging Pedestals

Hanging pedestals have keyhole slots on the top for attachment under basic worksurfaces.

Center Drawer

Center drawers consist of formed steel construction with a molded plastic compartment tray. Locks are included and are random keyed. Specific keying combinations are available. They attach under basic WorkZone worksurfaces and are available in the four trim colors.

Worksurface Accessories

WorkZone offers a full range of accessories to facilitate the use of computers in the workstation.

Sliding Keyboard Drawer

Sliding keyboard drawers attach to the underside of rectangular single surface worksurfaces and basic corner, transitional corner and end-of-run worksurfaces that are 42" wide by 24" deep or larger. The sliding keyboard drawers have 16" steel ball bearing slides with height adjustments at 3", 3¹/₂" and 4" below the worksurface. They are available in the four trim colors. They accommodate keyboards up to 9" x 22" on a non-skid surface and accept the optional wrist rest.

Overhead Storage

Overhead storage consists of the Universal overhead and shelves, as well as the Balance overhead. Overhead storage attaches to the worksurface with two or three overhead support stanchions, depending on size. The 24", 30", 36", 42", 48", 54", 60", 66" and 72" sizes are available. The 66" overheads consist of a 30" and 36" overhead combination. The 72" overheads consist of a pair of 36" overheads. Shelf dividers are powder-coated steel with installation and removal accomplished without the use of tools or fasteners. Universal overheads and shelves are 17" high and have 19¹/₂" clearance between the worksurface and the bottom of shelf. Overhead doors are available in painted steel, fabric or laminate with a PVC extrusion handle. Locks are randomly assigned or keyed upon customer request. The end panels are constructed of 16-gauge steel and have self-locking mounting tabs formed into the back edge. The shelf, back and top are constructed from 18-gauge steel. Balance overheads are 17" high and have 19¹/₂" clearance between the worksurface and the bottom of shelf. The upper door is available in colored or translucent extruded rigid PVC with spatter-coat finish, fabric, or laminate applied. The overall door thickness is 3/8". The lower door is an aluminum extrusion and is ergonomic in design. A center lock mechanism is used between the upper and lower doors for security. The overhead doors effortlessly operate from either a seated or standing position through use of the upper or lower door. The upper door and lower door are synchronized in motion through the use of two 10-gauge linkages. The doors are assisted with two extension springs and require less than 5 pounds of force to operate. The upper door opens over the outside of the case.

Overhead Storage Accessories

WorkZone offers a full range of accessories for use with overhead storage units. Task lights provide illumination for the worksurface and a paper management system adds organization to the area above the worksurface.

Paper Management System

The paper management system addresses the storage and movement of files, binders, and documents. Components are available with integrated hooks for attachment to the work bar. The system is available in the four trim colors.

Tool Rail

The tool rail is fabricated from an aluminum extrusion, which is powder-coat painted and includes injection molded plastic end caps. The tool rail is attached to the panel through the use of steel brackets. The tool rail supports all paper management accessories.

TECHNICAL SPECIFICATIONS

Plastic Paper Tray

The legal- and letter-sized paper trays are constructed of injection molded plastic. The paper tray is supported by the tool rail.

Plastic Diagonal Storage Unit

The diagonal storage unit is constructed of injection molded plastic. Three injection-molded and painted ABS dividers may be used in left or right positions. The diagonal storage unit is supported by the tool rail.

Steel Base Paper Tray

The legal- and letter-sized paper trays have a powder-coated steel bottom and back. The sides are injection molded and sonic welded to the steel bottom and back. The paper trays are supported by the tool rail using unit support clips.

Steel Base Diagonal Storage Unit

The diagonal storage unit consists of a three-piece unit with a powder-coated steel bottom and back. Injection-molded and painted ABS dividers may be used in either left or right positions.

Steel Base Vertical Binder Bin

The steel bottom and back of this unit are powder-coat finished. The sides of injection-molded ABS are sonic welded to the steel bottom and back.

Accessory Tray

The accessory tray measures 9½" wide by 2" high by 10" deep and includes three hooks for mounting to tool rail. The tray consists of compartments to hold pencils, paper clips and miscellaneous items. Tray is suspended from tool rail or used freestanding on worksurfaces and shelves.

Pencil Cup

The pencil cup is 4" wide by 4" high by 3½" deep. Cup is provided for storage of pens, pencils and highlighters. One hook is provided for mounting on tool rail.

Privacy Screens

Privacy screens provide sit-down privacy within the WorkZone workstation. Screens are 19" high and available in widths to fit all basic and transitional worksurfaces, straight, corner, with or without keyboard pad.

Screens are constructed of two ½" Gypsum boards, joined by hot melt adhesive, fabric covered and usable as a tackable surface. The fabric surface on both sides allows one set of screens to serve two worksurfaces placed back-to-back. Privacy screens are usable on worksurfaces with overhead storage units to close the opening between the worksurface and the bottom of the shelf. Screens include two or three ⅛" cold rolled steel brackets or painted aluminum mounting brackets. Brackets attach to privacy screen with tee nuts and screws. Steel splice plates run the full height of the screen to align adjoining privacy screens. Privacy screen is 19½" high above worksurface. Corner screens include a corner alignment plate. Screens are available in configurations to match the worksurface application, basic worksurface, corner worksurface or transitional worksurface.

Basic Worksurface Privacy Screens

Basic worksurface privacy screens are designed for straight-line applications. They include mounting brackets for attachment to the worksurface and a full-height, steel splice plate to align adjoining screens. Screens are available for straight applications in 30", 36", 42", 48", 54", 60" and 72" widths. The 60" and 72" widths consist of a pair of screens, two 30" and two 36" with splice plates.

Corner Worksurface Privacy Screens

Corner worksurface privacy screens are available as a pair of screens to enclose the corner. They have a 90° splice plate to align the screens. Corner screens are available for 36", 42", and 48" corner worksurfaces.

Transitional Worksurface Privacy Screens

Transitional worksurface privacy screens are offered in sizes and combinations of screens to enclose the corner occupied by a particular transitional worksurface, corner, square, rectangle and triangle. The end-of-run transitional worksurface uses a corner screen if both sides are to be screened.

TECHNICAL SPECIFICATIONS

Shared Leg

Workzone with shared leg has the same construction as basic Workzone tables. Workzone with shared leg is specified where 24" and 30" deep rectangular surfaces are specified in side-by-side applications. Three types of tables can be specified with this application: starter units, adder units and finisher units. Workzone with shared leg can be specified as desking units only with PowerUp.

Starter Units

Each shared leg workplace requires a starter unit to be placed at one end of the table string. The starter unit is comprised of a worksurface, modesty panel, standard leg and transitional leg. Only one starter unit is required in a single table string.

Adder Units

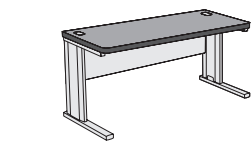

When three or more tables make up a table string, an adder unit is used to make up the middle portion of the table string. The adder unit is comprised of a worksurface, modesty panel and transitional leg.

Finisher Units

The final table specified in a table string is the finisher unit. This unit is comprised of a worksurface, modesty panel and a standard leg.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 EP - Elliptical postformed edge
 PF - Postformed edge
- C** Select height.
 7 - 27" high
 9 - 29" high
- D** Select horizontal wireway.
 Add upcharge to unit price for WW option.
 NW - No horizontal wireway
 WW - Wireway
- E** Select frame style.
 Add upcharge to unit price for WF option.
 WB - w/beam
 WM - w/modesty panel
 WF - w/full modesty panel
 See pricing column for full modesty panel upcharge.

- w/ Full modesty panel (available on 29" high only)
- F** Select location and type of leg.
 TS - Standard legs
 TL - Transition leg (left)
 TR - Transition leg (right)
 TB - Transition leg (both)
 Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "TB" option for both transitional legs is not available.
- G** Select grommet option.
 Grommets are required for overhead cabinet.
 OGN - No worksurface grommet
 OGY - Yes worksurface grommet
 Grommets can be used for wire pass-through.

- H** Select paint color.
 Refer to the **Product Color Options** page in this price list.
- I** Select insert color.
 Refer to the **Product Color Options** page in this price list.

- price list.
 Insert color also includes horizontal wireway (WW) if selected.
- J** Select laminate surface.
 Refer to the **Product Color Options** page in this price list.
- K** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- L** Select grommet color.
 Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
EP - Elliptical postformed edge
PF - Postformed edge
- C** Select height.
7 - 27" high
9 - 29" high
- D** Select horizontal wireway.
 Add upcharge to unit price for WW option.
NW - No horizontal wireway
WW - Wireway
- E** Select frame style.
 Add upcharge to unit price for WF option.
WB - w/beam
WM - w/modesty panel
WF - w/full modesty panel
 See pricing column for full modesty panel upcharge.

- w/ Full modesty panel (available on 29" high only)
- F** Select location and type of leg.
TS - Standard legs
TL - Transition leg (left)
TR - Transition leg (right)
- G** Select grommet option.
 Grommets are required for overhead cabinet.
OGN - No worksurface grommet
OGY - Yes worksurface grommet
 Grommets can be used for wire pass-through.
- H** Select paint color.
 Refer to the **Product Color Options** page in this price list.
- I** Select insert color.
 Refer to the **Product Color Options** page in this price list.
 Insert color also includes horizontal wireway (WW) if selected.
- J** Select laminate surface.

- Refer to the **Product Color Options** page in this price list.
- K** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- L** Select grommet color.
 Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
 KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
- C** Select surface direction.
L - Left
R - Right
Direction is determined by the side of the work-surface that has the 3" diameter leg. Calculate side based on user's normal seated position.
- D** Select height.
9 - 29" high
- E** Select horizontal wireway.
Add upcharge to unit price for WW option.
NW - No horizontal wireway
WW - Wireway
- F** Select frame style.
Add upcharge to unit price for WF option.
WB - w/beam

- G** Select location and type of leg.
TS - Standard legs
TL - Transition leg (left)
TR - Transition leg (right)
TB - Transition leg (both)
Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "TB" option for both transitional legs is not available.
- H** Select grommet option.
Grommets are required for overhead cabinet.
OGN - No worksurface grommet
OGY - Yes worksurface grommet
Grommets can be used for wire pass-through.
- I** Select paint color.
Refer to the **Product Color Options** page in this

- price list.
- J** Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.
- K** Select laminate surface.
Refer to the **Product Color Options** page in this price list.
- L** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- M** Select grommet color.
Refer to the **Product Color Options** page in this price list.

 2. Model number, including options. See "How To Build a Model Number".
 3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of the indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
- C** Select surface direction.
R - Right
L - Left
Direction is determined by the side of the work-surface that has the 3" diameter leg. Calculate side based on user's normal seated position.
- D** Select height.
9 - 29" high
- E** Select horizontal wireway.
Add upcharge to unit price for WW option.
NW - No horizontal wireway
WW - Wireway
- F** Select frame style.
Add upcharge to unit price for WF option.
WB - w/beam

- WM - w/modesty panel
WF - w/full modesty panel
See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)
- G** Select location and type of leg.
TS - Standard legs
TL - Transition leg (left)
TR - Transition leg (right)
TB - Transition leg (both)
Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "TB" option for both transitional legs is not available.
- H** Select grommet option.
Grommets are required for overhead cabinet.
OGN - No worksurface grommet
OGY - Yes worksurface grommet
Grommets can be used for wire pass-through.
- I** Select paint color.
Refer to the **Product Color Options** page in this

- price list.
- J** Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.
- K** Select laminate surface.
Refer to the **Product Color Options** page in this price list.
- L** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- M** Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
• The absence of the indicates that no choice is required.
• Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
- C** Select transition direction.
L - Left
R - Right
X - None
Transition direction is determined from the originating 24" or 30" basic or keyboard pad worksurface. All corner transitional surfaces connected at the same height do not require right (R) or left (L) transition direction. Use "X" for transition direction. Transition height required for "97" transitional.
- D** Select transition height.
77 - 27" to 27" high
97 - 29" to 27" high
99 - 29" to 29" high
- E** Select horizontal wireway.

- Add upcharge to unit price for WW option.
NW - No horizontal wireway
WW - Wireway
- F** Select frame style.
Add upcharge to unit price for WF option.
WB - w/beam
WM - w/modesty panel
WF - w/full modesty panel
See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)
- G** Select grommet option.
OGN - No worksurface grommet
OGY - Yes worksurface grommet
Grommets can be used for wire pass-through.
- H** Select paint color.
Refer to the **Product Color Options** page in this price list.
- I** Select insert color.
Refer to the **Product Color Options** page in this price list.

- price list.
Insert color also includes horizontal wireway (WW) if selected.
- J** Select laminate surface.
Refer to the **Product Color Options** page in this price list.
- K** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- L** Select grommet color.
Refer to the **Product Color Options** page in this price list.

WER
End-of-Run Corner Surface

- For use with fixed height workstations only
- Corner support leg is 7/8" square tubular steel
- Corner Overheads (Universal or Balance®) may only be specified on the full-leg side

WER
End-of-Run Curvilinear Surface

- For use with fixed height workstations only
- Corner support leg is 7/8" square tubular steel
- Corner Overheads (Universal or Balance®) may only be specified on the full-leg side

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.
74P - 74P edge
EP - Elliptical postformed edge
PF - Postformed edge

C Select transition direction.
L - Left
R - Right
 Transition direction is determined from the originating 24" or 30" basic or keyboard pad worksurface. When ordering an End-of-Run worksurface, the adjoining worksurface must have a transitional leg. Order a right or left transitional.

D Select height.
7 - 27" high
9 - 29" high

E Select horizontal wireway.
 Add upcharge to unit price for WW option.

NW - No horizontal wireway
WW - Wireway

F Select frame style.
 Add upcharge to unit price for WF option.
WB - w/beam
WM - w/modesty panel
WF - w/full modesty panel
 See pricing column for full modesty panel upcharge.
 w/ Full modesty panel (available on 29" high only)

G Select grommet option.
 Grommets are required for overhead cabinet.
OGN - No worksurface grommet
OGY - Yes worksurface grommet
 Grommets can be used for wire pass-through.

H Select paint color.
 Refer to the **Product Color Options** page in this price list.

I Select insert color.
 Refer to the **Product Color Options** page in this

price list.
 Insert color also includes horizontal wireway (WW) if selected.

J Select laminate surface.
 Refer to the **Product Color Options** page in this price list.

K Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.

L Select grommet color.
 Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
 KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

A B C D E F G H I J K L M N O

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How To Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
 - 74P** - 74P edge
 - EP** - Elliptical postformed edge
 - PF** - Postformed edge
- B** Select edge style.
- C** Select PowerUp® module location.
 - PUN** - No module
 - PUL** - Left module; add \$165
 - PUR** - Right module; add \$165
 - PUC** - Center module; add \$165
 - PUB** - Both left and right modules; add \$330

PUB option only available on 60", 66" and 72" wide worksurfaces. PUC option: Overhead storage is not available on 66" or 72" basic WorkZone worksurfaces with center location PowerUp modules.
- D** Select height.
 - 7** - 27" high
 - 9** - 29" high
- E** Select wire trough.
 - Add upcharge to unit price for WT option.
 - NT** - No wire trough
 - WT** - Wire trough

Available in black only.
- F** Select electrical option.
 - Add upcharge to unit price for T6 option.
 - NP** - No power
 - T6** - T6 power

If T6 power is specified, receptacles, jumpers and infeeds are to be specified separately
- G** Select frame style.
 - Add upcharge to unit price for WF option.
 - WB** - w/beam
 - WM** - w/modesty panel
 - WF** - w/full modesty panel

See pricing column for full modesty panel upcharge.
 w/ Full modesty panel (available on 29" high only)
- H** Select location and type of leg.

- TS** - Standard legs
- TB** - Transition leg (both)
- TL** - Transition leg (left)
- TR** - Transition leg (right)
- I** Select grommet option.
 - Grommets are required for overhead cabinet.
 - OGN** - No worksurface grommet
 - OGY** - Yes worksurface grommet

Grommets can be used for wire pass-through.
- J** Select paint color.
 - Refer to the **Product Color Options** page in this price list.
- K** Select insert color.
 - Refer to the **Product Color Options** page in this price list.
 - Insert color also includes wire trough (WT) if selected.

 - Refer to the **Product Color Options** page in this price list.

- M** Select edge color.
 - Refer to the **Product Color Options** page in this price list.
 - Edge color offerings are based on edge style selections.
- N** Select grommet color.
 - Refer to the **Product Color Options** page in this price list.
- O** Select PowerUp® module color.
 - Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
 KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- Quantity of each item.
 - Model number, including options. See "How to Build a Model Number".
 - Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
74P - 74P edge
- C** Select surface direction.
L - Left
R - Right
- D** Select PowerUp® module location.
PUN - No module
PUL - Left module; add \$165
PUR - Right module; add \$165
PUC - Center module; add \$165
- E** Select height.
9 - 29" high
- F** Select wire trough.
Add upcharge to unit price for WT option.
NT - No wire trough
WT - Wire trough
Available in black only.
- G** Select electrical option.
Add upcharge to unit price for T6 option.
NP - No power
T6 - T6 power
- H** Select frame style.
Add upcharge to unit price for WF option.
WM - w/modesty panel
WF - w/full modesty panel
See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)
- I** Select location and type of leg.
TS - Standard legs
TB - Transition leg (both)
TL - Transition leg (left)
TR - Transition leg (right)
- J** Select grommet option.
Grommets are required for overhead cabinet.
OGN - No worksurface grommet
OGY - Yes worksurface grommet

Grommets can be used for wire pass-through.

- K** Select paint color.
Refer to the **Product Color Options** page in this price list.
- L** Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes wire trough (WT) if selected.
- M** Select laminate surface.
Refer to the **Product Color Options** page in this price list.
- N** Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.
- O** Select grommet color.
Refer to the **Product Color Options** page in this price list.
- P** Select PowerUp® module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
 KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

HOW TO ORDER

- Indicate the following information on order form:
- 1. Quantity of each item.
- 2. Model number, including options. See "How To Build a Model Number".
- 3. Any special service required.

Note: • The indicates that a choice is required.
 • The absence of the indicates that no choice is required.
 • Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select edge style.
 74P - 74P edge
 EP - Elliptical postformed edge
 PF - Postformed edge
- C** Select PowerUp® module location.
 PUN - No module
 PUL - Left module; add \$165
 PUR - Right module; add \$165
 PUC - Center module; add \$165
 PUB - Both left and right modules; add \$330
 PUB option only available on 60", 66" and 72" wide worksurfaces.
- D** Select wire trough.
 Add upcharge to unit price for WT option.
 NT - No wire trough
 WT - Wire trough
 Available in black only.

- E** Select electrical option.
 Add upcharge to unit price for T6 option.
 NP - No power
 T6 - T6 power
 If T6 power is specified, receptacles, jumpers and infeeds are to be specified separately
- F** Select frame style.
 Add upcharge to unit price for WF option.
 WM - w/ Modesty panel
 WF - w/ Full modesty panel
 See pricing column for full modesty panel upcharge.
- G** Select grommet option.
 Overhead cabinet can NOT be ordered.
 OGN - No worksurface grommet
 OGY - Yes worksurface grommet
 Grommets can be used for wire pass-through.
- H** Select paint color.
 Refer to the **Product Color Options** page in this price list.
- I** Select insert color.

- Refer to the **Product Color Options** page in this price list.
- J** Select laminate surface.
 Refer to the **Product Color Options** page in this price list.
- K** Select edge color.
 Refer to the **Product Color Options** page in this price list.
 Edge color offerings are based on edge style selections.
- L** Select grommet color.
 Refer to the **Product Color Options** page in this price list.
- M** Select PowerUp® module color.
 Refer to the **Product Color Options** page in this price list.

- L** Select grommet color.
 - Refer to the **Product Color Options** page in this price list.
- M** Select PowerUp® module color.
 - Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.
