Features & Advantages

Veneer

DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

Veneer tops

Richmond Park veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8" thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 2mm external solid hardwood band or profile edge.

High pressure laminate (HPL) tops

Richmond Park High Pressure Laminate (HPL) tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8" thick on MDF core comprised of 100% recycled and recovered wood fibers. All HPL tops are available with a profile edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal

Chassis components are 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestals and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws, and glue. All units are standard with 1" adjustable

glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tearout.

Overhead cabinet construction

Freestanding & wall mount

Freestanding Overhead storage cabinets are constructed of 1" and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel "z" bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel "z" bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Bookcase construction

All chassis (sides, back, top, and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy-duty shelves are 1" thick lumber core balanced 5 ply construction.

Tackboards

Wall mount tackboards are constructed of 0.75" thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of 0.75" thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel "z" bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel "z" bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Features & Advantages

Adjustable glides

Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers

All drawers are constructed with mitre joint/dowel construction in a natural maple finish with four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of 1/2" thick wood grained wrapped 5 sided miter-folded construction with 1/4" thick hardboard bottoms reinforced for heavy weight capacity. Drawers have been tested and pass BIFMA 50,000 cycle test. All drawers are guaranteed lifetime with free replacement warranty.

Drawer fronts

Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2, 4, and 6 doors. All tower fronts matched in vertical sets.

Optional wood drawers

Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee. Specify option P33.

Suspensions

All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion with soft close operation and are rated at 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and is rated at 150lbs. Lateral files include anti-tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

Hinges

Units with doors include 95 degree swing hinges.

Filing

Richmond Park features a highly durable black plastic extrusion that is securely fastened into a route on top of the drawer to support hanging files. An adjustable crossbar is provided for all file drawers that enables legal/letter filing front to back or side-to-side based on the drawer size.

Locks

Locks are standard on all drawers below the worksurface. Random lock cores are installed at the factory. Some units may be shipped with the same key number. Locks are Silver, Black or Bronze and match pull finish unless otherwise specified.

DARRAN will also send lock cores separately to the dealer at your request. These units will be sent with an empty lock core and the Dealer will receive a shipment of the requested lock core/keys.

Keying

Keying is available either factory or field installed. Factory installed keying is random.

Wire management

Wire management capabilities include standard and optional worksurface grommets. Specify W-1 under surface wire channels for organization and management of all communication wires and cords. Horizontal J-Channel wire management (Sku: W-1) is sold separately to conceal wire under worksurfaces.

Grommets

Metal grommets are provided to match the drawer pull selection. Grommet is available in black, silver, white or antique brass. Must specify standard or non-standard location. Black plastic grommets are available as an option for vertical applications.

Features & Advantages

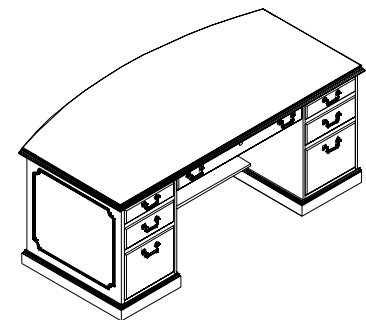

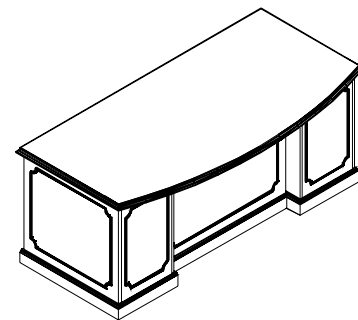

Power ports

A large selection of power pods are available and handle power, data, docking stations and communication. See options section for selection.

LED tasklights

LED task lighting provides high efficiency, low energy lighting with a long life. Surface mounted light is encased in silver aluminum channel with milk lense. Lights are field installed. Product specifications listed below:

- Diffuser creates a softer light and eliminates hot spots
- Touch dimmer switch
- Multiple lights can be operated from a single switch, if needed
- 2.0 watts per foot
- 48 LEDs per foot
- Certification: UL Listed
- 50,000 hour life span
- Color Temp is 4000K

Finish & Powdercoating Information

Veneer provides the warmth, richness, and authenticity of real wood, making it a premium choice for high-end furniture and architectural interiors. Because it is made from thin slices of actual wood, it can be stained, finished, or even lightly refinished over time, offering design flexibility while using less solid wood overall.

WellTech finish delivers a superior furniture coating with exceptional performance that can withstand stringent cleaning agents and possesses unparalleled durability, allowing DARRAN to provide lasting sustainable products to our customers.

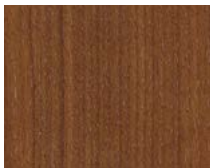

HPL (High-Pressure Laminate) is known for its exceptional durability, making it ideal for heavy-use environments such as countertops, desks, and work surfaces. It offers strong resistance to scratches, impact, heat, and chemicals, and comes in an extensive range of designs and textures—including wood looks, solids, and specialty patterns. The manufacturing process ensures consistent, predictable results, giving designers reliability along with performance.

Ganging | Height reference

Ganging – Flush Cut Modification

30"H Casegood Worksurface & Base Ganging Modifications

To gang two casegood units, each unit end to be ganged must be flush cut modified for gapless surfaces and cabinet chassis.

Order Option:

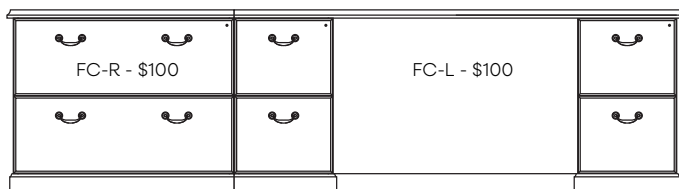

- FC-B: Flush Unit Both Sides (Facing) for Ganging - \$100
- FC-L: Flush Unit Left (Facing) for Ganging - \$100
- FC-R: Flush Unit Right (Facing) for Ganging - \$100

Flush cut modification per unit includes all modifications to gang to one end or both ends when units are ganged. Modification includes tops, base, and molding. Modification reduces width size approximately 1" per end. Overhead consoles and towers are offered freestanding and ganging – inclusive of flush cut modifications.

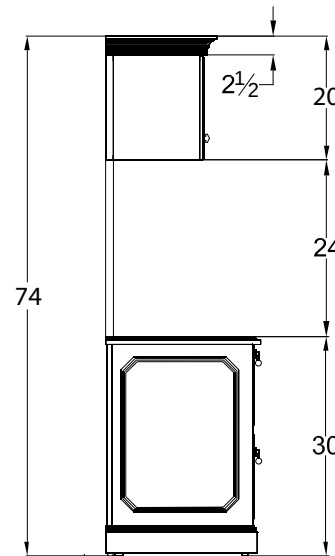

Example:

RPC3121100W Two Drawer Lateral File (Left) Flush Cut Right – FC-R...\$100

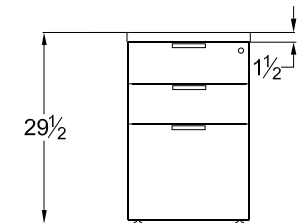

RPC7221054 Kneespace Credenza (Right) Flush Cut Left – FC-L...\$100

Wall Hung Overheads | Panel Doors

Product features

- 2.5" Cornice top
- Door fronts w/ profile edges
- Interior cabinet depth 12"
- Mounting wall rail included
- Top profile shaped 3 sides

Notes

- The DARRAN wall mounted cabinet(or shelf) must be hung on a weight-bearing wall. The suitability of the wall supporting the wall mounted cabinet, and the installation and maintenance of the wall-mounted cabinet, is the sole responsibility of the customer. Failure to correctly install and/or exceed the loaded weight capacity of this product may cause it to fall, resulting in damage to the product, adjacent property and/or bodily injury.
