

SwiftStart® SA

Rolled Starter Strip

CertainTeed SwiftStart® SA is a self-adhesive, 50-mil membrane designed to eliminate the need for cutting shingle tabs. The peel-and-stick application allows for quick and efficient installation, reducing labor costs.

SwiftStart SA can be used with all laminate or strip shingles and provides an easy-to-apply starter solution. It protects the roof edge and provides anchoring power for high wind resistance at the critical eave and rake areas. It fills in the spaces under the cut-outs and edges for the first course of exposed shingles, preventing wind uplift.

Why SwiftStart® SA Starter?

- Industry leading adhesion
- Self-adhering membrane, mineral top surface
- Fully bonded surface, higher wind uplift resistance
- Compound ensures enhanced nail sealability
- Saves time and labor, no need to cut shingle tabs

SwiftStart® SA Dimensions

ROLL LENGTH	33.5 ft.
ROLL WIDTH	9 in.
ROLL COVERAGE	25.125 sq. ft.
ROLL WEIGHT	7.15 lbs. per roll

Standards and Codes

SwiftStart® SA rolled starter conforms to:

- Physical requirements of ASTM D1970
- Meets certain FORTIFIED Roof™ requirements
