

TESTIMONIALS

FROM OUR CLIENTS . . .

"The install went well, . . . your product is well-made and engineered." Norman Rosenberg
ROSENBERG WINDOW TREATMENTS, Midland Park, NJ

" . . . The house I ordered it for finally got the handles for this door and the X-10-DOR™ worked great . . . Nice to know something of this sort is available." Bill Hook
HOOK'S INTERIORS, INC, Kennett, MO

" . . . I want to say "great job" to you. The extenders fit great, looked great, and were easy to install. The finish (oiled bronze) was terrific and matched the Peachtree finish perfectly. My customer loved them! . . ." Gary Malak
BUDGET BLINDS OF MURFREESBORO, Murfreesboro, TN

"The door extenders turned out great for this shutter job . . ."
David Rainwater
GATEWAY SHUTTERS, St. Peters, MO

"Just wanted to let you know that we installed one of the door handle extensions to accommodate a 2" wood blind and it worked out great! Thanks for the excellent communication with my client . . . He was very pleased with the transaction and your assistance . . ." Marie Mouradian
WINDOW DESIGNS ETC, Jefferson, MA

" . . . job went great . . . Match was perfect and client happy. I would be very surprised if he doesn't order for the rest of his doors. . . . Thanks for a great product." Joe Weber
LOUVER MAGIC, Margate, FL

" . . . The customer was happy and it fixed the clearance problem."
Steve Rile
IDA AND NORMA'S DRAPERIES, Spokane, WA

FROM THE PRESS . . .

" . . . Something installers should appreciate, RAK LTD introduced its X-10-DOR™ at this year's show. Targeting the shutter and wide blinds markets, this new hardware accessory extends the door handles on French doors allowing adequate room behind (the handle) to accommodate blinds and shutters up to four inches wide." Howard Shingle
"Trade Show: Rally in Baltimore - The International Window Coverings Expo 2002 rebounds to normal level!"
DRAPERIES & WINDOW COVERINGS Magazine, June 2002

"April 2004 Editor's Picks", Linda Henry
WINDOW FASHIONS Magazine, April 2004

PRODUCT BENEFITS

- Allows treatment and door handle to function as designed.
- Design works with mortised multipoint door hardware (handles that lift to engage locks) and some standard hardware (cylindrical & mortised).
- Made to aesthetically match handle finish and design.
- Cost effective vs. cut-outs and/or new handles.
- Minimizes damage to window treatment and door hardware.
- Great for all styles of window treatments (draperies, blinds, shutters, especially motorized systems).
- Available in five standard finishes: polished brass, antique brass, satin nickel, brushed chrome and polished chrome.*
- Comes in three standard lengths: 7/8", 1-1/2" and 2-3/8"*

***Custom sizes & finishes available, call for quote and availability.**

Multipoint Hardware: Hardware that has multiple locking points which simultaneously lock into place when you lift the handle.

Our MULTIPOINT, SET SCREW X-10-DOR™ designs work with these hardware manufacturers:

- ASHLAND (aka Amerock) which can be found on the following doors: Andersen, Caradco, Marvin, & Premdor
- ATRIUM which can be found on the following doors: Atrium
- BALDWIN (aka Fix) which can be found on the following doors: Andersen
- CARL F (aka Fuhr) which can be found on the following doors: Crestline, GenTek, MW, & Pozzi
- HOPPE which can be found on the following doors: Crestline, Eagle, Evco, Hurd, Kolbe & Kolbe, Lincoln, Loewen, Norco, Peachtree, Pozzi, Semco, Therma-Tru, Vetter, Windsor, etc
- JADO which can be found on the following doors: Weather Shield
- ROTO which can be found on the following doors: Evco, Lincoln, & Weather Shield

ABOUT US

In 1999, as one of the company founders was building his home, he learned that the window treatment style that he wanted to use would require him to reposition or replace the door handles on his in-swing patio (French) doors, otherwise, the plantation shutter blinds would not work on the doors. Because the handle was an essential part of the door's security mechanism (*multipoint design*) and the handle design was chosen for the décor of the house, he was not excited about the proposed options. Upon examination of the handle hardware, he had an idea he thought might resolve the problem.

After consulting with his father, the other founder, they agreed they could design and make a part for the door hardware which would allow for the continued function of the lever handle and locking mechanism, yet allow the full operation of the window treatment, without interference.

With that idea they created their first (X-10-DOR™) door handle extension design and started RAK LTD in 2000.

Our STANDARD, SNAP RING X-10-DOR™ designs work with these standard hardware manufacturers:

- BHP, Callan, Emtek, Kwikset Maximum, Omnia, Valli&Valli (aka Forges, Fusital, & VCR), & Weiser

FAQS

How do I decide which size to order?

Our general guidelines for sizing are as follows:

- treatments < 1-1/2 inch are OK to use the 7/8" X-10-DOR™
- treatments between 2" & 3" should use the 1-1/2" X-10-DOR™
- treatments over 3-1/2 inches and shutters need to use the 2-3/8" X-10-DOR™ or we will quote a custom size.

What finish does the X-10-DOR™ come in?

Our five standard finishes are polished brass, antique brass, satin nickel, brushed chrome, and polished chrome. Custom finishes like painted and patinas are available per quote.

How do I determine my door's hardware manufacturer?

Usually, the manufacturer puts a stamping on some part of the hardware. It is typically on the handle, backplate or plate on the door latch edge. To decipher the stamped logos to their correct manufacturer match them to the logos on the compatibility chart below. If you can't find the stamping but know the door manufacturer look on the compatibility table for the door manufacturer and cross-reference it to the handle manufacturer.

Standard Hardware: A lock consisting of a latch and a deadbolt only.

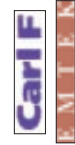

Our STANDARD, SET SCREW X-10-DOR™ designs work with these standard hardware manufacturers:

- Baldwin, Cifial, Kwikset Titan, Society Brass, & Truth
- Other STANDARD X-10-DOR™ designs work with these standard hardware manufacturers:
- W&F which can be found on the following doors: Malta, Peachtree Prado, Therma-Tru, Weather Shield, etc
- IPD which can be found on the following doors: Peachtree Prado

Our COMMERCIAL X-10-DOR™ designs work with these commercial glass door manufacturers' cylindrical style handles:

- Alumicor, EFCC, Kawneer, Tubelite, United States Aluminum, & VistaWall
