Attaching the Wall Hanger to the Building Walls

Note:

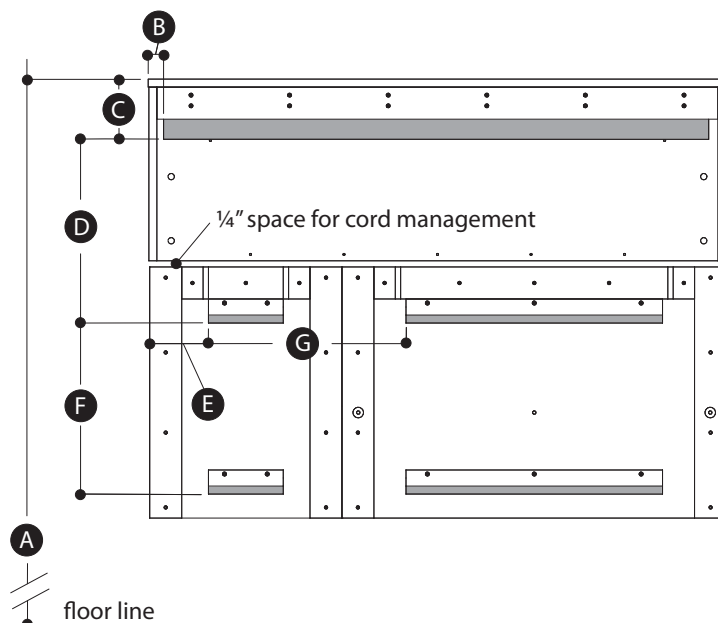

1. All measurements are from the bottom of the wall cleat illustrated in grey.
2. Make sure all horizontal measurements are level either with a standard level or a digital laser level.
3. Check for high points in the floor.
4. See next page for additional diagrams and tips.

Step 1

Attaching the Wall Hangers

- Unpack wall hanging components, do not remove the wall hanger.
- **Measurement A**
Establish the overall landscape height.
- 81" or 69" are the two heights in Flux
- if there is a wardrobe style cabinet place and level that unit first.
- **Measurement B**
Establish the first vertical measurement by measuring up the wall hanging cabinet as indicated in the diagram to the right then mark the wall.
- **Measurement C**
Establish the first horizontal measurement by measuring to the wall hanging cabinet as indicated in the diagram to the right then mark the wall.
- Repeat if needed, measure for **D, E, F, G**, for additional wall hanging components.
- Identify the proper method for installing the wall hanger to the wall. Remove the wall hanger from the cabinet and pre-bore the wall hangers, if needed.
- Fasten the wall hanger to the wall in the proper position.

Notice To Installers: Failure to comply with installation instructions will compromise the safety, durability and performance of this product, which may risk injury to the user of this product and/or diminish the product life cycle. Jasper Group assumes no liability in these instances.

Step 2

Hanging the Components

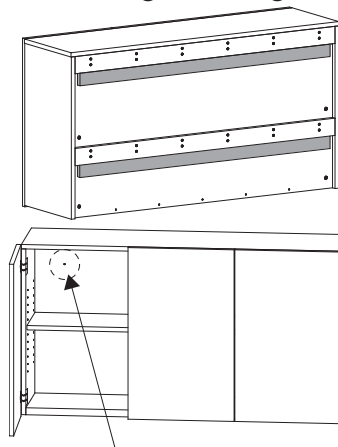

- Start with wall boards first then attach wall cabinets.
- Lift, position and place the wall board(s) as indicated onto the wall hanger per the plan.
- Lift, position and place the wall cabinet(s) as indicated the wall hanger per the plan.

Note: *Optional tasklights should be attached prior to hanging the components for proper wire management.*

Additional Information

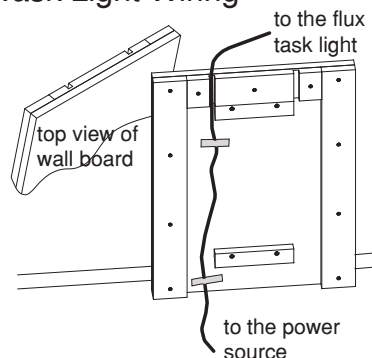

Double High Storage Cabinet

two wall hangers per cabinet.

requires a safety attachment to prevent accidental cabinet lift, use the #8 pan head screws (included with the double high cabinets) to fasten through the inside back to catch the wall hanger

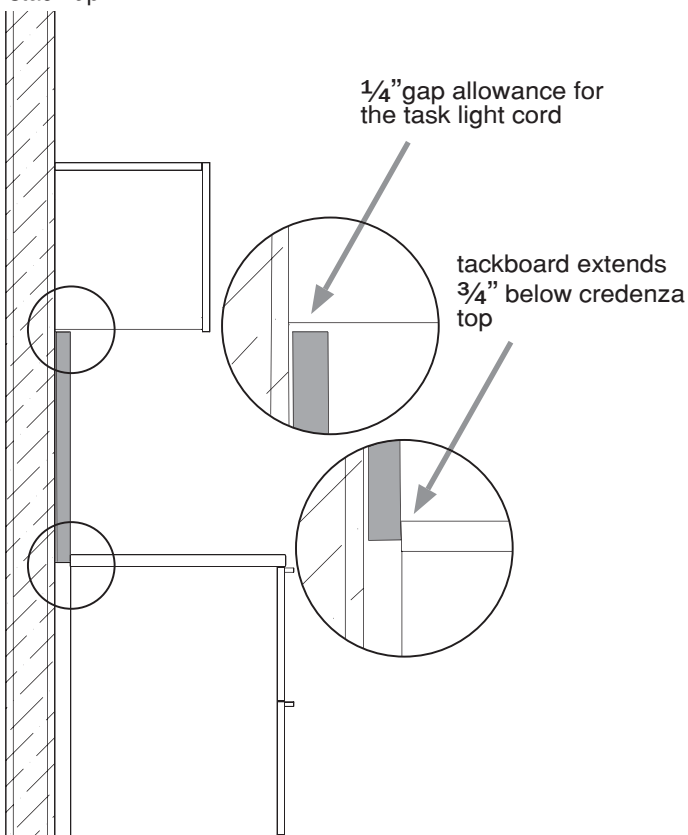

Task Light Wiring

a slot at the top of the wall board allows for the Flux task light wiring to run behind the wall board, it is recommended to use tape (loosely attached) to hold the cord in place during installation

*** Important Information

must maintain these two dimensions to assure proper stack-up

Notice To Installers: Failure to comply with installation instructions will compromise the safety, durability and performance of this product, which may risk injury to the user of this product and/or diminish the product life cycle. Jasper Group assumes no liability in these instances.
