Indie Lounge Specifications

Upholstery Selection

When selecting the upholstery materials, consider the affect the upholstery structure has on the appearance of the comfort wrinkles.

High wool content upholstery, soft pliable vinyl, non-backed upholstery materials may limit the appearance of comfort wrinkles.

Highly structured, thick vinyl, backed non-stretch upholstery materials and leather can increase the appearance of comfort wrinkles.

Note: Large scale and geometric patterns applied over Indie soft contours with false welt details will impact the pattern visual.

Upholstery Detail - False Welt

False Welt - Double fold upholstery seam detail is present on Indie Lounge, Low Lounge and Pouf units.

An integral part of the upholstery application, the false welt creates a defined line while maintaining flexibility for ultimate casual comfort.

- Cubby shelf mounted simplex receptacle and two USB/10' - three prong power cord/field installed.
- Specify Black (B) or White (W). Can be left or right mounted under the cubby shelf. Cord color will match unit unless optional Graphite cord is specified.

Additional Information

In any application, determining the overall acoustic value of a space can only be determined by testing space with all surface elements present. STC test was preformed on a single 60"h x 48"w freestanding screen and NRC test was performed on a double 60"h x 78"w freestanding screen.

STC (Sound Transmission Class)

represents a material or product's ability to block sound from traveling through a wall, ceiling, floor or other building assembly.

NRC (Noise Reduction Coefficient)

measure the amount of energy absorbed when it strikes a particular surface.
