SOLIDS & TRANSITIONS

Create seamless floorscapes by using transition tiles to blend solids, brights and neutrals.

Laylines features 6 anchoring neutrals, each with 2 bright transition options. Select your favorite bright, or to infuse even more pigment, select both bright options for a rich gradient expression.

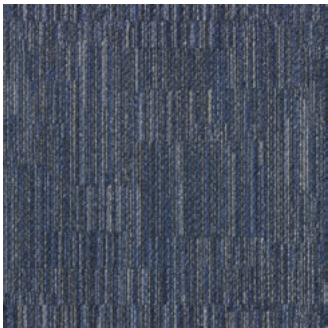

DEFINED SPACES

Subtly create spatial boundaries in workspaces or thoughtfully form a clear traffic flow.

SOFT GRADIENTS

Flow between bright and neutral transitions with ease. Vertical and horizontal transitions feature a subtle gradient, creating smooth, lively progressions in both ashlar and monolithic layouts. For optimal results, install all tiles in a consistent directional orientation to maintain proper pattern flow.
