Power Infeed

Splitter

Cable Mounting Clip

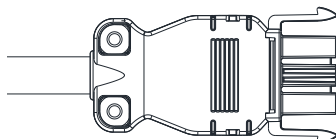

Mounting Screw

Tools Required:

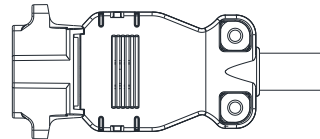

- #2 Phillips Head 
- Drill 

Connection Type

NOTE: Splitter must be used to connect cords

Male Connection

Female Connection

Splitter

Step 1 - M2X installation to top

1. Attach 1 clip, at each end of unit base with short leg of clip sliding into recess.
2. Route M2X unit connection cords through top cutouts as power unit is lowered into opening. As unit is pushed into the opening the clips will grip the top material wall.
3. Select adapter or blank cover for unit open window.
The 12-pack data adapter kit has been provided with unit to support a variety of connection options.

Securing Connections and Cables

2. Position splitters to allow cables to route under top freely and install (2) #6 x 5/8" mounting screws to secure, do not over tighten as could damage splitter.
3. Install cable mounting clips along cables spacing no more than 18" apart with #6 x 5/8" mounting screws to secure unit and jumper cables.

Power Infeed Connection

1. Use cable clips to route the cord through the channel to the floor outlet. Secure excess cord in the vertical channel or to the table with clips.
2. Plug power infeed into building power source and check unit outlets to verify power.
