Orders

Orders

Please send P.O.s to orders@amqsolutions.com.

Cancellations

Orders may be cancelled within 48 hours of order placement in writing via email to orders@amqsolutions.com. Please note that orders are not officially cancelled until a confirmation is sent via email from AMQ. Custom or made-to-order products are not eligible for cancellation.

Returns and Exchanges

We do not accept returns or exchanges on products; sales are final once acknowledgments are sent. If a product is ordered by mistake or other issue arises, contact us at orders@amqsolutions.com.

Change Orders

Orders may be changed within 48 hours of order placement. The request must be made via email to orders@amqsolutions.com. The change order is subject to approval and is not accepted until an AMQ acknowledgment is sent to the dealer. In the event that a change order is accepted, change fees may apply. Lead time starts on the day of approval of changes.

Pricing/Order Entry Errors

Claims for pricing or order entry errors must be made no later than 48 hours from receipt of an AMQ acknowledgment. After the 48 hour grace period, customers will be responsible for orders as they are acknowledged.

Please send emails to orders@amqsolutions.com along with your order acknowledgment number, line number with error and detail of the error.

Lead Times

Lead times vary by product - refer to our Lead Time table. Lead time begins the day after receipt of a clean P.O., including receipt of deposit if applicable. When your order is shipped, a tracking notification will be emailed to the contact specified on your purchase order.

Order Fulfillment

We make every attempt to ship all of our orders complete. In the event of a partial or split shipment, you will be notified and an estimated date will be provided for the backordered items. We cannot guarantee which warehouse the product will ship from.

Customer has 10 calendar days after delivery at the specified location to file a claim with AMQ for missing items or AMQ errors not obvious at the time of delivery. If AMQ determines missing items or error was made by AMQ, AMQ's sole obligation is to replace the missing items or correct error and ship at AMQ's expense. AMQ does not cover labor or trip charges. Customer waives right to file a claim if filed after 10 calendar days of receipt of shipment.

Warranties

Product warranties vary; refer to the Warranty sheet in Dealer Tools.

AMQ's obligation under this warranty is limited to replacing any product or part that it determines to be defective after inspection by its authorized representative, following receipt of written notice of the defect from the purchaser within the warranty period. This warranty shall apply to the original purchaser only, is non-transferable, and is not applicable outside the United States, Canada, and Mexico.

This warranty is based on normal installation and use of the product in an 8-hour shift. This warranty does not apply to:

- Damage in shipment caused by a carrier
- Defects caused by improper installation
- Products subject to improper use and conditions
- Customer modifications to the product
- Any product that has been modified, altered, tampered with or repaired by any person other than an authorized representative of AMQ
- Normal wear and tear

Labor charges and/or damage incurred in the installation, repair, or replacement of any products are excluded; AMQ will replace the product if the claim is approved.

Product Design

The right is reserved by AMQ to make changes in design and material, as well as discontinuance of parts and units when such action is deemed to be an improvement in design, function and/or construction.

Warranty Claims

Please email claims to cc@amqsolutions.com.

¹The default lead time is 12 days when 10 days is not requested.
²Larger orders may extend past 25 days depending on inventory availability.

Shipping

Will Call

AMQ offers Will Call upon request; please contact orders@amqsolutions.com for details.

Freight Terms

Freight is included in pricing for all \$1500+ Net Orders, and Seating- or Accessories-only Orders regardless of Net, shipped within the 48 contiguous United States. For orders under \$1500 Net, a \$100 surcharge is added.

All shipments within the 48 contiguous United States, except those designated ports of disembarkation, will be shipped FCA Factory, freight prepaid and allowed regardless of weight. AMQ may select the most appropriate mode of shipment from the manufacturing point of its choice. Special shipping methods and/or handling (including customer requested split shipments) will be subject to an additional charge. Any special freight requirements must be requested prior to order placement and are subject to approval by AMQ. Please contact AMQ Customer Care team for details.

Freight – Canada/Hawaii/Alaska

For shipments to Canada, AMQ pricing only includes Transportation fees (dock to dock). Any other fees or costs associated with shipment, such as customs clearance and import duty/taxes shall be paid directly by the Customer. For shipments to Hawaii/Alaska, AMQ pricing does not include freight. Customer will be responsible for arranging and paying all shipping costs.

Commitment Delivery Option

AMQ offers 12 day delivery on 97% of our portfolio, when requested. Delivery times are at the discretion of the carrier within reasonable transit time unless special arrangements have been agreed to in writing between the Customer and AMQ prior to shipment. There is an additional charge to guarantee delivery on a specific day. These charges will be quoted at Customer request.

Redelivery and Re-consignment of Freight

The Customer will be charged for redelivery or re-consignment of all orders (regardless of shipping terms agreed to) if redelivery or re-consignment was caused by a Customer change after the goods have left AMQ's dock.

Shipment Damage Claims

All shipments must be carefully inspected by Customer before acceptance. The Customer must record any damage or shortages noted at time of delivery on the Bill of Lading, and provide this information to AMQ immediately along with photos of any damage. AMQ will arrange inspection by the carrier. If Customer believes it has uncovered further damage after delivery they must take photos of the damage and immediately request inspection by the delivering carrier. Damaged freight must be kept at point of delivery in original packaging for inspection by carrier until further notice by AMQ. If carrier is designated by AMQ, then AMQ will seek recourse on behalf of the Customer. Freight Claims must be filed within 10 days of delivery date.

AMQ warrants to the original purchaser that the products it manufactures are free from defects in design, material and workmanship. Subject to the limitations below, AMQ warrants each product in this catalog to be free from material defects in materials and workmanship.

Title

Title and risk of loss or damage shall pass from AMQ to Customer/Dealer upon delivery to the carrier, including Steelcase trucks.

Submission of Claims

Please submit all order fulfillment, shipping, and warranty claims to cc@amqsolutions.com.

Order Processing

Please send purchase orders to orders@amqsolutions.com.

- Lead times start from the next day after receipt of clean P.O.
- P.O.s with missing information/finishes or incorrect pricing will be placed on order processing hold and the lead time will not start until the revised P.O. is sent to Customer Care (orders@amqsolutions.com).
- Please provide .sif file and AMQ quote number along with P.O., if applicable.
- Orders will be acknowledged within 24-48 hours with an AMQ acknowledgment number.
- Claims for quote errors, pricing, order entry errors and/or incorrect finishes must be made within 48 hours of receipt of acknowledgment. After 48 hours, AMQ will not be responsible for errors.
- P.O.s must include your Joey Coin # in order to obtain Joey points. Register at amqsolutions.com/joey and within 5 business days you'll receive your Joey Coin #.

Please be sure to check order acknowledgments to confirm accuracy of products, fabrics and finishes against your purchase order.

Payments & Deposits

Terms of payment will be established based on the credit rating and credit information provided by and for specific customers. Orders are invoiced at the time of shipment or will call date. Standard payment terms are net 30 days.

	Orders Under 40,000 Net	Orders Over 40,000 Net
Deposit	No Deposit Required*	50% Deposit Due Upon Order
Balance Due	Net 30	Net 30

*First order with new dealership requires 50% deposit.

Worksurfaces

AMQ worksurfaces are low pressure laminate (LPL).

Available in linear, 90° and 120° degree shapes in thirteen colors: Acacia, Arctic White, Ash Wenge, Clay Noce, Clay Wenge, Clear Maple, Clear Oak, Clear Walnut, Graphite Walnut, Milk White, Natural Cherry, Seagull, and Virginia Walnut.

Specifications

LPL (low pressure laminate)

1 inch/25mm thick

3mm PVC on four sides

Linear, 120, extended corner

Our linear worksurfaces come in 48", 54", 60", 66" and 72" widths at 23", 24", 29", or 30" depths. Plus 46", 52", 58", 64" & 70" widths at 23", 24", 29", or 30" depths.

72" width

Worksurfaces are 1" thick with 3mm PVC on 4 sides.

66" width

120° worksurfaces also available for ACTIV height adjustable base.

60" width

54" width

48" width

Privacy Screens

We offer 3F privacy screens for your open plan environments.

3F Felt Screens offer 5 attachment options with varying functionalities

3F Screens

AMQ 3F felt screens are 18mm thick made from 100% Polyester.

Oeko-Tex Standard 100

Screen Clips and Brackets

AMQ screen clips vary by product line and configuration. All sold in pairs (separately from screens). Activ base clips work with worksurfaces between .7"-1.5" (18mm and 40mm) thickness.

Iline

Kinex double run

Top Mounted Bracket

Top Mounted Bracket Clamp

Undermounted Sleeve Bracket

Fixed Privacy Modesty Bracket

Height Adjustable Bracket

Screen Corner Connector

3F Screens

Modesty & Insert Panels

Kinex End Panel

End Panel for 24" and 30" DR applications.
Available in Platinum and White.

Workstation Design Guidelines & Requirements

Overview

Designed for movement with dynamic seating, adjustable work tools and height-adjustable desks are important for today's office workers.

To determine the best height-adjustable solution, consider these four criteria:

1. Adjustability needed: What is the height range requirement? (seated or sit-to-stand)
2. Worksurface size needed: What does the physical space look like? (worksurface configuration)
3. Equipment/tools used: What type of computer equipment and other work tools are being used on the worksurface? (Load capacity)
4. Use: What is the height adjustable desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

WARNING

Risk of Serious Injury. If not used as intended, moving work-surfaces can pinch or injure people, or damage property. Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

Tips

Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of height-adjustable desks.

Weight

The maximum allowable load (varies by height-adjustable desk) should be evenly distributed and must not be exceeded.

Width

Specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a height-adjustable desk and a fixed object.

Depth

When placing a height-adjustable desk against a panel or wall specify the worksurface depth shorter to provide a minimum 1" gap. This eliminates pinch points and adds clearances for cable access.

Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the height-adjustable desk is not impeded because of cables. Consider the addition of a cable riser, cable basket, or cableway to help harness these wires and cables.

Power

Plan easy and unobstructed access to electrical outlets for computer equipment and height-adjustable desks (when applicable).

AMQ Specification Guide

WARNING

Risk of serious injury.

Bases-only warranty limitations and potential for injury: The use of worksurfaces that do not comply with the AMQ defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all AMQ Warranties, expressed or implied.

The use of worksurfaces that do not comply with AMQ criteria voids any AMQ claims of compliance with ANSI/BIFMA, UL, LEED, or other applicable requirements. The use of non-AMQ worksurfaces on AMQ height adjustable bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. AMQ is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-AMQ worksurface, and assumes no liability for their compliance with standards when height adjustable bases are used without a AMQ worksurface as intended.

Worksurface Criteria and Limitations

The use of non-AMQ worksurfaces is not recommended. Any use of a non-AMQ worksurface requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected worksurface construction and attachment means. The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen worksurface.

Tips

- Height-adjustable bases include fasteners intended for use with AMQ worksurfaces. These fasteners may be suitable for worksurfaces meeting the following criteria: Medium-density or higher particleboard or berboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater.
- Fasteners located a minimum distance of 1" from any edge.

Electrical — General

We use the USA-based company Byrne Electrical for all our power and data.

The Byrne 8-Trac System and Phase 3 are UL recognized as an Office Furnishing Accessory (UL 1286), and are UL Listed as a Manufactured Wiring System (UL 183) in full compliance with electrical specifications found in the National Electrical Code (NEC). It also complies with municipal standards such as New York, Los Angeles and San Francisco.

To learn more about Byrne, visit their website at www.byrne-electrical.com

Electrical — 3 Circuit/5 Wire

The Byrne Phase 3 System is similar to 8-trac system except is a double sided 3-Circuit/5-Wire system. It Includes flexible mesh conduit jumpers (UL1286 only). Also offers multiple circuit configurations selected by the receptacles.

Specifications

UL183 Listed and UL 1286 Recognized in full compliance with National Electric Code (NEC)

3-Phase System

Modular Receptacles

Flexible mesh conduit jumpers (UL1286 only)

Multiple Circuit configurations selected by receptacles

Double-sided system

Wire Diagram for 3 Keying

Electrical — 4 Circuit/8 Wire

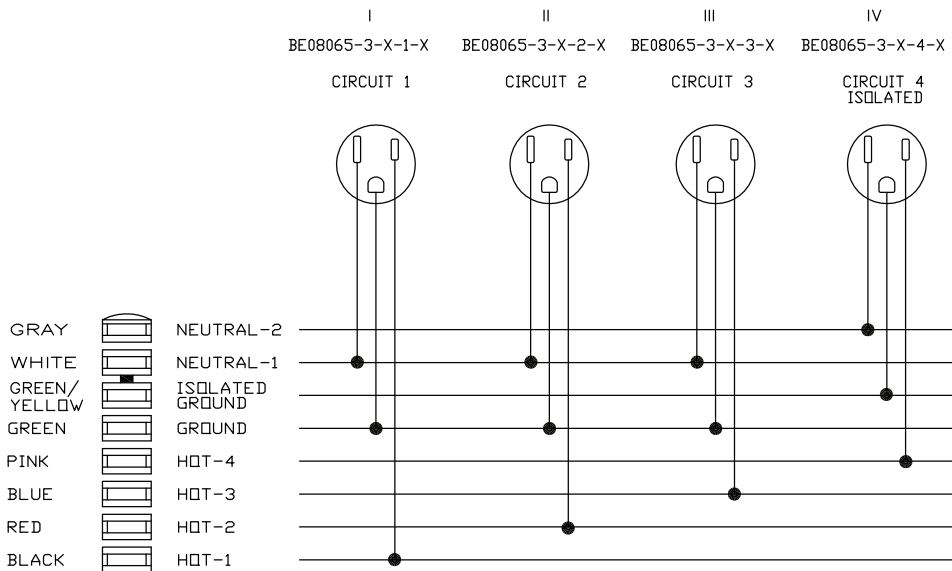

BYRNE 8-TRAC SYSTEM

The Byrne 8-Trac System is rated for 15 amps allowing the use of 4 circuits with 4 line conductors, 2 neutrals and 2 grounds. Under NEC requirements, up to 13 duplex receptacles maybe used per circuit, with a total of 52 available receptacles if all circuits are used, per single power entry. The line conductors are 12 AWG, and share 12 AWG ground and a 10 AWG neutral. The fourth circuit is isolated and dedicated, and is serviced by its own line conductor, neutral and isolated ground. The Byrne System can be wired in both single and 3-phase configurations, 240/120V, 208/120V respectively. Additionally, a 3 hot, 3 general, 2 ground (3-3-2) wiring system is available.

The System accommodates panel applications of 2" to 3½" thick harnesses available from 12" to 1800" in length.

Assemblies are 100% electrically tested to ensure the highest quality and reliability.

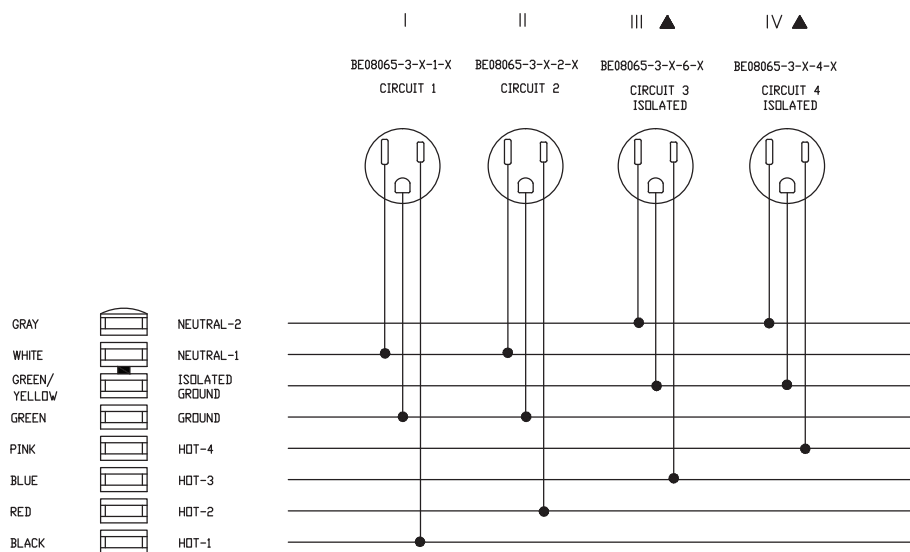

3+1

2+2 special order

Four-circuit, 2 + 2 Receptacle Option

General — Unique Electrical Codes

The primary electrical code used in the United States is the National Electrical Code (NEC) (NFPA70). While most states and cities use the NEC as is, some have created their own electrical code using the NEC as the basis for the requirements. There are 3 cities that have unique requirements that directly affect office furnishings installations:

New York, Chicago, and San Francisco. These unique requirements are detailed below.

Chicago

Chicago has their own electrical code based on the NEC.

Chicago does not allow the use of any modular systems. All electrical must be hardwired by a licensed electrician.

The specific wording of the 2009 Chicago Electrical Code is as follows:

18-27-605.2. General. Wiring in and on office partitions shall conform to all applicable chapter provisions. Relocatable wired partitions are not considered portable and, as such, plug and jack connections are not acceptable. All wiring is to be contained in listed and labeled electrical raceways and outlet boxes.

(a) Use. Wired relocatable office partitions shall be installed and used only as provided for by this Article. The biggest ambiguity is what product types will require TR receptacle for code compliance applications. For example, the NEC TR code dwelling requirements specify "appliances" as exempt from the scope of TR receptacles. Relocatable Power Taps are often grouped into this category.

Hardwire accessories can be used in Chicago if they have a metallic enclosure. This includes Mho, Assemble, Axil, Glenbeigh, and Wonderbar product lines. These hardwire units can be provided as a Chicago version which includes 15" of conduit and a 4X4 junction box.

New York City

- Allows the use of Office Furnishings Systems (as permitted by Article 605 of the NEC) but requires that licensed electricians install the electrical components into the furniture.
- Does not allow the use of any non-metallic liquid tight conduit.
- Metallic liquid tight conduit can only be 18" long.
- Flexible metal conduit used on infeeds can only be 6' long.
- Does not allow Manufactured Wiring Systems in furniture.

As of 2009, New York City allows the use of Relocatable Power Taps in office environments.

The New York Electric Code exception of Article 604 for Manufactured Wiring Systems includes Article 604(3) Such wiring may only be used for general lighting circuits above the hung ceiling line.

Until now, this statement was interpreted as lighting circuits must be above the ceiling, while other Manufactured Wiring Systems can be used below the ceiling line.

The new official interpretation requested by BIFMA indicates Manufactured Wiring Systems can only be used for lighting and must be above the ceiling. This applies to Byrne 8-Trac, Byrne 4-Trac and Byrne Phase 3 product lines. This interpretation has not been published on the official NYC Codes site even though more recent interpretations have been. BIFMA continues to work on a resolution to this issue.

San Francisco

San Francisco uses the California Electrical Code which in turn uses the NEC. San Francisco has additional / revised requirements that are called out as an addendum to the code. San Francisco does not allow the use of non-metallic liquid tight conduit and only metallic liquid tight conduit is permitted.

ARTICLE 356 – LIQUIDTIGHT FLEXIBLE NONMETALLIC CONDUIT: TYPE LFNC

- 356.10 Revise the first sentence of this section as follows:
 356.10 Uses Permitted.

LFNC shall be permitted to be used in exposed or concealed locations for systems not exceeding 50 volts for the following purposes:

356.12 Uses Not Permitted

356.12 Revise item 4 of this section as follows:

- (4) Where the operating voltage of the contained conductors is in excess of 50 volts, nominal, except as permitted in 600.32(A).

ACTIV PRO 2.0

Understanding	58
Specifying	68

ACTIV PRO 2.0 Height-Adjustable Desks and Bases

ACTIV PRO 2.0 supports wellbeing at work by allowing users to move between seated and standing postures throughout the workday.
► Specifying, page 68

Telescoping frame adjusts to fit any worksurface width from 44"W–72"W.

The 2-stage desk adjusts from 27"H–46.7"H.

Desk has a wood core with a Low-Pressure Laminate worksurface and is 1" thick.

Internal motors with electronic synchronization drive.

Leveling glides adjust $\frac{1}{2}$ " to install desk on uneven floors.

ACTIV PRO 2.0 desks are available in 90 degree and 120 degree 3-leg configurations.

Bases support a maximum distributed weight capacity of 225 pounds (2-stage) and 250 pounds (3-stage).
Tip: When calculating lifting capacity, subtract weight of the worksurface.

Push button with four programmable settings adjusts from $1\frac{3}{16}$ " inches per second.

Edge is available in 3 mm edge profile.

The 3-stage desk adjusts from 22.6"H–48.7"H.

ACTIV PRO 2.0 offers both T- and C-leg configuration for the rectangle desk.

The 3-leg desks have a height range of 22.6"–48.7".

The 3-leg corner desks are available in T-leg configurations.

Product Details

Low-Pressure Laminate

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles with matching 1 mm side and back edges are also PVC-free. ▶ See *Surface Materials* in this book for specific PVC-free availability, page 501.

Edge profile finishes always match laminate finishes.

Square corners are standard and have 90° corners on all four sides.

Overhang is available. The maximum overhang available as a standard option is 15"W.

T-leg configuration is available on ACTIV PRO 2.0 in 23"/24" and 29"/30" depth worksurface options. Corner desks are available in a T-leg configuration.

C-leg configuration is available on ACTIV PRO 2.0 in 23"/24" and 29"/30" depth worksurface options.

ACTIV PRO 2.0 3-stage desk adjusts from 22³/₅"H–48⁷/₁₀"H, while the 2-stage desk adjusts from 27"H–46⁷/₁₀"H in any increment.

4 pre-set programmable controller allows users to set the seated and standing height positions or pre-set heights for multiple users. When activated, the digital display will show the height of desk.

Obstruction sensing technology is standard with all ACTIV PRO 2.0 desks. The worksurface will backtrack when it makes contact with an object.

Casters are available as an option on ACTIV PRO 2.0. The front two casters lock while the back two casters do not.

Rectangle and 3-leg corner desk sizes are listed in actual dimensions to allow for 1" gap to adjacent furniture eliminating any pinch points.

Wiring and Cabling

Electric motor with whisper quiet operation adjusts at 1³/₁₀" per second. Motor is 24V DC and includes a 9' power cord. Motor for 2-leg and 3-leg desks have a 0.2W standby power.

ACTIV PRO 2.0 desks and bases are listed by ETL.

▶ See page 62

Power and data strips are field-installed on worksurface. Specify appropriate attachment bracket depending on application.

▶ See page 137 for *Work Tools*.

Cable management includes a simple wire tray that screws to the worksurface to help manage desk cables.

The corner desks come standard with two simple wire trays to manage cables.

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

21"H pedestal

On extended height desks, any storage higher than 18³/₄" will impede height range of desk. On basic height desks, any storage higher than 24" will impede the height range of the desk.

All assemblies meet or exceed ANSI/BIFMA standards.

Keyboard assemblies are not allowed on 23"D or smaller than 46"W height-adjustable desks. They do not meet minimum safety requirements.

Steelcase keyboard assemblies can be installed on 29"/30"D ACTIV PRO 2.0. Specify with an 11" track.

WARNING

Read base only warranty limitations.

Installation

Height-adjustable base requires attachment to the worksurface.

Base supports a maximum of distributed weight capacity of 225 pounds (2-stage) and 250 pounds (3-stage).

ACTIV Pro 2.0 90° Desk

Tip: The largest desk size is 72" x 72".

Tip: Base supports a maximum distributed weight capacity of 300 pounds. When calculating lifting capacity, subtract the weight of the worksurface.

Tip: All return depths are 24". The depths indicated at the bottom of "return width" indicate desk depths that include an extra stretcher bar needed for certain configurations.

Standard Includes	Required to Specify

ACTIV 2.0 3-Leg Base, 90° and 120° Base

ACTIV 2.0 3-Leg Base,
90° and 120° Base

Tip: Extended stretcher bars are recommended for any width 65" and larger. Short stretcher bars are included and are recommended for worksurfaces 48"-65"W.

Tip: For worksurfaces 65"W and larger, extended stretcher bars are recommended to maximize knee clearance and usable work-surface space.

Tip: 3-leg bases can be designed with up to 8" of overhang.

Standard Includes

- Electric height-adjustable base:
 - Black
 - Merle
 - Platinum
 - White
- 4-preset switch
- Power cord: 9'
- Two cable management trays
- 1/2" glide adjustment
- Attachment hardware

CLUVO

Understanding	80
Specifying	86

CLUVO Height-Adjustable Desks and Bases

CLUVO supports wellbeing at work by allowing users to move between seated and standing postures throughout the workday.

► Specifying, page 86

Product Details

Low-Pressure Laminate

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles with matching 1 mm side and back edges are also PVC-free. ▶ See *Surface Materials* in this book for specific PVC-free availability, page 501.

Edge profile finishes always match laminate finishes.

Radius corners are standard with a 2" radius on all four sides.

Overhang is available. The maximum overhang available as a standard option is 15"W.

T-leg configuration is available on CLUVO in 29"/30" depth worksurface options.

C-leg configuration is available on CLUVO in 24" and 29"/30" depths worksurface options.

CLUVO 3-stage desk adjusts from 22³/₅"H–48⁷/₁₀"H, while the 2-stage desk adjusts from 27"H–46⁷/₁₀"H in any increment.

Deluxe switch includes the ability to personalize the LED display, allows users to set seated and standing heights, and set reminders to change postures.

Up/down controller is available as an option and easily adjusts height of desk, at a rate of 2" per second, by simply pushing the up and down arrows.

Obstruction sensing technology is standard with all CLUVO desks. The worksurface will backtrack when it makes contact with an object.

Casters are available as an option on CLUVO. The front two casters lock while the back two casters do not.

Rectangle desk sizes are listed in actual dimensions to allow for 1" gap to adjacent furniture eliminating any pinch points.

Wiring and Cabling

Electric motor with whisper quiet operation adjusts at 2" per second. Motor is 24V DC and includes a 9' power cord. Motor for 2-leg desk has a 0.2W standby power.

CLUVO desks and bases are listed by ETL. ▶ See page 84

Power and data strips are field-installed on worksurface. Specify appropriate attachment bracket depending on application. ▶ See page 137 for *Work Tools*.

Cable management includes a simple organizer to manage desk cables.

Cable baskets, available as an option or ordered separately, support cable management below the worksurface.

Leg sleeves, available as an option, help route the power cords down to the floor and provide additional finish options.

Controller can be mounted on either the left- or right-hand side of the top and is field installed.

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

On extended height desks, any storage higher than 18³/₁₀" will impede height range of desk. On basic height desks, any storage higher than 24" will impede the height range of the desk.

All assemblies meet or exceed ANSI/BIFMA standards.

Keyboard assemblies are not allowed on 23"D or smaller than 46"W height-adjustable desks. They do not meet minimum safety requirements.

Steelcase keyboard assemblies can be installed on 29"/30"D. Specify with an 11" track.

⚠ WARNING

Read base only warranty limitations.

Installation

Height-adjustable base requires attachment to the worksurface.

Base supports a maximum of distributed weight capacity of 250 pounds (2-stage) and 300 pounds (3-stage).

CLUVO 2-Stage Specifications

Handset	Up/down switch with lock or deluxe switch with LED
Safety	Obstruction detection technology
Foot Length in Inches	24" foot for 24"D top 30" foot for 29"D and 30"D tops
Legs	2 stage, available with T or C Leg

Mounting Options	3F Top Mounted Bracket/Clamp

3F Privacy Screen Bracket Requirements

3F Linear Screen

Bracket Requirements

Screen	Required	Recommended
Linear Side Screen	1 set (2 brackets)	1 set (2 brackets)
Linear Back Screen <60"	1 set (2 brackets)	1 set (2 brackets)
Linear Back Screen >60"	1 set (2 brackets)	1.5 set (3 brackets)

Note:

- Compatible with any bracket.
- Corner connectors are recommended when linear back screens and side screens are top mounted on the same desk.
- Screen brackets are specified separately and sold in sets of two.

3F Full Desk L Screen

Bracket Requirements

Screen	Required	Recommended
Full L Desk Screens <60"	1.5 set (2 brackets on back, 1 on side)	2 sets (2 brackets on back, 2 brackets on side)
Full L Desk Screens >60"	2 sets (2 brackets on back, 2 brackets on side)	2 sets (2 brackets on back, 2 brackets on side)

Note:

- Compatible with any bracket other than the height adjustable bracket.
- Full desk L screens have a 23" side depth.
- Screen brackets are specified separately and sold in sets of two.

3F Half Desk L Screen

Bracket Requirements

Screen	Required	Recommended
Half desk L screens	2 sets (2 brackets on back, 2 brackets on side)	2 sets (2 brackets on back, 2 brackets on side)

Note:

- Top mounted applications are compatible with the top mount brackets.
- Outer wrapped applications are compatible with sleeve brackets and fixed privacy modesty brackets.
- Half desk L screens are non-handed. Two half-desk L screens are required to wrap a full worksurface.
- Half desk L screens have a 30" side depth.
- Screen brackets are specified separately and sold in sets of two.

3F Privacy Screen Bracket Requirements

3F U Screen

Bracket Requirements

Screen	Required	Recommended
U Screens <60", Top Mounted	2 sets (2 brackets on back, 1 bracket on each side)	2 sets (2 brackets on back, 1 bracket on each side)
U Screens >60", Top Mounted	2 sets (2 brackets on back, 1 bracket on each side)	2.5 sets (3 brackets on back, 1 bracket on each side)
U Screens <60", Outer Wrapped	2 sets (2 brackets on back, 1 bracket on each side)	2 sets (2 brackets on back, 1 bracket on each side)
U Screens >60", Outer Wrapped	2 sets (2 brackets on back, 1 bracket on each side)	3 sets (2 brackets on back, 2 bracket on each side)

Note:

- Top mounted application: compatible with top mounted bracket.
- Outer wrapped application: compatible with sleeve brackets and fixed privacy modesty brackets.
- Screen brackets are specified separately and sold in sets of two.

3F Hooded Screen

Bracket Requirements

Screen	Required	Recommended
Hooded screens	2 sets (2 brackets on back, 1 bracket on side)	2 sets (2 brackets on back, 1 bracket on side)

Note:

- Only compatible with top mount bracket.
- The removable monitor arm cut-out ships with the hooded screen and is designed to accommodate applications with or without monitor arms.
- The cut-out can be removed to clamp monitor arms or can be plugged into the opening if monitor arms are not being used.
- Screen brackets are specified separately and sold in sets of two.

S-Series Pedestals

S-Series pedestals are a mobile or freestanding private storage solution used to store away files, paperwork, and other personal items.

Pedestals include pencil tray, box drawer divider, file hanger, anti-tip counterweight, locking casters, and removable lock core.

Field installed casters are standard on 1.5-High mobile pedestals.

Glides and casters are standard on 2-High pedestals.

15"W 1.5-High Mobile Pedestal (Box/File)

Locks are standard on pedestals and come installed on each unit. Locks are available with random keying only. Locks are labeled as "PR" with three randomly selected numbers.

To remove locks, a core removal key must be specified separately (**SS-CRK**).

Pedestal cushions available in a variety of fabric colors.

2-High Mobile/Freestanding (Box/Box/File) with Casters

2-High Mobile/Freestanding Pedestal (File/File) with Glides and Seat Cushion

Application

S-Series 2-High pedestals are only intended for freestanding or mobile applications. S-Series 2-High pedestals cannot be used under a worksurface or panel-mounted worksurface in fixed applications.

S-Series Lateral Files and Bookcase

S-Series Lateral Files and Bookcase

S-Series lateral files and bookcase are mobile storage solutions used to store and organize files and documents.

1.5-High Lateral File with Drawers and Casters

Locks are standard on lateral files and bookcase and come installed on each unit. Locks are available with random keying only. Locks are labeled as "PR" with three randomly selected numbers.

1.5-High laterals and bookcase are available in two finishes: platinum or white.

1.5-High Bookcase with Casters

1.5-High bookcase with casters include one adjustable shelf.

2-High laterals are available in three finishes: platinum, white, or black.

Lateral cushions are ordered separately for 2-High laterals only.

2-High Lateral File with Casters

Field installed lateral file drawers are standard with two hanging file frames.

To remove locks, a core removal key must be specified separately (**SS-CRK**).

Application Topics

S-Series 2-High laterals are only intended for freestanding or mobile applications. S-Series 2-High laterals cannot be used under a worksurface or panel-mounted worksurface in fixed applications.

Monitor Support	Up to 30"
Monitor Weight	4.5 – 20 lbs
Monitor Tilt Range	-85° – 15°
Height Adjustment Range	12"
Arm Extension	20"
Arm Retraction	6"
VESA hole sizes	75×75mm / 100×100mm

Intro display supports are available in single and dual assembly with universal slider bar tilt heads.

Intro monitor arm supports one or two monitors. Quick release tilt head standard.

Cable management is included.
Tip: Monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Product Details

Intro monitor arms are standard with 100 VESA plate and tilt head.

Intro monitor arms allow for monitor to rotate portrait to landscape orientation.

Monitor arm assemblies include mounting bracket options of C-clamp and through-mount.

Intro single and dual arm brackets can be C-clamped or through mounted.

Brackets are available in desk C-clamp and through-mount.

All monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Monitor Arm Assemblies and Supports Dimensions

• Features	• Intro Single (AMQCFINTRO)	• Intro Dual with Sliders (AMQCFINTRODLIDE)
-------------------	--	--

Lower Arm Rotation	200°	180°
Upper Arm Rotation	360°	360°
Rotation (portrait to landscape)	Yes	Yes
VESA Plate	100 mm	100 mm
VESA Bracket Range (side to side)	180°	180°
Vertical Adjustment Pole Range	N.A.	N.A.

Tip: Maximum monitor size may be impacted by thickness of monitor and location of VESA bracket mount. Dimensions are estimates.

**Focal length decreases with larger monitor size.*

Tip: All monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

LED Intro Task Lights

LED intro task lights provides ease of user adjustments to direct light where needed, plus a three-step dimming feature. LED light source for energy efficiency.

Capacitive touch switch is located on the back of the light source with dimming control. The first touch is 10% illumination, second touch is 50%, third touch is 100%, and the fourth touch turns off.

Product Details

LED intro single-arm lights are for use with worksurfaces 58"W or smaller.

LED intro double-arm lights are for use with worksurfaces 60"W or larger.

LED light performance with 3000K color temperature and a 90 color rendering index rating.

Adjustability at the light source and base directs light where needed.

Examples

- Light head swivels 350° (side to side)

- Light head pivots up and down 180° (up/down)

Capacitive touch on/off switch and dimming feature comes standard with three levels: 10%, 50%, and 100%.

Color temperature of LED is 3000K.

Color rendering index (CRI) is 90.

Light source knuckle and base knuckle provide articulation points for ease of adjustments to where the light is needed.

Freestanding base is ideal for placing on desk or table tops. Painted to match the entire light fixture and weighted to prevent tipping.

Connections

 Freestanding base

Wiring & Cabling

Light comes standard with single touch on /10%–50%–100% / off.

Power supply uses a modular cord with standard two prong plug, cord length 75".

Surface Materials

Paint

- 4135 Black Matte
- 4142 Platinum Gloss
- 4143 White Matte

Application Topics

Power cord length is 75". Consider distance from light to power receptacle, and if surface or under the work-surface power receptacle may be needed.

Powerstrip Intro

► Specifying, page 160

Product Details

Powerstrip intro offers two power, one USB-A and one USB-C intelligent 20W with a C-clamp mount for the desktop.

Desktop power configuration options and specifications include:

- Two power, one USB-A and one USB-C 20W
- Power outlet is 15A, 120V, 60Hz
- Tamper resistant power outlets

Meets spill test criteria.

Two power with 20 watt intelligent USB A+C (3 port):

- If only USB-C in use: delivers what the device needs up to 20 watts
- If only USB-A in use, up to 10 watts
- If both USB A+C in use, USB-A delivers up to 10 watts and 10 watts to USB-C. If USB-A device needs less than 10W, the remainder up to 20 watts goes to the USB-C device
- USB-A watt/amp output (2 port) is 10W/2A per port with dedicated charging ports

Under worksurface optional utility power-blocks do not ship with independent mounting hardware. They are designed to mount into the universal cable management kit without additional hardware.

Cable management kit comes standard with each powerstrip. Mounts under the worksurface to manage cords.

Optional Under Worksurface Utility Power

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management trays. These help keep the powerstrip in place when the tray is opened or closed.

Universal cable management tray—small tray holds four outlets and large tray holds seven outlets under worksurface utility power.

Overcurrent protection via a circuit breaker

prevents one powerstrip intro assembly from drawing more than 15 amps of power.

Overcurrent protection is included as standard with powerstrip intro configurations with more than four outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Powerstrip intro includes a 6-foot standard smooth cord with a diameter of 3/8".

Powerstrip intro includes a standard straight 3-prong plug. An overcurrent protection (OCP) 90-degree plug is also an option. Check with your local authorities having jurisdiction to see if overcurrent protection is required.

Overcurrent protection (OCP) includes a circuit breaker rated for 15 amps.

C-clamp is designed to accommodate worksurfaces up to 1 1/2" thick.

USB A+C 20W

Powerstrip intro USB ports are recommended for charging: cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices. Not recommended for devices needing higher output, more than 20-watts, like compact laptops. See Powerstrip Plus for higher output USB options.

Universal Cable Management Kit

► Specifying, page 162

Product Details

Universal cable management kit provides easy management and access to cords, cables, and power blocks under a workstation.

Optional smart straps allow for easy management of cables and cords in the cable management tray. Straps are 5³/₄" long.

Cable management tray is designed to fit behind the stretcher bar and understructure of most height-adjustable tables.

Cable management tray provides tool-free and hardware-free mounting of under worksurface utility power.

Cable management tray allows for a 4⁵/₈" gap around all four sides between the tray and the worksurface when mounted to allow for cable egress.

The small 15¹/₂" cable management tray is designed to hold one, 4 outlet, utility powerstrip. The tray does not have the capacity to hold more than one utility powerstrip.

The large 30" cable management tray holds two utility powerstrips in the raised bars section. There is capacity to add three utility powerstrips, two in the raised bar area and one more in the tray, strapped down.

SOTO Personal Box

► Specifying, page 163

Product Details

SOTO personal box provides user controlled area for small business or personal items.

SOTO personal boxes may be used freestanding or on 10" shelf.

SOTO personal boxes may be used individually or stacked horizontal. Boxes interlock when stacked horizontal.

SOTO storage box set of three fits neatly inside personal box.

SOTO personal box will fit inside c:scape furniture drawers and on shelves.

Surface Materials

SOTO personal box

Weight 0.3 lb

Slatwall

Slatwall allows for vertical stacking anywhere on the tile.

► Specifying, page 164

Slatwall tiles are standard in 12" or 18" heights and seven different widths.

Mounting brackets are available to correspond with selected furniture system and are ordered separately.

Slatwall can be panel-mounted or wall-mounted. 12" high Slatwall can be freestanding.

Actual Dimensions

	Freestanding slatwall stanchions	Slatwall tiles	Slatwall brackets
Depth	3"	1/2"	N.A.
Width	3 1/2"	24", 30", 36", 42", 45", 48", or 60"	2"
Height	16"	12" or 18"	12 1/3" or 18"

Product Details

Slatwall tiles are available for straight mounting applications only.

Slatwall tiles support a maximum of 60 lb.

Freestanding Slatwall stanchions are for use with 12"H Slatwall tiles only. Stanchions and Slatwall tiles must be ordered separately.

Freestanding Slatwall stanchions clamp to work surfaces $\frac{3}{4}$ " to 2" thick and uses a 2" footprint on the work surface.

Worksurface must be a minimum depth of 18" and able to support a maximum weight of 60 lb when using freestanding Slatwall stanchions.

In freestanding application, top of Slatwall is 15 $\frac{1}{2}$ " above mounting surface and is a fixed height. Rubber feet under stanchions ensure a tight fit without marring work surface.

Slatwall can overhang freestanding stanchions by 12" for tiles 48"W or less and 15" for 60"W tiles.

When using freestanding Slatwall stanchions, a 2" clearance is required below work surface to accommodate C-clamp.

Freestanding Slatwall stanchions cannot work in a corner application.

Freestanding Slatwall stanchions are not for use with glass, bullnose, knife edge, or other non-standard work surface edges.

Panel mount Slatwall brackets cannot be used with transaction top work surfaces.

Panel or wall-mount applications require a minimum of 13" vertical space between work surface and overhead bins or shelves.

Wall mount brackets must be installed in a wall stud.

Slatwall tiles, stanchions, and brackets
• 4799 Platinum

Freestanding Worktools

Trays

► Specifying, page 167

Product Details

Trays are available to accommodate letter, legal, and A4 filing.

Trays may be used with Slatwall or freestanding applications.

Trays are 2½"H and stackable.

Tray holds a maximum weight of 7 lb per tray.

Trays stack four high on 12"H Slatwall and six high on 18" Slatwall.

Surface Materials

Tray

LED Linear Shelf Lights

A properly diffused light source under the linear head provides a softly blended light pattern that reduces eye strain.
 ▶ Specifying, page 172

Optional occupancy sensor turns off after 30 minutes of no activity and will turn back on upon return.

Magnetic mounts and wood mount bracket hardware, both come standard with both LED light and optional occupancy sensor.

Single touch on/off pad plus touch and hold dimming for easy individual user control.

Continuous dimming from 100% to 15% with last state memory.

Light widths available in 17", 31", and 44".

Cord exits from either end of the light. When needed, allow 1 3/4" cord bend clearance. With optional occupancy sensor, allow additional 4 3/4" clearance from the light fixture.

Actual Dimensions

	Light	Occupancy Sensor
Depth	2"	2"
Width	17", 31", or 44"	2 9/10"
Height	1/2"	7/10"

Product Details

LED linear stand alone and daisy chain starter lights include the lamp, power supply, and both magnetic mounts, and wood bracket hardware with adhesive cord managers.

LED linear daisy chain lights include the lamp, daisy chain cords, and both magnetic mounts, and wood mount bracket hardware with adhesive cord managers.

Optional occupancy sensor is a separate component that connects to the light fixture and activates in 30 minutes when no movement is detected to conserve energy. It will also turn back on upon return.

Average rated lamp life of LED linear shelf lights is 50,000 hours.

Color temperature of LEDs is 3500K.

Color rendering index of LEDs is 92.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Connections

Lights mount recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnet mounts allow shelf lights to be installed without tools under most metal overhead storage bins or shelves.

Wood mount brackets allow shelf lights to be mounted to wood shelves.

Specify LED linear shelf light for use under 24" wide bins.

Light width	Number of LEDs in Standard Output	System Wattage Standard Output
17"	24	9.1
31"	48	17.6
44"	72	25.9

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply for 17" linear stand alone only uses a straight plug with a 9' 18 watt 24 volt wall transformer.

LED Linear Shelf Light Power Supply Dimensions

Tip: Cord length is 9'.

Power supply for 31", 44", or 17" starter light; 65 watt compact in-line brick straight plug. The cord is 11', 6' from power supply to power outlet and 5' from power supply to fixture.

LED Linear Shelf Light Power Supply Dimensions

Tip: Applies to 31", 44", and daisy chained.

Tip: Daisy chain starter light comes with a 65 watt power supply to support up to a limited number of lights – refer to chart for daisy chaining fixture. Daisy chain secondary lights do not come with a power supply, but instead come with two daisy chain jumper cords, one 8" and one 30" set.

Chart for Daisy Chaining Fixtures

Standard Output Linear Shelf Light											
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light										
	17"	6	4	3	2	2	1	1	-	-	-
31"	-	1	-	2	-	2	1	3	1	1	-
44"	-	-	1	-	-	-	1	-	1	-	2

- A 65 watt power supply is required for daisy chaining.
- Total system wattage of all fixtures together cannot meet or exceed 65 watts, see chart.
- Cannot daisy chain standard output and high output together.
- Cannot daisy chain 58" high output fixtures.
- Occupancy sensor must be positioned between the power supply and the first starter fixture.
- Only need one sensor when daisy chaining.

Tip: Each column is the maximum number of fixtures that can be daisy chained together.

Occupancy Sensor

- Turns off after 30 minutes of no activity and will turn back on upon return
- 360° lens view
- 90° outward detection angle
- 30" diameter coverage if mounted 15" above worksurface
- 36" diameter coverage if mounted 18" above worksurface
- Connects to fixture with one end-to-end connector. 8" or 30" jumper cords

Monolithic Panels

Panels are constructed with a rigid, tubular steel frame and are shipped fully assembled. Remember to order trim separately.

Vertical slots in panel accommodate hang-on components, overhead storage bins, shelves, worksurface supports, and connector brackets. Components can be mounted at 1" increments.

Base cavity accepts a factory-installed powerway
 ▶ See *Powerways*, page 208.

Removable base cover has receptacle knockouts. Base covers have a receptacle opening on the left and right side of the base cover. *Exception: 24"W base covers have a receptacle opening in the center of the base trim.*

Leveling glides adjust 1 1/2" to install panels on uneven floors.

Width	24", 30", 36", 42", 48", or 60"
Thickness	2"
Base Raceway Height	3 5/8"
Glides	1 1/2" adjustment

Product Details

Tackable acoustical has a skin on each side, covered with horizontal surface fabric.

Wiring & Cabling

Panel frames have hollow interior to allow routing cables from top cap through to base raceway.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Surface Materials

Base cover, top cap, and border

- Paint

Panel surface

- Fabric

Tip: Fabric is applied horizontally on the screen. Fabric must be of the same fabric group and color on both sides.

Monolithic Panels and Stacker Options

TEKTIS allows a wide variety of panel arrangements to meet specific functional and aesthetic needs.

Stacking Guidelines

Stackers are available in 12"H, 18"H, or 24"H in tackable acoustical or glass.

Maximum height is 78".

Maximum number of tackable acoustical stackers is three.

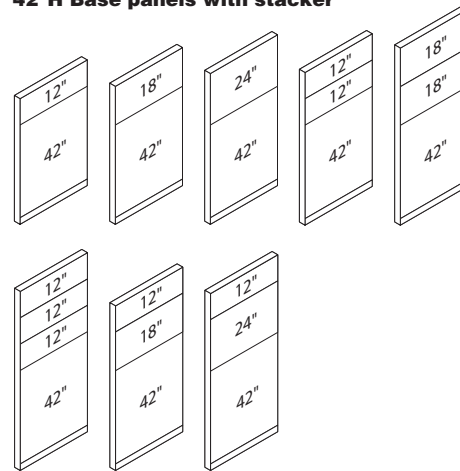

Maximum number of glass stackers is one.

Any height base panel can be used with stackers.

42"H Base panels

42"H Base panels with stacker

48"H Base panels

48"H Base panels with stacker

54"H Base panels

54"H Base panels with stacker

66"H Base panels

66"H Base panels with stacker

Panel Stackers

Stackers are constructed with a rigid, tubular steel frame and are shipped fully assembled.

Top cap and top cap aligner from base panel are used to trim the top of stacker.

Vertical slots in stackers, identical to slots in base panel, accommodate overhead storage, laminate common shelves, and connector brackets.

Actual Dimensions

Height	12", 18", or 24"
Width	24", 30", 36", 42", 48", 60", or 72"
Thickness	2"

Product Details

All existing base panels accept stackers.

Stackers do not include vertical trim, must be specified separately.

Up to 78"H

Base panels can accept one, two, or three stackers, up to a total height of 78". Base panels can only accept one glass stacker. All stackers are load bearing, but load cannot be mounted above 66" height.

▶ See page 190.

Two fork connectors are included with every stacker.

Attaching stackers to panels will not cause disruption to existing panel connections.

Spanning stackers are available in 48", 60", or 72" widths.

Stacker can span over an in-line connection between two base panels or two stackers. Width of stacker must equal total width of two base panels.

Two smaller stackers cannot be attached to the top of a larger stacker or panel.

Stackers are available in two surface options.

Tackable acoustical—skin on each side, covered with horizontal surface fabric.

Glass—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border.

Tip: Fabric and glass stackers cannot be combined on the same panel.

Application Topics

Maximum height with base panel and stackers cannot exceed 78".

Maximum number of stackers is three.

Any base panel can accept stackers.

Bins and shelves can hang from first or second, stacker, not above 66" in height.

When adding a stacker to existing panels with a power or cable pole connected at L-, T-, or X- corner, the universal panel connector can not be used. Contact orders@amqsolutions.com to order service parts for special connections.

Panel stackers cannot be used in a V- or Y-configuration.

Surface Materials

Border
• Paint

Panel surface
• Fabric
• 6500 Clear Glass

Tip: Fabric is applied horizontally on the screen. Fabric must be of the same fabric group and color on both sides.

Panel Trim

Steel top caps are standard in low height.

Change-of-height trim

End-of-run trim

Vertical trim

Product Details

Vertical corner trim allows cables to be laid in before the cover is snapped into place and can be removed for cable access. Corner trim is required for L-, T-, and X-configurations.

Always specify vertical corner trim the same height as the tallest panel.

L-configurations:

Actual Dimensions

	Vertical Corner Trim	End-of-Run Trim	Change-of-Height Trim
Height	42", 48", 54", or 66"	42", 48", 54", 60", 66", 72", or 78"	6", 12", 18", 24", or 36"
Standard Thickness	1/4"	1/4"	1/4"

T-configurations:

Low universal end cap

Low universal end cap

Low universal end cap

X-configurations:

Low universal end cap

Tip: In an X-configuration, carrier and vertical corner trim must be attached to one panel prior to installation of last panel.

Low universal end cap

Low universal end cap

End caps:

Low universal end cap

Vertical corner trim and corner change-of-height trim are required in combination for L-, T-, and X-configurations when stackers are used. All corner trims include a low trim end cap.

Always specify vertical corner trim the same height as the tallest base panel. Specify vertical corner change-of-height trim to cover the ends of stackers.

Vertical end-of-run trim covers the exposed end of panels and includes a low trim end cap.

Vertical end-of-run trim must match height of base panel.

Vertical end-of-run trim must match combined height of base panel and stacker.

Vertical in-line change-of-height trim is available 6"H, 12"H, 18"H, 24"H, and 36"H. Trim covers the exposed section of the taller panel when panels of different heights are joined.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections. Both two- and three-way end caps are included with each 120° vertical corner trim package.

▶ Page 247

Application Topics

Always specify vertical corner trim the same height as tallest panel.

When specifying a base panel and a stacker, specify corner trim to match base panel and change-of-height trim piece to cover the ends of stacker.

When base panel and stacker are specified in end-of-run trim must match total overall height.

Surface Materials

Trim
• Paint

Panel Connectors

Universal connector package joins panels of the same height in a straight line or in L-, T-, or X-configurations. The package, included with panels, contains two universal connectors—one for the top and one for the bottom connection.

Same connector is used at both the top and bottom of panel.

Different slots are used to create in-line, L-, T-, or X-conditions.

Left Hand
Right Hand

Change-of-Height Connector

Universal Connector

120° Connector

Wall Start

Product Details

Wall start connector package is used to anchor a panel run to a perpendicular wall. Mounting screws that connect the brackets to the panel are included in each package.

Tip: Vertical end-of-run trim is not required at the end of panel that is attached to the wall.

Change-of-height in-line and corner panel connector package

is used to join panels at varying heights in a straight line or at 90° angles. Package contains left and right connectors for both in-line and corner configurations.

Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.

Left and right in-line connectors are required to connect panels in a straight line.

One-handed corner connector is required for connecting panels at 90°.

To connect panels in a 120° application, a 120° panel connector is required. A two-panel connection requires one 120° connector package. A three-panel connection requires three 120° connector packages.

Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.

▶ Page 247

120° connectors are for the same height panels only.

120° and 90° connections can occur within the same workstation.

Surface Materials

Universal and 120° connector

- 0835 Black

Stability Guidelines

Tackable Acoustical Panels without Components

Two-panel run

Three-panel run

Four-panel run

Multiple panel run

Tackable Acoustical Panels

Two-Panel Run with Supported Components

Optional worksurface supports:

- 20"W H-leg
- Pedestal with filler
- Lateral file
- End panel

Tip: Overhead storage bins cannot support any load on top.

Tackable Acoustical Panels, continued

Three-Panel Run with Supported Components

Optional worksurface supports at 30"H:

- 20"W H-leg
- Pedestal with filler
- End panel

Tip: Overhead storage bins cannot support any load on top.

Tackable Acoustical Panels without Components

120° Connection

Tackable Acoustical Panels with Supported Components

One Panel—120° Connection

Optional worksurface supports:

- Pedestal with filler
- 90° panel connection—panel width must match worksurface depth
- End panel

Optional worksurface supports:

- 90° panel connection—panel width must match worksurface depth
- 20\"/>

Tackable Acoustical Panels with Supported Components, continued

Two-Panel Run—120° Connection

Optional worksurface supports:

- Pedestal with filler
- 90° panel connection—panel width must match worksurface depth
- 20"W H-leg

Three-Panel Run—120° Connection

Tip: Same rule applies if using 120° worksurfaces in place of straight worksurfaces.

Tackable Acoustical Panels—Three-Way 120° Connection

Three Panel 120° Connection with One Supported Component

Three Panel 120° Connection with 120° Worksurface and up to One Additional Component

Tip: Loads must be counterbalanced in this application.

Tip: Worksurface needs to be supported to floor or application needs to be counterbalanced.

Panels and Panel Stackers

Base panels can accept one, two, or three stackers, up to a total height of 78". Base panels can accept only one glass stacker. See below for additional rules and exceptions.

Universal or change-of-height connectors must be used at top of base panel and each stacker wherever possible to increase stability.

Panels and Panel Stackers, continued

All stackers are load bearing, but load cannot be mounted above 66" height.

Circuit Specifications

Detailed Information for the Electrical Engineer

Five wiring schematics

are available for TEKTIS—two 3-circuit systems and three 4-circuit systems.

All the components in an electrical distribution network

must use the same wiring schematic. The components (power poles, base power-ins, and receptacles) snap together and are keyed to make it impossible to connect mismatched parts. Color-coded and labeled components make it easy for installers to identify which wiring schematic each component is dedicated to.

Color coding

For power components manufactured before June 19, 2023:

- 3 circuits shared = Black
- 3 circuits separate = White
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Tan
- 4 circuit 2+2 = Grey

For power components manufactured on or after June 19, 2023:

- 3 circuits shared = Blue
- 3 circuits separate = Rust
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Black
- 4 circuit 2+2 = Brown

Overview

Three-circuit electrical components with shared neutrals

are standard with 5 wires to provide three circuits that share one oversized neutral and one ground.

Three-circuit with separate neutrals have 8 wires providing three circuits, each with its own separate neutral. The first two circuits share an isolated ground; the third uses the system ground.

Four-circuit 3+D are standard with 8 wires to provide four circuits. Three of these circuits share an oversized neutral and a system ground while the remaining circuit has its own neutral and isolated ground.

Four-circuit, 3I+1 again have 8 wires but with three circuits that share an oversized neutral and isolated ground. The fourth circuit has its own neutral and is attached to the system ground. This electrical system is like the standard 3+D, but the grounds are switched, providing three isolated circuits and one general purpose circuit as compared to one isolated circuit and three general purpose circuits.

Four-circuit 2+2 also have 8 wires but provide two circuits that share an oversized neutral and a system ground and an additional two circuits with a second oversized neutral and an isolated ground.

3 Circuit Shared Neutral, 5 Wires

3 Circuit Separate Neutral, 8 Wires

4 Circuit 3+D, 8 Wires

4 Circuit 3I+1, 8 Wires

4 Circuit 2+2, 8 Wires

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance: The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance: Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

Device	Wattage	Amperage	Voltage	Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	13.6	110	1
Microwave (low)	150	5.5	110	3
Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Special Requirements for Chicago

	Chicago Code	Specification:	Electrician will supply:
Panel Requirements	Panel must be hardwired in the field.	<ul style="list-style-type: none">• Order panels with factory-installed power base covers with receptacle knockouts where you intend to install receptacles. <i>Tip: Chicago code doesn't require a special base cover with different receptacle locations.</i>• Receptacles in Chicago are supplied by electrician. Contact orders@amqsolutions.com to order service parts for special connections. <i>Tip: Because receptacles in Chicago cannot be installed back-to-back, you may want to avoid powered panels that are 30"W or less. These panels only have one receptacle location on each side, so these panels can only accommodate one duplex-size receptacle.</i>• Order corner fillers for L-, T-, and X-configurations separately to conceal electrical conduits.	<ul style="list-style-type: none">• Connection to building power supply• Wires• Fittings• Duplex receptacle (Leviton 5325-Decora style)• Electrical components
Chicago code requires hardwiring of all electrical components.	Electrician hardwires all receptacle boxes and conduits into panel bases in the field. <i>Tip: Panel depth prohibits use of standard device boxes for back-to-back receptacles in Chicago.</i>		

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this table are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity.
Tip: Low top cap does not accept any cables.

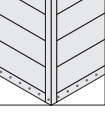

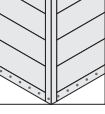

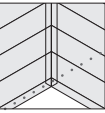

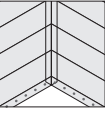

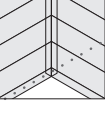

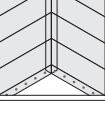

Cables Tested

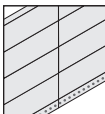

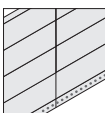

A CommScope Systemax Gigaspeed 1071E Series Category 6 Cable
 OD=0.23"

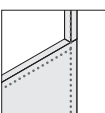

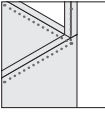

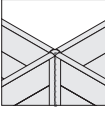

B CommScope Systemax X10D 1091B Series Category 6A Cable
 OD=0.285"

Powerways reduce cable capacity. An average of 10-15 cables will be reduced per powerway used. However, this number varies according to installation practices and the type of cables used.

When laying cables vertically behind skins, capacity is dependent on skin width.

		A	B
L, T, X, V, and Y Horizontal Routing			
	Lay-in cable routing (corner) at base of panel with power in L, T, or V configuration	9	5
	Lay-in cable routing (corner) at base of panel without power in L, T, or V configuration	32	21
	Lay-in cable routing (straight) at base of panel with power in X or Y configuration	9	5
	Lay-in cable routing (corner) at base of panel with power in X or Y configuration	9	5
	Lay-in cable routing (straight) at base of panel without power, or with powerway routed above in X or Y configuration	32	21
	Lay-in cable routing (corner) at base of panel without power, or with powerway routed above in X or Y configuration	32	21

		A	B
Straight Horizontal Routing			
	Lay-in cable routing at base of panel with power	8	5
	Lay-in cable routing at base of panel without power or with powerway routed above	32	21

		A	B
Straight Vertical Routing			
	Vertical cable routing inside power pole (used on an end, L or T configuration an end)	28 Hi	18 Hi
	Vertical cable routing inside power pole	28 Hi	18 Hi
	Through center of X	24	16

Tip: Low top cap does not accept any cables.

Powerways

Powerways that are installed in the panel base cavity allow power to be distributed wherever panels go. They are concealed when properly installed.

On June 19, 2023, TEKTIS power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.
▶ See *Power Components Transition Details* on page 216.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment. Chicago, New York City, and Los Angeles have special requirements.

Product Details

Straight connection is formed when a harness connector from one powerway attaches to the powerblock of the adjacent powerway.

L-connection is formed when a powerway connector harness turns to the left or right and connects to the powerblock of the adjacent panel.

T-connection is formed by two powerway connector harnesses each turning in the same direction.

X-connection is formed by three powerway connector harnesses, each turning in the same direction.

The powerway connector harness comes attached to each powerway and can be removed in the field.

Removing the powerway connector harness and adding it to the opposite end of the powerway powerblock can be used to correct planning and installation oversights.

Power can be routed through the base of panels in a two- and three-panel, 120° connection.

(inside measurement)
2" x 2" power and cable poles can bring building power and data from the ceiling to a 120° panel application at the end of a run or 90° connection only.

Application Topics

Factory included powerway for field installation replaces need to order separate powerways.

Wiring and Cabling

Chicago, New York City, and Los Angeles have special requirements.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult with a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Receptacle

Receptacles are ordered separately and installed in the field in the base cover knockout opening. Receptacles snap into the powerblock in the field. Receptacles are designed to link to a specific circuit.

On June 19, 2023, TEKTIS power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

► See *Power Components Transition Details* on page 216.

All receptacles are duplex (two outlets) and are available in 15-amp.

Product Details

Numbers printed on the receptacles indicate the line number. Label on receptacle indicates which circuit the receptacle connects to, so the user can control which devices are on specific circuits.

With the 3-circuit separate neutral system, these designations are with letters A, B, or C as compared to 1, 2, 3, or 4 in the other systems.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Available in 6000 Black plastic only.

Receptacles come in packages of six receptacles.

Receptacles snap into both faces of the powerblock in the field.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

2" x 2" Power and Cable Pole

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. They can also be used to run cables into the top cap or into the panel base cavity. All five wiring schematics are available.

Trim conceals powerway and cables routed to the base of the panel.

Knockout

The power pole harness attaches to either end of a powerway.

Hanger bar secures the top of the pole to the ceiling grid.

Ceiling trim plate

Cable poles provide a space to route cables from the ceiling to the high top cap or base cavity of a panel.

Knockouts allow data distribution in change-of-height conditions.

Retainer attaches to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later.

On June 19, 2023, TEKTIS power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.
 ▶ See *Power Components Transition Details* on page 216.

All the components in an electrical distribution network must use the same wiring schematics. Components are color coded and keyed to make it impossible to connect mismatched parts.

Product Details

Power and cable poles accommodate ceiling heights up to 10'4"H.

Height of the pole must correspond with the height of the panel it is attached to so that the pole will connect under the top cap. Adjacent panels can be lower. Ceiling heights up to 10'4" can be accommodated.

Power and cable pole packages ship with one left-hand and one right-hand corner change-of-height connector. A separate change-of-height package may be required in certain X configurations.

In T configurations, height of power and cable pole must correspond to the height of the center panel.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.

Base Power-In

Base power-ins are field installed and connect the panel electrical system to the building power source.

Power-ins are UL listed and CSA certified. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts. Building power source can come from the floor, wall, or column.

On June 19, 2023, TEKTIS power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023. ▶ See *Power Components Transition Details* on page 216.

Connector on end of base power infeed harness occupies one receptacle location in powerblock.

Flexible harness secures hardwired connection to building monument. The harness must be back fed through the base trim prior to connection into the building monument.

Cover is included with base power to conceal the connection.

Product Details

Power-in brings power to panel run by connecting to a designated receptacle location on either end of the powerway. Power-ins fit standard-size receptacle openings if the green end of the powerway is located behind the receptacle opening.

Paint color is required for base power-in for use in New York.

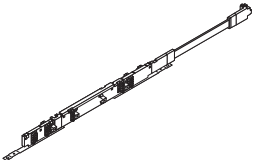

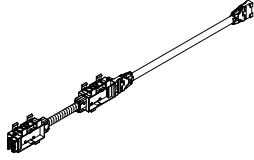

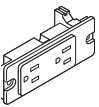

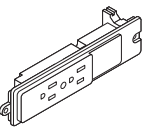

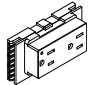

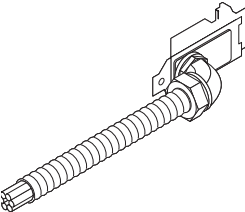

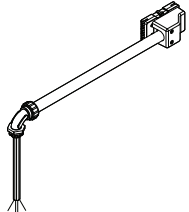

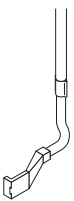

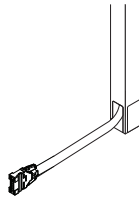

Power Components Transition Details

On June 19, 2023, TEKTIS power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

The style numbers of power component have changed. The panel style numbers have not changed. Any panel segment ordered with power after June 19, 2023 will include the new power component design.

How power is specified remains unchanged. Power can be optioned on to the panel segment. Powerways can be specified as installed in the factory or installed in the field.

Components included in the design change are powerways, receptacles, base power-ins, and the harness included in the power pole.

Planning with power components manufactured before and after June 19, 2023.

Power components manufactured before June 19, 2023 can still be used but do not connect to power components manufactured on or after June 19, 2023. The following two approaches can be used when both power systems are used:

Cluster with all power components manufactured before June 19, 2023.

Cluster with all power components manufactured on or after June 19, 2023.

Organize by cluster: Power systems can be organized by workstation cluster. Some clusters can use power components manufactured before June 19, 2023 and other clusters can utilize power components manufactured on or after June 19, 2023.

Utilize multiple infeeds in a single cluster: A single workstation cluster can use both power systems by utilizing multiple infeeds. Power components manufactured before June 19, 2023 can power part of the workstation and have its infeed and power components manufactured on or after June 19, 2023 can power part of the workstation and have its infeed. Each power system covers part of the workstation and the two systems do not connect to one another.

Receptacle location change

Receptacle location for base Trims manufactured before June 19, 2023

Receptacle locations for base trims manufactured after June 19, 2023

Status of power components manufactured before June 19, 2023

Powerways, panel connectors, receptacles, base power-ins and harnesses included in the power pole manufactured before June 19, 2023 are no longer supported.

Basecovers with receptacle cutouts for the receptacle locations of the pre-June 19, 2023 powerways are supported as service parts.

Receptacle knockout fillers for both the pre-June 19, 2023 and post-June 19, 2023 are available as a service part.

The pre-June 19, 2023 wire separator, which supports the powerway in the panel, is available as a service part.

How to convert a TEKTIS panel manufactured before June 19, 2023 with post June 19, 2023 power components.

1. Remove all pre-June 19, 2023 power components and the pre-June 19, 2023 wire separator.
2. Order from service parts a post June 19, 2023 wire separator, a post June 19, 2023 powerway and a post June 19, 2023 set of base covers of the appropriate width. Powerways, wire separators, and base covers are not available as style numbers.
3. Add post June 19, 2023 components to base area of the panel frame manufactured before June 19, 2023.

Worksurface-Height Grommet

Power can be accessed at or near worksurface height by using a grommet.

Grommet

Product Details

Grommets are available in packages of 10 to finish exposed edges of field-installed openings in the worksurface for vertical cable routing.

Grommets are available in black plastic only.

Worksurfaces

Worksurface has a wood core with laminate top and plastic edge band. Low-Pressure Laminates are available. Plastic edge band color is selectable.

Systems worksurfaces —with 1/2" cord drop feature built-in cable management flexibility, allowing cords to drop below the worksurface at any point along the back edge.

Systems worksurfaces —full depth feature a tighter fit to panels for a cleaner aesthetic.

Grommet is standard on corner worksurfaces only. Field-installed grommet requires a 3" diameter hole in the worksurface.

Front (user's) edge is a plastic edge band with a 3 mm radius. Back and side edges are flat.

Full-depth worksurfaces fit flush against panels.

Worksurface has a wood core with a Low-Pressure Laminate surface and is 13/16" thick.

Product Details

3 mm edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

Edge profile finishes are specified separately from laminate color.

Corner bracket is included to connect the back corner of worksurface to panels.

30"D straight cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Edge Profiles

Edge Profile is applied to front (user's) edge only.

Connections

Post leg

H-leg with bracket

Cantilever with tie plate

Universal Cantilever with tie plate

Side support brackets

Tie plates

In-line support plate

Reinforcing channel

End panels—standard height

Supports are ordered separately and installed in the field. The following supports are available for use with worksurfaces:

- Post leg
- H-leg
- Cantilever with tie plate
- Universal cantilever with tie plate
- Side support brackets
- Tie plates
- In-line support plate
- Reinforcing channel
- On-module end panel

Cantilever with tie plate works in left-hand, right-hand, or shared applications.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Specifying, page 254

Wiring & Cabling

Grommet is standard on corner worksurfaces.

Transaction

Worksurfaces are available in a wide variety of worksurface shapes. Directional laminate grain direction is shown.

Worksurface Legs and Supports

On-module supports can be used to panel support worksurfaces in various configurations.

End panel can be used to support the end of a worksurface at seated height.

Cantilever can be used to panel-support a worksurface at any height.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

Universal cantilever features alignment tab used to set a depth for straight worksurfaces with 1/2" cord drop. This tab is bent down when installing full-depth worksurfaces.

Post Leg

H-leg with bracket

Product Details

On-module worksurface supports engage the slots in the vertical uprights of panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces. It is standard with these corner worksurfaces.

Actual Dimensions

	Universal cantilever	Cantilever	End panel	Post leg	H-leg
Height	12 1/4"	13"	28 1/2"	28 1/2"	28 1/2"
Depth	15 1/2"	16"	23 3/4" or 29 3/4"	N.A.	14" or 22 3/4"
Glide Range	N.A.	N.A.	1 1/4"	2"	2 3/4"

Left

Shared

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30°D straight, cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.
▶ See page 198

End panels are available in seated height, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a worksurface in place of an end panel.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 371

Freestanding Guidelines

For TEKTIS Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations. Consult your local dealer or AMQ representative prior to deviating from these guidelines.

With post legs.

Combined worksurfaces can give each other support when joined with an 11"W H-leg and tie plate.

Corner workstation attached to adjacent worksurfaces requires 11"W H-leg. Tie plate is recommended to align worksurfaces. This application only good for 48"W corner worksurfaces. The 36"W and 42"W corner worksurfaces do not meet ADA requirements.

72" max. 72" max.

20"W H-leg can support adjacent worksurfaces up to 72"W.

120° workstation.

H-leg can be used to support adjacent perpendicular worksurfaces up to 72"W.

Reinforcing channel (AMQTSATRC) is available to add support to worksurfaces that have 60" or more of unsupported kneespace and that are heavily loaded.

Pedestals

Pedestals provide fixed storage for personal items and filing of infrequently referenced materials.

Top of pedestal is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on pedestals adjust to install furniture on uneven floors. Leveling glide range is 1".

Locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

Standard lock cylinders and keys are included with TEKTIS pedestals. If a master key is specified, **AMQLOCK9201XF** must be specified to be included.

Interlocks allow only one drawer to be opened at a time and can be required for safety and stability purposes.

Ledge pulls are available on drawers.

Product Details

Ledge pulls are available on drawers.

Pencil tray for use with fixed pedestals are included and available as an option.

To file legal-size or side-to-side letter-size filing in pedestal file drawers, rails are included with pedestals and available as an option.

Counterweight packages and interlocks may be required to ensure stability and must be ordered separately.

► Page 268

Actual Dimensions

Fixed Pedestals

Depth	21 ³ / ₁₆ " , 27 ¹³ / ₁₆ "
Width	15"
Height	27"

Connections

Fixed pedestals are intended for use under a panel-mounted worksurface. Attachment hardware is provided.

Tektis fixed pedestals cannot be converted to a freestanding pedestal using a pedestal conversion kit.

Pedestal filler, ordered separately, adds structure and fills the gap between the pedestal and panel. Pedestal filler works with panels only.
 ▶ Page 268

Additional supports are required if worksurface overhang is 7" or larger.

Stability

Counterweights are required for single desk applications, including when a Tektis fixed pedestal is paired with a worksurface and floor supports for a standalone desk application

Panel stability guidelines must be met prior to determining counterweight requirements. Refer to stability guidelines on page 206.

Counterweights are not required for fixed pedestals installed below a worksurface attached in a panel spine application. With the exception of single workstation applications which require a counterweight in each pedestal (**AMQTS2CW**).

Interlocks are required when using a Tektis fixed pedestal with a single pedestal desk, 48"W and below require an interlock. Single pedestal desks with 28"D pedestals also requires an interlock (**AMQTS2INT**).

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets of other cable-routing accessories.

Surface Materials

Pedestals

Case

Shipping

Fixed pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Bins

Bins can be attached to TEKTIS with integrated hooks. These storage bins provide overhead storage in the workspace.

On-module attachment hooks are integral to the end supports and are used to mount bins on panels of the same width as bins.

Safety catch locks overhead storage unit to frame to prevent accidental removal.

Bin is steel and ships assembled.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	24", 30", 36", 42", 48", 60", or 72"
Height	16 ¹ / ₄ "

Product Details

Lock in bin is concealed from view beneath the shelf. Field-installed locks are standard with random keying options. Master-keyed locks are also available. **AMQLOCK9201XF** must be specified separately. ▶ *Lock and Keying*, page 374

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module steel support hooks can be used above and adjacent to TEKTIS panels.

Width of overhead bin must match the width of the panel or panels that it is attached to. Bin may span up to two frames.

Bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Bins cannot be attached to upmount brackets.

Surface Materials

Overhead bin
• Paint

Lock
• 9201 Polished Chrome

Application Topics

Clearance between work surfaces and bottom of overhead bins is 21³/₈" when storage unit is installed in the highest position on a 66"H panel and glides are adjusted all the way into the panel.

On-module brackets and hooks are used to mount overhead bins and common shelves to panels with vertical slot patterns. Panels can support on-module attachment brackets.

Common shelves can attach on-module to panels.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Loads on the opposite sides of the panels increases stability.

On-module attachment brackets install in panel seams.

On-module brackets can be used with a panel stacker on panels. Follow standard panel stacker guidelines for each panel.

Stability Guidelines
▶ Page 198

Guidelines for Stackable Components

Bins and shelves can hang from the first stacked tier only.

Laminate Common Shelves

Laminate common shelf has a wood core and is covered with Low-Pressure Laminate. Plastic edge band is selectable.
Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (AMQTSATRC) can be used.

▶ page 252

Laminate common shelf

Product Details

Laminate common shelf ships with steel support brackets. Support brackets hook into the vertical panel slots or wall channel and lock into place with a safety catch. Support brackets can be used in either orientation.

Shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Wall Hang Channels and Horizontal Braces

For Use with Overhead Storage Bins and Shelves

Wall Hang Channels and
Horizontal Braces

Slotted steel channel can attach to wall of building to accept shelves, overhead storage bins, or worksurfaces. Channel will accept all universal bins and shelves, TEKTIS bins and shelves introduced prior to March 2007.

► Specifying, page 371
Tip: Must specify bin or shelf with TEKTIS bracket to hang on wall channel.

Product Details

Wall channel can be positioned on wall at height needed.

Connections

Wall channels can be used to support shelves, overhead storage bins, or worksurfaces. Wall channels can be shared.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}$ " thick Toggler R-type $\frac{3}{16}$ " wall anchors with countersunk flat head screw.
- Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

Anchors must be used in each screw hole location on the wall channel.

Components attach at 1" increments, but screws block some slot locations.

Component limits for each pair of wall channels

- Two bins or shelves
- One worksurface and two shelves
- One worksurface and one bin

Horizontal brace is available to reinforce vertical wall channels that support storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All worksurfaces require horizontal braces.

Wall channel horizontal brace is required for EACH storage bin or shelf that is wider than 48". The brace should be placed at the position along the vertical wall channel where the top of the bin or shelf will be placed.

Width of horizontal brace must match width of shelf or storage bin.

Wall channel horizontal brace is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Wall hang channels for shelves or overhead storage bins cannot be used with a wall start junction.

Worksurfaces may be attached to wall channels with cantilevers, subject to the following application guidelines:

- All worksurfaces must be 24"D or less.
- Worksurfaces must be supported by a cantilever or legs every 42" or 48". Cantilevers can be shared when worksurfaces are adjacent.
- Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
- Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Surface Materials

Wall channel

- Paint

Horizontal brace

- Paint

Screw hole positions

Actual Dimensions

Wall hang channels and horizontal braces

Depth 1 $\frac{1}{8}$ " (28 mm)

Width 1 $\frac{5}{16}$ " (24 mm)

Height 66" (1676 mm)

Application Topics

Reinforce wall by positioning studs where wall channels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Tip: Wall channels can be shared.

TEKTIS

Boundary Screens

Boundary screens have a thin profile and provide light scale space division and visual boundary.

TEKTIS boundary screens attach to the TEKTIS panel at end-of-run and middle-of-run junctions.
▶ Specifying, page 272

Screens are available in classic woodgrain or solid laminates.

Boundary screens come standard with adjustable glides, with a range of 1½". The glides are located 3" from the outside of each edge.

TEKTIS boundary screens have a thickness of 1⅜".

Product Details

End-of-Run Single Sided Screens

Boundary screens can connect to panels at the end-of run junction and middle-of-run junction.

Boundary screens cannot be used as a support in place of a leg, pedestal, or other worksurface support.

Screens are made of 1⅜" board with Low-Pressure Laminate.

Actual Dimensions

Height	28½", 42", 48", or 54"
Single-Sided Width*	26", 26½", 32", 32½", 38", 38½", 44", 44½", 50", 50½", 56", 56½", 62", 62½", 74", or 74½"
Spanning Width*	50", 53", 62", 65", 74", or 77"
Split Width per Side*	49", 49½", 55", 55½", 61", 61½", 73", or 73½"
Return Width*	25⅜" and 31⅜"
Thickness	1⅜"

* Dimensions above include extra inches of trim when connecting to a panel.

Tip: 28½"H boundary screens are available for end-of-run junctions for spanning and split boundary screens.

Boundary screens have modular heights and widths.

Note: TEKTIS panels are available in 66"H, but TEKTIS boundary screens are not available in 66"H.

Boundary screen heights align with thin trim top cap panel heights at 42", 48", and 54". 28½"H boundary screens are also available for end-of-run junctions for spanning and split boundary screens.

TEKTIS boundary screens are available in six different configurations.

1. Single-sided boundary screens provide boundary to one side of a TEKTIS panel and are specified either as left or right. Available in end-of-run and middle-of-run configurations.

2" Tektis panel thickness

Single-sided boundary screens will always include the 2" thickness of the TEKTIS panel to which they attach. For a 72" width screen (72"W inside, +2"W for the TEKTIS panel thickness for a maximum of 74"W). The above is shown with a right-handed screen application.

Tip: The above image shows a 72" specified width. The planning width is 74".

2. Spanning boundary screens use one screen segment to provide boundary of equal widths to both sides of a TEKTIS panel. Available in end-of-run and middle-of-run configurations.

Spanning boundary screens will always extend in equal dimension from the panel to which it attaches and include the 2" thickness on the TEKTIS panel.

For a 48"W spanning boundary screen (48"W inside, and 2" for the TEKTIS panel thickness for a total of 50"W minimum). For a 72"W spanning boundary screen (72"W inside, and 2" for the TEKTIS panel thickness for a total of 74"W maximum).

3. Split boundary screens use two screen segments to provide boundary to both sides of a TEKTIS panel. Both sides of a split boundary screen must be the same height. Available in end-of-run and middle-of-run configurations.

Split boundary screens can either be equal or asymmetrical in dimension from the TEKTIS panel to which they attach and include the 2" thickness of panel in total.

For a 36" width split (36"W inside, and 1" for half of a TEKTIS panel thickness for a total of 37"W minimum) for each side of the panel. For a 72" width split (72"W inside, and 1" for half of a TEKTIS panel thickness for a total of 73"W minimum) for each side of the panel. *Tip: The above image shows a 37" specified right width and a 73" specified left width. The planning right width is 36" and the planning left width is 72".*

4. Single-sided L return boundary screens provide boundary and additional privacy to one side of a TEKTIS panel. Both screen segments (primary and return screen) are the same height and are specified as either left or right-handed.

2" Tektis panel thickness

Single-sided L return boundary screens in modular widths have inside clearance in 6" increments to wrap standard width worksurfaces in 6" increments. Panel connected segments (the primary screens) are available in widths of 27" (24" inside, return width 27", and 2" for TEKTIS panel thickness) to 75" (72" inside, and 2" for TEKTIS panel thickness). The inside width of modular returns are 24" or 30". There is an additional 13/16" that will be added to the return width for the primary screen thickness. Both boundary screens have equal heights and are specified as either left or right handed.

Tip: The above image shows a 75" specified width. The planning width is 72".

5. Spanning L return boundary screens provide boundary and additional privacy to both sides of a TEKTIS panel. Both screen segments (primary and return screen) are the same height. Spanning L configuration screens and returns must have symmetrical widths.

6. Split L return boundary screens consist of four segments to provide boundary and additional side privacy to both sides of a TEKTIS panel. Split L configuration screens do not have to have symmetrical widths but must have the same height.

Split L return boundary screens in modular widths have inside clearance in 6" increments to wrap standard width worksurfaces from 24" to 72" in 6" increments for each side of the split. The inside width of modular returns will be 24" or 30". There is an additional ¹³/₁₆" that will be added to the return width for the primary boundary screen thickness. Each panel connected segment is available in widths from 25¹/₂" (24" inside, and 1¹/₂" for half of the TEKTIS panel thickness) to 73¹/₂" (72" inside, and 1¹/₂" for half of the TEKTIS panel thickness).

Tip: The above image shows a 61¹/₂" specified left width and a 73¹/₂" specified right width. The planning left width is 60" and the planning right width is 72".

Connections

Boundary screens cannot be taller than the TEKTIS panel they attach to.

End-of-run single-sided boundary screens must always attach either at the height of the base panel or the height of the base panel with stackers.

End-of-run spanning boundary screens and end-of-run split boundary screens can be shorter than the height of the base panel and base panel with stackers.

Boundary screens at the end-of-run junction may be shorter than connecting TEKTIS panel. In this situation, specify change-of-height trim separately (width the exception of single-sided.)

All middle-of-run boundary screens (single-sided, spanning, and split) must be attached to a base panel or base panel with stacker at the same height.

On spanning and split boundary screens, a metal plate is used to cover the bracket that connects the boundary screen to the panel. The cover is located 12¹/₈" from the bottom of the screen and is 3⁵/₈"W and 13¹/₂"H.

Middle-of-run boundary screens add an additional 1³/₁₆" to the overall panel run.

Return segments have a metal plate that covers the connection the return screen to the primary screen segment.

In spanning and split boundary screen junction, no worksurface supports (i.e., cantilever, pedestal, end panel) under 28"H can be used with the TEKTIS panel with the exception of side-support brackets.

In single-sided applications, all worksurface support brackets may be used on the panel channel cantilever, pedestal, end panel, etc.

Surface Materials

Boundary screens:

- Laminate

Edge on laminate:

- Plastic

Bracket cover:

- Paint

Tip: When specifying the paint finish for the bracket, select a finish that compliments the selected laminate finish.

Grain direction rules:

Boundary screens less than 60" wide can have vertical or horizontal grain direction. Boundary screens 60" wide or larger must be horizontal.

For a split with one side greater than 60"W, both sides of the split screen must have a horizontal grain direction.

All boundary screen sides will have the same finish applied.

Application Topics

Middle-of-run screens cannot attach on anything higher than a 54"H base panel.

TEKTIS boundary screens fulfill the same stability requirements as TEKTIS panels of the same heights and widths. TEKTIS boundary screens do not support hang-on components.

▶ See *Stability Guidelines, page 198*

Boundary screens can attach to panels with fabric stacker and glass stacker application.

Boundary screens are not for use with wall starts.

Boundary screens with returns cannot be used in a free-standing application. Boundary screens must be attached to a corresponding TEKTIS panel.

End-of-Run Single Sided Boundary Screen

End-of-Run Split Boundary Screen

Single-sided and split boundary screens are available left and right handed. This is determined by the user facing the attaching TEKTIS panel.

Tip: For split boundary screens with returns, returns do not have to mirror the opposite screen.

End-of-Run Split Boundary Screen

Split boundary screen widths in both end-of-run and middle-of-run configurations do not have to be symmetrical.

All L-return boundary screens have a step miter detail at the adjoining edge.

Hanging Markerboard

Hanging markerboard

can be added to TEKTIS panels and is a writable surface that provides visual display and invites collaboration.

► Specifying, page 280

Markerboards are non-magnetized.

On-module attachment hooks are used to mount markerboards on panel(s) of the same width.

Product Details

Clearance needed between worksurface and bottom of markerboard is 1 1/8".

Width of markerboard must match the width of the panel or panels that it is attached to. Markerboards may span up to two panels.

Hanging markerboard can attach to TEKTIS wall channel with a horizontal brace.

Four hooks must be attached on each corner of the markerboard.

Actual Dimensions

Height 24"

Width 24", 30", 36", 42", 48", and 60"

Thickness 1/2"

Tackable Acoustical Panels

Tip: Factory-included powerway for field installation option replaces need to order separate powerways.

Tip: Remember to order end-of-run trim and vertical corner trim packages.

Tip: Factory-installed wire separator is only an option on panels without power. A wire separator is included with the powerway in panels specified with power.

EMBANK Pedestals

Fixed and Mobile

Fixed pedestals are floor standing and can support worksurfaces at 27¹¹/₃₂"H.
 ▶ Specifying, page 359–339

Top is open on fixed pedestals and accommodates attachment to a work surface. Attachment hardware is included.

Drawer fronts are available in Low-Pressure Laminate and are full to the bottom of the case (no toe kick).

Finished back and sides are standard on pedestals.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Mobile pedestals can be moved wherever storage is needed. They provide an auxiliary worksurface when you need more space to spread out your work.
 ▶ Specifying, page 339

Top on mobile pedestal is 1¹/₈" thick and is available in Low-Pressure Laminate.

Pulls on pedestals are available in a ledge style only.

Lock is standard on pedestals. Lock is located in the bottom drawer, and locks the drawer it is located in and the one above. Locks are standard on lateral files and secure all drawers. Lock cylinders are field-installed.

Standard lock cylinders and keys are included with Embank pedestals. If a master key is optioned, **AMQLOCK9201XF** must be specified to be included. All lock cylinders are field-installed.

Leveling glides adjust to install pedestals on uneven floors and have a 1¹/₂" adjustable glide range.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Cushion top is ordered separately and requires field installation.

▶ Specifying, page 339
Tip: Two-High mobile pedestals with a cushion top will not fit under a desk.

Mobile pedestals have a clearance of 2.6" from the ground to the underside of the pedestal.

Four casters are hard composition and non-locking, with a full-rotation swivel.

Actual Dimensions

	Mobile Pedestals Box/File
Depth	18 ⁷ / ₈ " and 22"
Width	15 ³ / ₄ "
Height	23 ² / ₃ "

	Fixed Pedestals Box/Box/File and File/File
Depth	24" and 30"
Width	15 ³ / ₄ "
Height	27 ⁵ / ₁₆ "

	Mobile Pedestals Box/Box/File and File/File
Depth	22"
Width	15 ³ / ₄ "
Height	27 ³ / ₃₂ "

*Tip: 2-High mobile pedestals without a cushion fit under an Embank desk shell.
 Tip: 2-High mobile pedestals with a cushion top do not fit under an Embank desk shell.*

Product Details

Box drawers are black, bore and dowel construction.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

All pedestal file drawers accommodate front-to-back and side-to-side letter filing.

24"D and 30"D pedestal file drawers also accommodate side-to-side legal filing.

Pencil tray to hold small office supplies is standard with pedestals with box drawers.

27⁵/₁₆"H fixed pedestal can be used in combination with other Two-High lower storage to create a variety of storage options.

Ledge pull

Pulls are available in a ledge style only.

Lock cylinders are field-installed. Pedestals are shipped installed with plugs, with lock cylinders separate.

▶ Lock and Keying, page 374

Counterweight packages are included and required to ensure product stability.

Mobile pedestal cushion top is field installed with screws. See assembly instructions for details.

Connections

Fixed pedestals are intended to attach under a worksurface for security and support. Pedestals can be paired with EMBANK common top.

Fixed pedestals are not to be used alone as a free-standing unit, and must be used with other furniture.

Pedestals using common tops must be attached to other storage, a perpendicular worksurface, or a panel. A maximum 6" overhang of the worksurface is allowed on either side, or back.

Surface Materials

EMBANK storage can be specified with contrasting case, headset, top laminate finishes, and edgeband.

EMBANK One-High, 1.5-High, and Two-High Lower Storage and Lateral Files

One-High, 1.5-High, and Two-High EMBANK lower storage and lateral files are floor standing and can support worksurfaces at 15³/₈"H, 21³/₈"H, or 27⁵/₁₆"H.

Top are 1¹/₈" thick and come standard on Embank One-High Storage. They can be optioned on to 1.5-High and Two-High low storage and laterals. If no top is selected, low storage and laterals accommodate attachment to a worksurface or common top. Attachment hardware is included.

Drawer and door fronts are available in Low-Pressure Laminate are full to the bottom of the case (no toe kick).

Finished back and sides are standard on low storage and lateral files.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Adjustable shelf thickness is 3/4".

Pull on low storage with doors and laterals is available in a ledge style only.

Standard lock cylinders and keys are included with Embank low storage with doors and lateral files. Lock is located on the top left corner of the right handed door of lower storage with doors. Lock is located in the bottom drawer of lateral files, and locks the drawer it is located in and the one above. Locks secure all drawers. If a master key is optioned, **AMQLOCK9201XF** must be specified to be included. All lock cylinders are field-installed.

Leveling glides adjust to install low storage and laterals on uneven floors and have a 1/4" adjustable glide range.

* The top (if specified) matches the depth of units with drawers and doors.
 Tip: All heights are without top. Add 1¹/₈" to achieve overall height with top.

Product Details

Drawers are black, bore and dowel construction.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

36" W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

30" W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

Two-High lower storage has three holes for adjustable shelf placement, spaced 1 1/4" apart. When the adjustable shelf is in the bottom position, the top shelf has 12 1/4" of usable space, and the bottom shelf has 10 1/16" of usable space.

1.5-High lower storage has three holes for adjustable shelf placement, spaced 1 1/4" apart. When the adjustable shelf is in the bottom position, the top shelf has 6 5/16" of usable space, and the bottom shelf has 10 1/16" of usable space.

Pulls are available in a ledge style only.

Locks are field-installed. Low storage with doors and lateral files are shipped installed with plugs with the lock cylinders separate.

► Lock and Keying, page 374

Counterweight packages are included and required to ensure product stability.

One fixed shelf is included in 1.5-High and Two-High open and hinged door configurations.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Side-by-side units with individual tops will result in a nominal 3/32" gap.

Surface Materials

EMBANK storage can be specified with different case, headset, and top laminate finishes.

EMBANK Three-High and Four-High Lateral Files

Lateral files are ideal for high-density paper storage.

Product Details

File drawer body is standard with integral top rail to accommodate hanging folder files. Drawers are a black bore and dowel construction with a proud front.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Ledge pull

Pulls are available in a ledge style only.

Locks are field-installed. Lateral files are shipped installed with plugs, with lock cylinders separate.

36"W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing.

EMBANK Credenzas

Credenzas come in various depths, heights, and storage configurations.

Full storage credenzas are available in 24"D and a two-high height.

Top are available in a 1½" thicknesses.

Finished back is included on all full storage credenzas.

Credenzas with kneespace are available in 24"D, and single or double pedestal configurations.

Modesty panels are available on credenzas with kneespace in either full height or ¼-height.

Drawers are black bore and dowel construction.

Standard lock cylinders and keys are included with Embank credenzas with pedestals, laterals, or cabinets. Lock is located in either the bottom drawer, and locks the drawer it is located in and the one above, or the right-handed door. Lock cylinders are standard and are field-installed. If a master key is optioned, **AMQLOCK9201XF** must be specified to be included. All lock cylinders are field-installed.

► Lock and Keying, page 374

Pulls on credenzas with pedestals, laterals, or cabinets are available in a ledge style only.

Actual Dimensions

Full Storage Credenzas

	Open/Open	Open/ Lateral File	Lateral File/ Lateral File	Lateral File/ Cabinet	Cabinet/ Cabinet

Credenzas with Kneespace

	Single Pedestal	Double Pedestal
Depth	24"	24"
Width	66" and 72"	66" and 72"
Height	$28\frac{7}{16}$ "	$28\frac{7}{16}$ "

Tip: Credenzas with kneespace are standard with a $1\frac{1}{8}$ "-thick top, included in the overall height.

Product Details

Open/open credenzas are divided evenly with a single center support in all widths.

Open/lateral file credenzas in 60"W include 30"W file drawers. 66"W and 72"W open/lateral file credenzas include 36"W file drawers.

Lateral file/lateral file credenzas in 60"W include 30"W file drawers. 66"W lateral file/lateral file credenzas include 36"W (left) and 30"W (right) file drawers. 72"W lateral file/lateral file credenzas include 36"W file drawers.

Lateral file/cabinet credenzas in 60"W include 30"W file drawers. 66"W and 72"W lateral file/cabinet credenzas include 36"W file drawers.

Tip: "Handedness" option of lateral file/open or lateral file/cabinet credenzas determine the location of the lateral file.

Cabinet/cabinet credenzas are divided evenly with a double center support in 60"W, 66"W, and 72"W cases. All widths include four doors.

Credenzas with kneespace are available in 66"W and 72"W include either a left, right, or double pedestal configuration.

Pulls are available in a ledge style only.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

Modesty panels and back panels have horizontal grain direction.

End panels have vertical grain direction.

Locks cylinders are standard and are field-installed. ▶ Lock and Keying, page 374

EMBANK common top is used to create storage applications with a seamless top, or as a table or desk with legs.

EMBANK worksurfaces and tops use a 1¹/₈" core.

Product Details

Common tops are available in Low-Pressure Laminate.

Common tops are standard 1¹/₈" thick.

Common tops have 3 mm plastic edge banding on the front (user's) side. Sides and back have matching 1 mm edge.

Reinforcing channels must be used with tops larger than 54"W for 54"W or more of unsupported kneespace. Any common top used as a table with legs equal to or larger than 30"D x 72"W requires two reinforcing channels.

Support plates are available to connect two worksurfaces and allow one to support the other.

Tie plates are available to provide added strength and alignment between two worksurfaces.

EMBANK D-Shape and P-Shape Worksurfaces

EMBANK D- and P-shape worksurfaces offer unique support for meetings.

D-Shape

P-Shape

Left-hand unit

Product Details

D- and P-shape worksurfaces must be attached to a bridge, return, or adjoining worksurface to form a flush-height, L- or U-shaped configuration and to provide stability. Right-hand P-shape worksurfaces pair with left-hand returns. Left-hand P-shape worksurfaces pair with right-hand returns.

D- and P-shape worksurfaces include an end panel, and are available with and without modesty panels.

Modesty panels are available in either full height or 1/4-height. Full-height modesty panels go to the floor. The 1/4-height modesty panels suspend from worksurface, and are 13 3/4" high.

Column leg diameter is 6".

EMBANK Towers and Wardrobes

Towers and wardrobes

provide storage for a variety of work and personal items including: paper, binders, books, and coats.

Towers are available in a variety of box and file drawer configurations.

Locker space is 8" wide and standard with a coat hook on the hinge side of the door.

Locks are standard on door and drawers. Lock cylinders are standard and are field-installed.

▶ Lock and Keying, page 374

Finished back is standard.

Drawers open their full depth for total access to the contents.

Leveling glides adjust to install tower and wardrobe on uneven floors and have a 1¹/₄" adjustable range.

Product Details

Tower and wardrobe combines coat storage, box and file drawers, and shelves.

Door hinged on left

Door hinged on right

Door on wardrobe is full height and can be hinged on the left or right. Coat hook is always located on the same side as the door hinge.

Box drawers are a black, bore and dowel construction.

File drawer body is standard with integral top rail to accommodate hanging file folders.

Actual Dimensions

	Single Door with Drawers	Dual Door with Drawers	Side Access Tower with Drawers	Single Door Wardrobe

EMBANK Bookcases

Bookcases offer convenient storage for binders, books, and other objects.

Actual Dimensions		
	Bookcase	Stacking Bookcase
Depth	15"	15"
Width	30" and 36"	30" and 36"
Height	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", 54 ¹ / ₈ ", 66 ¹ / ₂ ", and 72 ¹¹ / ₁₆ "	25 ⁵ / ₈ ", 37 ³¹ / ₃₂ ", and 44 ³ / ₁₆ "

Product Details

Bookcases are available with adjustable shelves. Shelves can be repositioned without using tools.

The number of adjustable shelves per bookcase depends on case height:

- 41²⁵/₃₂"H—2 adjustable shelves
- 47³¹/₃₂"H—2 adjustable shelves
- 54¹/₈"H—3 adjustable shelves
- 66¹/₂"H—4 adjustable shelves
- 72¹¹/₁₆"H—4 adjustable shelves

25⁵/₈"H stacking bookcases include adjustable shelf. All other heights include two adjustable shelves.

Standard-size binders will fit in bookcases with adjustable shelves.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both. EMBANK bookcases 66¹/₂"H and larger must be placed against a wall, if not ganged back-to-back.

Stacking bookcases are designed to align with other EMBANK tall storage. 25⁵/₈"H stacking bookcases align with 54¹/₈"H tall storage. 37³/₁₆"H stacking bookcases align with 66¹/₂"H tall storage. 44³/₁₆"H stacking bookcases align with 72¹¹/₁₆"H tall storage.

When specifying stacking bookcases, selecting the correct worksurface thickness of the application ensures that the stacking bookcase aligns with other tall storage.

Stacking bookcases must be used with One-High, 1.5-High, or Two-High laterals or lower storage. Stacking bookcases cannot be freestanding.

Application Topics

Storage Capacities and Dimensions

▶ Page 328

66¹/₂"H and 72¹¹/₁₆"H freestanding bookcases need to be placed back-to-back or against the wall.

Stacking bookcases can be shorter than the supporting worksurface as long as a worksurface support or side panel of a storage unit is used under the worksurface within 6" of where the side of the stacking bookcase is loaded.

EMBANK Overheads and Organizers

EMBANK overheads and organizers provide storage above a worksurface and can be used in a variety of applications.

Sliding door overheads have a non-locking sliding door. Door is available in Low-Pressure Laminate, and optional markerboard surface.
Tip: Markerboard is slightly thicker than the standard laminate.

Hinged door overheads have two, three, or four locking doors depending on width. Doors are available in Low-Pressure Laminate.

Open overheads have two equal-spaced openings.

Stacking overheads have end panels that allow the storage to sit on top of a worksurface. Stacking overheads allow for easy installation, and do not require anchoring to a wall. Stacking overheads must be placed up against a wall or back to back with a similar height unit.

Stacking overheads include a 1½" reveal for cable management.

Finished top, back, and sides are standard on overheads and organizers.

Tackboards for use with stacking overhead applications will automatically deduct 2¼" from the overall width of tackboard and 1½" from the height of the tackboard to account for cable management clearance.

Personal overhead and organizer configurations provide access on one side of a unit. Cases have a fixed divider in the middle.

Standard lock cylinders and keys are included with Embank towers and wardrobes. If a master key is optioned, **AMQLOCK9201XF** must be specified to be included. All lock cylinders are field-installed.

Actual Dimensions

Standard Widths

	Overheads with Sliding or Hinged Doors	Overheads with Open Fronts	Organizer
Depth	16"	15"	15"
Width	36", 42", 48", 60", 66", and 72"	36", 42", 48", 60", 66", and 72"	36", 42", 48", 60", 66", and 72"
Height	15"	15"	8 ²⁷ / ₃₂ "

Product Details

Personal organizers are available. They provide storage on one side and have a center divider.

Stacking overheads attach to the top of a credenza, desk, desk shell, or Two-High freestanding laterals or low storage, using hardware included with the overhead unit. When placed on top of multiple lateral files or low storage, the storage units must be ganged together. Stacking overheads have a 1½" reveal for cable pass-through.

Stacking overheads cannot be used with lateral file/lateral file credenza configurations.

Stacking overheads cannot be used with P- or D-shape freestanding worksurfaces.

Wall mount overheads have a 1" gap between the back panel and end panel.

Locks are standard on overheads with hinged doors. Lock cylinders are standard and are field-installed.
▶ Lock and Keying, page 374

Stacking overheads are designed to align with other EMBANK tall storage heights. 38"H stacking overheads align with 66"H tall storage. 44"H stacking overheads align with 72"H tall storage. Selecting the correct worksurface thickness of the application ensures that the stacking overhead aligns with other tall storage.

Overheads and organizers have varying counts of doors or openings based on door type and width.

- Overheads with no doors less than 72"W have two openings.
- Organizers less than 72"W have two openings.
- Overheads with hinged doors less than 42"W have two doors.
- Overheads with hinged doors 42"–65¹⁵/₁₆"W have three doors.
- Overheads with hinged doors 66"W or wider have four doors.
- Overheads with sliding doors always have one door that slides between two openings, any width.

Hinged door—
1 vertical interior divider

No door,
greater than 72"W—
3 interior dividers

Overheads and organizers have varying counts of vertical interior dividers based on door-type and width. Overheads with hinged doors have one vertical interior divider. Overheads with no doors and less than 72"W have one vertical interior divider.

Application Topics

Hanging components cannot hang in front of a double-pane window.

Bracket options
▶ See below

Stacking overheads can be shorter than the supporting worksurface as long as a worksurface support or side panel of a storage unit is used under the worksurface within 6" of where the side of the stacking bookcase is loaded.

Side-by-side wall mounted overheads will have a slight gap in between units due to construction.

Connections

Horizontal wall attachment brackets are available to attach overhead storage to the wall of building.

Overheads and organizers have two attachment methods; a wall mount and suspension between towers.
▶ See below

Overhead cabinets can attach so they align with tower, vertical cabinet, and panel heights.

Wiring and Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Bracket Options

Wall Mount

Personal Overhead/ Organizer

Select wall mount option. Brackets included.

Suspended between EMBANK Towers

Select suspended between towers option. Order cabinet-to-cabinet attachment kit (**AMQAWAK**) separately.

EMBANK Tackboard

Tackboard finishes the space between an overhead unit and a worksurface. It is a fabric-covered tackable surface.

Product Details

Tackboards provide a fabric covered tackable surface above the worksurface.

The ends of wall-mounted tackboards are finished.

Tackboards for use with stacking overhead applications will automatically deduct 2¼" from the overall width of the tackboard. Specify the width of the overhead it is being used with.

Stacking overheads include a 1½" space at the bottom of the end panel for cable management. When specifying a tackboard with a stacking overhead, remove 1½" from the overall height to account for this clearance.

- 37.9875"H stacking overheads should use a 21.4375"H tackboard for cable management.
- 44.17475"H stacking overhead would use a 27.6875"H tackboard or cable management.

Connections

Tackboards attach with hook and loop fasteners. The attachment hardware is standard with the tackboard for field installation.

Actual Dimensions

Width	36", 42", 48", 60", 66", and 72"
Height	20¼" and 26¼"
Thickness	1"

Tip: Thickness includes a core tackboard, spacer, and attachment hardware.

EMBANK social tables with X-style bases are ideal for quick meetings with a relaxed posture.

Product Details

Table tops have a wood core with a Low-Pressure Laminate surface.

Table tops are available in 1 1/8" core thickness.

Table tops features a 3 mm square edge profile.

EMBANK table tops are available in round or square shapes.

Steel X- bases are available in 26"W and 36"W.

Tip: When specifying a conference table, base size is predetermined by the selections made, and cannot be changed.

EMBANK Rectangular Conference Tables

Product Details

Table tops have a wood core with a Low-Pressure Laminate surface.

Table tops are available in 1 1/8" core thickness.

Table tops features a 3 mm square edge profile.

Two-piece tops will occur when the top is in Low-Pressure Laminate and is greater than or equal to 96"W. Tops will be split into two equal sections and ship with connecting hardware.

Two-piece tops will not have matching grain patterns.

Rectangular table base is available in Low-Pressure Laminate, and accommodates routing of power and data cords. Access is provided by a hinged door.

Surface Materials

- Black plastic

Power, Wiring & Cabling

Grommet option allows for either no grommet or hinged door power unit.

Hinged door power unit

has two power outlets and openings for two data ports. The bottom of the units is open to allow pass-through of power and data cables to the floor. Available as an option on conference table tops. The door has a 6' power cord.

Rectangular table base

accommodates routing of power and data cords. Access is provided by a hinged door.

EMBANK Collaborative Table & Cafe Height Table

Embank collaborative and café height tables

come in two heights and two shapes.

► Specifying, pages 365–366

Table tops are 1 1/8" thick with edge band color default to match laminate.

Casters are available as an option on working-height post legs. Come in a package of four (two locking and two non-locking).

Square table tops come with all four edges crowned.

Café-height tables (42"H) are supported with column bases.

► Specifying, page 365

Power can be added to the collaborative and café height table, ordered as a separate style number.

► See page 368

Collaborative tables (28 1/2"H) come standard with post legs on glides and are 1 1/2" in diameter with 1" of leveling. Casters and column bases are available as an option on this table.

Actual Dimensions

	Collaborative	Café-Height
Square	●	●
Round	●	●

Product Details

Embank tables come in two heights and two shapes:

- Collaborative, 28½"H. Shapes—Square, round,
- Café or standing height, 42"H. Shapes—Square and round.

Table tops are 1½" thick with edge band color default to match laminate.

Bases vary in size depending on the size of the table top.

▶ See page 322

Square tops come with all four edges crowned.

Power Specifications

Single power unit comes standard with plastic clips and two Velcro straps for cord management.

Single power unit

- Two power or one power/one dual USB-A
- 10 or 15 foot cord length

Determining power cord length depends on the size of the table top and distance to power source.

Column Matrix

Column and base sizes are determined by the size of the table top.

Directional Laminate and Edge Profile Detail

The appearance of laminate may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

* 36"W–61½"W overhead back panels have vertical grain direction. 63"W–75"W overhead back panels have horizontal grain direction.

* Towers, wardrobes, bookcases, returns, return shells, and bridges back/modesty panels have vertical grain direction.

* Desks, desk shells, and credenzas 60"W or greater have horizontal grain on back/modesty panels.

Right-hand unit

Tip: Width and depth is specified for the D-shape top.

Tip: D-shape and P-shape worksurfaces with column leg are not freestanding units. They must be attached to a bridge, return, or adjoining worksurface to form a flush-height, L-, or U-shaped configuration for proper stability.

Tip: Width A, depth B, and depth C is specified for the P-shape top.

Tip: Right-hand P-shape worksurfaces pair with left-hand returns. Left-hand P-shape worksurfaces pair with right-hand returns.

Tackboard

Tip: Remove 1½" in height from the tackboard if paired with a stacking overhead to utilize cable passthrough.

Tip: Tackboard comes with a spacer for a shelf light cord to be routed to the cable passthrough at the bottom of the overhead storage cabinet.

Tip: Tackboards cannot be attached to walls covered by textured paint or wallpaper.

Tip: Width denotes the width of the overhead the tackboard is pairing with. The application option will account for any dimensional changes needed. By selecting stacking, 2¼" will be removed from the overall width of the tackboard. By selecting wall mount, tackboard will ship with the exact specified width.

Standard Includes	Required to Specify

Lock and Keying

374

Lock and Keying

For TEKTIS, UPTAKE, and EMBANK Products

All locking products are standard with field-installed, keyed-random locks. Locks will ship with lock plug installed. Lock cylinder will be packaged separately and field-installed.

*Tip: If the master key plug is optioned, **AMQLOCK9201XF** must be specified separately to be included.*

Locks consist of a field-installed lock cylinder and a field-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Field-Installed Keying

Field-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR999 (Master keying numbers: XF1001 to XF3000). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number.

Key Random

-  FR305
 -  FR421
 -  FR305
 - or
 -  XF1011
 -  XF1042
 -  XF1011
- } XF
} Master Key

Required to Specify

Master key random	No cost	Specify with master key random.
--------------------------	---------	---------------------------------

*Tip: If the master key plug is optioned, **AMQLOCK9201XF** must be specified separately to be included.*

Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

*Tip: If the master key plug is optioned, **AMQLOCK9201XF** must be specified separately to be included.*

Standard Includes	Required to Specify
<ul style="list-style-type: none"> 9201 Polished Chrome lock cylinder, standard key random Two keys 	<ul style="list-style-type: none"> 1 Style number 2 Options, if selected (see below)

UPTAKE Lockers

UPTAKE lockers provide a space to store a variety of objects including coats, bags, and personal belongings.
 ▶ Specifying, page 390

Coat hooks or coat rod can be specified.

Leveling glides adjust to install on uneven floors and have a 1" adjustable range.

Finished back is standard.

Single-Wide Locker

Ledge pulls come standard when keyed locks are specified.

Adjustable shelf is available as an option to aid in the division of storage space when needed.

Double-Wide Locker

Digilock VERSA electronic keypad locks are available as an option.

Product Details

Four different door configurations are available.

Single- or double-wide lockers are available.

Door on locker can be hinged on the left or right. Pull and lock are located on the opposite side of the hinge.

Headset available in full front only.

Actual Dimensions

Depth		18 ⁷ / ₈ " or 24"
Width	Single wide	12", 15", or 18"
	Double wide	24", 30", or 36"
Height		41.75", 47.9375", 54.125", 66.5", or 72"

The inset top construction provides consistent door gaps and a tighter fit of adjacent units when ganged together.

A pair of coat hooks are standard in each opening for 1-door and 2-door units. Coat hooks are available as an option in 3-door and 4-door units.

Coat rod is available as an option on 1-door and 2-door units that are 24"D only.

Ledge pull

Ledge pulls on lockers are defaulted when standard or master key plug is specified. No pull is available when electronic locks are specified.

If the ledge pull is specified, locks are available factory-installed and are keyed random only. Master-keyed locks are also available. ▶ *Lock and Keying*, page 374

Digilock Versa

Digilock Versa electronic keypad locks, mounted in a vertical orientation, are available as an option.

Digilock Versa electronic keypad locks are powered by two lithium 2450 batteries.

Programming and manager keys must be ordered separately.

Application Topics

Adjustable shelves can be added to lockers for additional storage or piling space. Shelves are recessed from the side of the locker. A maximum of two adjustable shelves can be added. See interior configuration rules for restrictions. Mounting holes are located 1¼" apart starting 12" from bottom going to 12" from top. ▶ *See Interior Configuration Rules* for restrictions, page 382.

Shelf pin holes are always included even if adjustable shelves are not specified as an option on the locker. This allows for long term flexibility and the addition of adjustable shelves after the initial order (adjustable shelf style numbers **EMLKSHFS** and **EMLKSHFD**).

1-door lockers 54"H and above have a fixed shelf located at the top. *Tip: See interior configuration rules for size restrictions for coat hooks, coat rods, and adjustable shelves.* ▶ Page 382.

Individual single- or double-wide lockers cannot stand alone. They must be ganged to other lockers or secured to the building structure. Minimum locker numbers depend on depth and width. ▶ *See Stability Guidelines* on page 385.

Ganging hardware, provided, joins adjacent storage units side-by-side, back-to-back, or both.

Single Column

Double Column

Single Run of Lockers

Individual single- or double-wide lockers cannot stand alone. If not secured to the building structure, the minimum locker numbers that need to be ganged depend on depth, height, and width, and are shown in the table below.

If locker widths vary in the application, rules for the narrowest width applies. A double-wide locker counts as two lockers.

Locker Depth (inches)	Locker Height (inches)	Locker Width (inches)	Minimum Locker Number
18 ≤ D ≤ 24	≤ 70	any	3
	> 70	≥ 15	4
		< 15	6

Back-to-Back Lockers

Individual lockers cannot stand alone. If not secured to the building structure, the minimum locker numbers that need to be ganged depend on width and are shown in the table below.

If locker depths are different on both sides, then the rules for the shallower depth applies. A double-wide locker counts as two lockers. These guidelines apply to all locker heights (41.75"–72").

Depth	Locker Width	Minimum Locker Number side-to-side
Any	≥ 12"	2
	> 12"	3

Electronic Lock Option

Keypad has visual and audible indicators.

Product Details

Digilock Versa electronic keypad locks are surface mounted on the door.

Digilock Versa electronic keypad locks come set to a shared use mode. The user locks with their credential and unlocks with the same credential. Once unlocked, the lock is reset for another user.

Digilock Versa electronic keypad locks are powered by two lithium 2450 batteries.

The programming key and manager key, ordered separately, are required if the electronic lock option is selected.
▶ Specifying, page 398

Surface Materials

Lock body
• 9211 Nickel

- **Digilock Versa electronic keypad locks** enable facility managers to modify lock programming with a unique programming key and override locks using manager keys.
- Programming and manager keys are required if keyless lock option is selected.
- ▶ Specifying, page 432

The programming key is used during installation to pair the manager key to the lock.

The manager key is used to override the lock when a credential is lost or forgotten or the battery loses power. Additional manager keys can be paired at any time. One manager keys may be paired to infinite locks; however, each lock may only pair with up to six manager keys.

How to Program

1. Insert the programming key. A two-toned beep will be heard and the LED light will start to flash.
 2. While the LED light is flashing, insert one manager key at a time. A beep will be heard for each manager key that is programmed.
 3. Insert the programming key. A two-toned beep will be heard and the LED light will stop flashing.
 4. Repeat previous steps for each lock.
- Tip: The locks will arrive in the factory setting. During the process of pairing the manager key(s), the locks will be programmed into the shared setting.*

Greenpoint Private Office

Greenpoint private office offers a contemporary take on the private office with its distinct visual language and fresh material options.

Private desk worksur-
faces are 1 $\frac{1}{8}$ " thick. They
are specified with High-
Pressure Laminate. Height
of the private desk is 29 $\frac{1}{2}$ ".

Desk returns are avail-
able for private desks and
can be specified with a leg
support.

A modesty panel is avail-
able and ordered separately.
They can be specified in
High-Pressure Laminate.
Modesty panel can be
mounted flush or inset.

Leveling glides provide
1 $\frac{1}{2}$ " adjustment.

Product Details

Private desks are available in a range of sizes and come standard with two legs. Desk returns and modesty panels are also available.

Legs are welded metal.

Glides are adjustable and provide 1 1/2" adjustment.

Desk returns are used with private desks to form L-shape configurations, where everything is in reach.

Modesty panels cannot be used on the return side of this configuration.

Modesty panel can be mounted flush or inset. Height can be adjusted to provide cord pass-through.

Brighton Lounge Seating

Inspired by the traditional wood frame joinery of mid-century design, Brighton lounge seating offers an updated take with sleek metal construction. It's configurability allows Brighton to arrange into infinite formations, while freestanding lounge and table options create even more choice.

Ganging tables are available in laminate. Tables come with ganging brackets to attach between or on the end of lounge units.

Frame caps are offered in black paint.

Lounge seat and backs are fully upholstered.

Arms are available on lounge units. Arm caps are black oak.

Frames are offered in black paint.

Frame feet are black paint.

Freestanding tables are available in laminate. Frames are offered in black paint.

Product Details

Frame feet are offered in black paint.

Frame caps are offered in black paint.

Armcaps are solid oak wood and are available on both one- and two-seat lounges in black oak.

Button tufting is standard on all lounges that are upholstered in fabric. One-seat lounges come standard with one button, two-seat lounges come with three buttons.

Arm Right

Arm Left

One- and two-seat lounges are available with and without arms and can be specified with ganging hardware or as freestanding.

Lounges must be specified with ganging hardware when used with end or ganging tables. Ganging hardware and arms cannot be specified on the same side of a lounge unit.

Ottoman is upholstered with a metal frame that is available in black paint.

Ganging tables are available in two options: 90° and straight. Tables can be attached facing either direction and must be attached between lounge units.

End table is available in one size 28" square and can be added to either side of a lounge unit.

Freestanding tables are available in 28" square and 28"D x 42"W rectangle.

Power module has a 9' cord, two AC outlets, and one USB A+C 20W.

Mesa Lounge Seating

Mesa lounge seating adds style to any workspace with its modern form and tapered legs. Modular pieces can easily create common areas of any size.

Connector brackets are standard with all lounges and ottomans.

Lounge units can be connected together to create an L- or U-configuration. Two corners can be used together for a two-seat sofa.

Lounge units are available in two-seat lounge, right- and left-hand chaise lounge, and corner lounge.

Upholstered seat and back cushions are attached.

Frame is a unibody construction with finger jointed plywood.

Tapered legs are cast aluminum and coated in WE01 Antique Bronze.

Ottoman is freestanding.

Product Details

Chaise lounge can be specified in a right- or left-hand configuration.
Tip: Handedness is determined while in the seated position.

Integrated ganging device is included and keeps units aligned.

Lounge seating features five fully upholstered, complementary models: two-seater lounge, right-hand chaise lounge, left-hand chaise lounge, corner lounge, and ottoman. All models feature a four-leg, cast aluminum base with a powder coat painted finish.

Sterling Seating

Sterling is a family of seating inspired by classic mid-century design. The style and generous sit brings retro-inspired comfort to the office. Hardwood legs or a classic aluminum base and arm options make the Sterling collection relevant across the floor plan.

Arms are optional on guest chair and conference chair. Arms are always upholstered.

Optional tilt mechanism enhances user comfort. Available on the five-star base.

Seat height adjusts 5", from 16¹/₂"H to 21¹/₂"H, with a pneumatic adjustment mechanism.

Casters have hard, dual-wheels that roll smoothly on carpets.

Five-star base is aluminum and available polished or in black paint.

Pneumatic cylinder is always black.

Wood leg is beech hardwood and available in VP03 Black Oak.

Sterling stools have a 360° swivel feature that comes standard and does not have auto-return feature.

Glides are polyethylene for superior durability on carpeted and hard floors.

Sterling stools include footrest for added comfort. *Tip: The footrest is 8¹/₂" from the ground on the counter-height stool and 14¹/₄" on the bar-height stool.*

Product Details

Five-star, and four-leg chairs are available with and without arms.

Optional tilt mechanism is available on five-star chairs and has 10° rearward and 2° forward tilt range. The seat and back always remain in a fixed position relative to each other (i.e. no recline).

360° adjustable height swivel mechanism is standard on five-star base.

Adjustment Features**Seat Adjustments**

Seat height adjusts pneumatically. To lower, pull lever up while seated. To raise, pull lever up and keep your weight off the chair.

Lucas Seating

Modern lines give Lucas a streamlined look, while a wide seat and reclined pitch make it a comfortable spot to sit during long meetings and busy days.

Lucas comes standard with arms at a height of 20½”.

The wire base comes standard in West Elm WE05 Burnished Bronze with black glides.

Seat height on wire base chair is fixed at 18½”.

Swivel base comes standard in 8046 Polished Aluminum. Swivel is a full 360° without an automatic return.

Product Details

Cushion is detachable.

All product in the Lucas product line ships fully assembled.

Surface Materials

Swivel base is 8046 Polished Aluminum.

Wire base is WE05 West Elm Burnished Bronze.

Slope Seating

Simple yet timeless design allows the Slope family of seating to blend seamlessly into the modern office. A wide range of paint colors and upholstery options ranging from muted to playful add personality.

Seat and back are always fully upholstered.

Stackable base configuration allows for easier storage and cleaning. Stacking chairs can be stacked up to five high.

Wire frame base is painted.

Glides are polyethylene for superior durability on carpeted and hard floors. Glides are available in black.

Seat height adjusts 4", from 17½"H to 20½"H, with a pneumatic adjustment mechanism.

Five-star base is available in hot rolled steel finish or black paint.

Product Details

Guest chair

Stacking chair

Lounge chair

Bar-height stool

Conference chair

Five-star and wire-frame bases are available for guest chair and stool.

360° adjustable height swivel mechanism is standard on five-star base models.

Slope ships knocked down and the seat must be assembled to the frame on site, with the exception of the stacker with arms and the guest chair with arms which ship fully assembled. All slope styles come in a single carton.

Arms are available as an option for guest, stacking, and conference chair.

Slope stacking chairs can be stacked up to five chairs high.

Width	54 inches
Abrasion	200,000 double rubs
Environmental Characteristics	Bleach Cleanable
Flammability	California Technical Bulletin #133

Fabric Elements Collection Grade 1

FI-X FL-X fabric back colors indicated with white dot

Fabric Specifications	
Content	98% Recycled Polyester, 2% Spandex
Weight	(per sq. m) 326g
Thickness	1.1mm
Width	58"
Flammability	California Bulletin 117. Section E CS 191-53 Class 1

Fabric Milan Collection Grade 2

FI-X FL-X fabric back colors indicated with white dot

Fabric Specifications	
Content	100% Polyester
Weight	(per sq. m) 243g
Width	58"
Flammability	California Bulletin 117. Section E

Vinyl Grade 4

FI-X

Note Please view material swatches before specifying. Printed colors may vary from actual fabric. View material specs and cleaning instructions on our web site at www.amqsolutions.com
