CAPRI COMFORT

PIERGIORGIO CAZZANIGA

NEW DESIGNS

Capri Comfort elevates the iconic chair from the Capri family to a new level of comfort and presence. It retains the formal purity and timeless elegance of the original design, but incorporates significantly more padding in the seat and backrest, resulting in true comfort. Designed for executive and premium environments, this version enhances its appearance with more generous proportions without losing the light, airy essence that characterizes the collection.

Without altering the minimalist silhouette of the classic model, this design conveys a sense of understated luxury that invites long meetings or moments of reflection. Technical advancements within—next-generation high-density foams—ensure that the ergonomic support lives up to its distinguished appearance.

SO1870
