USG Gypsum Solutions

# USG LEVELROCK™ BRAND NO-GO™

## HYDRATION INHIBITOR

**Superior set-time retardation liquid**

- Effectively slows setting time/lengthens working time of floor underlayments
- For use with USG Levelrock® Brand Floor Underlayments
- Applied by USG Levelrock authorized applicators

### DESCRIPTION

USG Levelrock™ Brand No-Go™ Hydration Inhibitor is an extremely effective set-time retardation liquid sold exclusively to USG Levelrock authorized applicators as a means to slow down the set time or to lengthen the working time of all USG Levelrock® Floor Underlayments and certain USG Durock™ Brand Self-Leveling Underlayments. USG Levelrock No-Go Hydration Inhibitor is a very powerful retarder and should be used only after consulting with your USG Sales Representative.

USG Levelrock No-Go hydration inhibitor is also recommended for use during the initial and final rinsing of hoses. Hoses conditioned with USG Levelrock No-Go Hydration Inhibitor perform better with little or no build-up of hydrated gypsum.

### LIMITATIONS

1. Do not use in exterior applications.

### APPLICATION

A USG Sales Representative will determine the actual dose per batch based on the specific USG Levelrock product and the retardation effect needed.

Always add USG Levelrock No-Go Hydration Inhibitor directly to the mixing water before adding USG Levelrock Floor Underlayment and sand.

When USG Levelrock No-Go Hydration Inhibitor is used as an additive to the initial or final washout of mixing equipment and hoses, add 2 ounces (56.7 g) per 10 gallons (37.9 L) of rinse water and then introduce to the mixer/pump and flush through the hose.

### STORAGE

Protect USG Levelrock No-Go Hydration Inhibitor from freezing. USG Levelrock No-Go Hydration Inhibitor has a shelf life of one year from date of manufacture.
